

Time to renew your IT infrastructure? Tough decisions ahead.

FUJITSU Server PRIMERGY with Windows Server® 2016

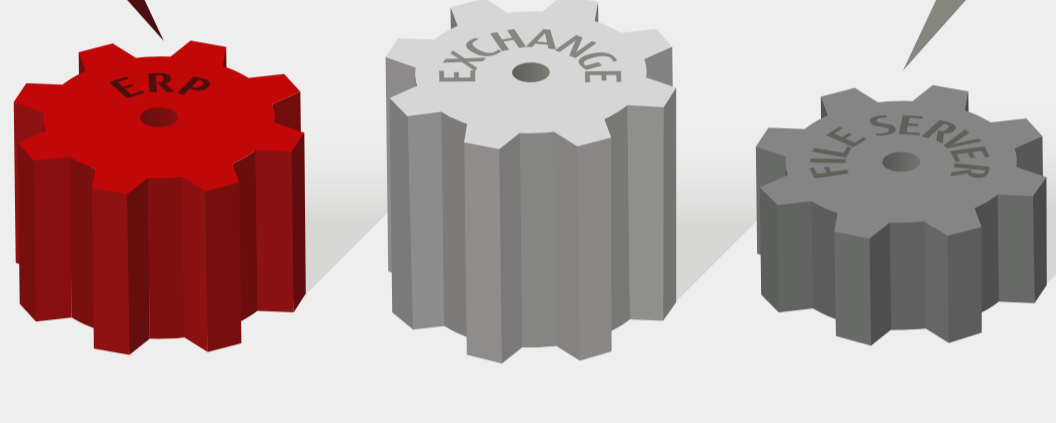

Just think what your business needs. And what your IT landscape is expected to do.

But it's like squaring the circle: All of these key apps want something special:

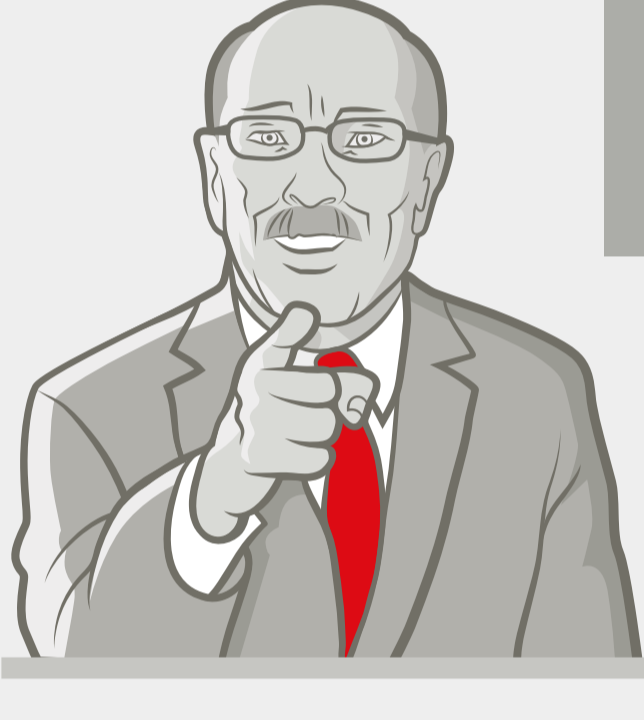

Give me Windows Server!

I want LINUX, and so do my databases!

SharePoint! And software-defined. I hate external storage!

And what does the boss say?

A solution we can SCALE as we grow!

...something that's RELIABLE!

So how do you keep everyone happy – including yourself?

We need ONE do-it-all system running on fantastic hardware.

Microsoft® Windows Server® 2016 will safeguard business, raise IT productivity and make us ready for the cloud.

Hyper-V® capability with virtual machines provides Linux...

...on the advanced FUJITSU Server PRIMERGY in rack (RX) or tower (TX) format.

...and we can really get it all – with the powers of Windows Server® 2016 and FUJITSU Server PRIMERGY.

- Best-in-class performance and energy efficiency
- Totally simple to deploy
- Everything runs on value-priced x86 platform

## Security: a top CIO concern

Security ranks near the top of any list of CIO concerns. In 2015, 38 percent more security incidents were detected than in 2014!

Source: The Global State of Information Security Survey 2016\* | PWC

Windows Server 2016 and FUJITSU Server PRIMERGY have security built in:

TPM 2.0 module embedded

Servers are certified for Microsoft® Windows Server® 2016 embedded functions

Protection also for virtual machines

Great combination! Ready for the cloud, reliable, secure and fantastic performance!
