

NFLEX

Converged Infrastructure

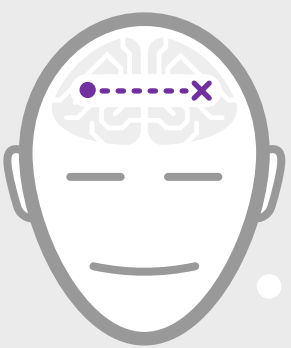

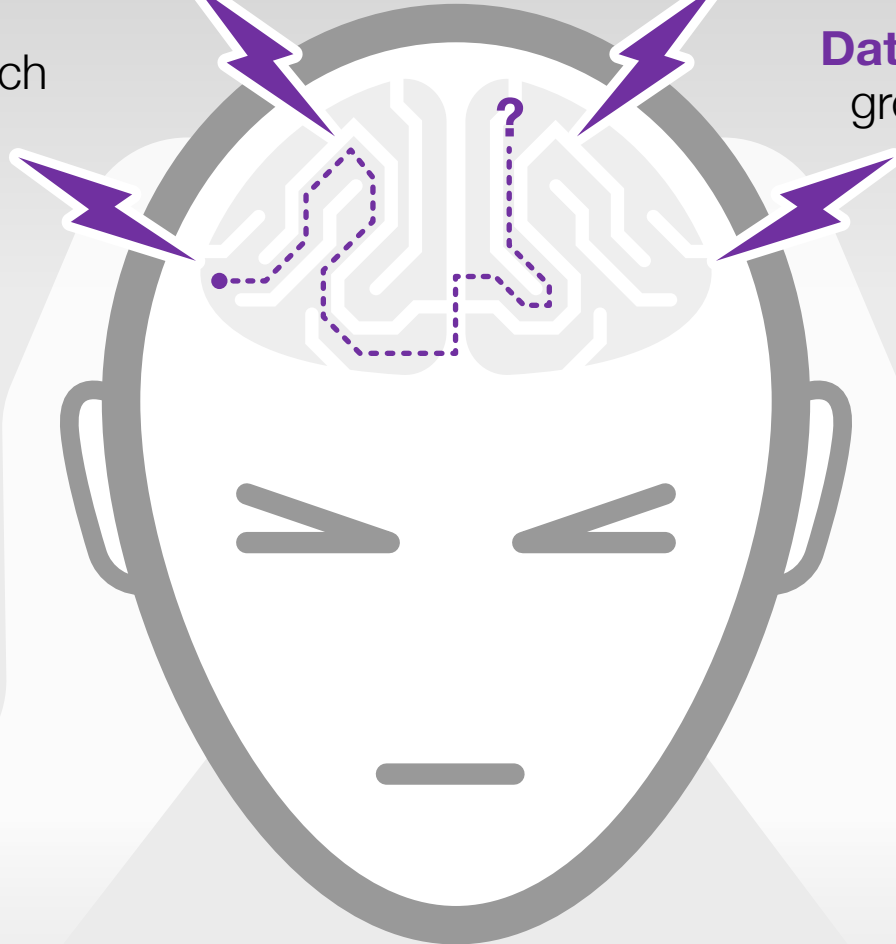

IT a headache to run?

Legacy tech but need to move forward (e.g. virtualization)

Not enough performance for end users

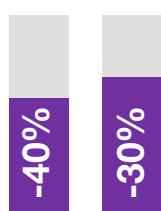

Too much **risk**

Data volumes growing fast

Imagine you could make IT complexity disappear.

Save **-40%** time and **-30%** cost **without** the risk of typical DIY projects!

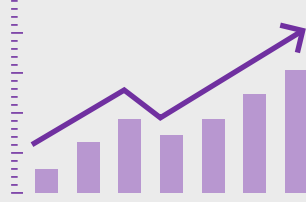

Make it happen with NFLEX Converged Infrastructure by NetApp and FUJITSU!

- ✓ Factory-integrated and pre-installed, ready-to-run directly by NetApp and FUJITSU
- ✓ Fully pre-configured, tested and validated solution
- ✓ Ships in racked / non-racked configurations

All **you** do is switch on. For risk-free productivity from Day One.

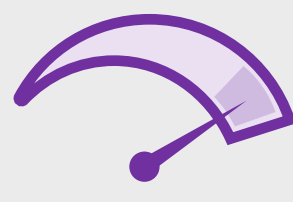

With **NFLEX Converged Infrastructure** by NetApp and FUJITSU, you can:

Gain data center efficiency: less footprint, power and cooling

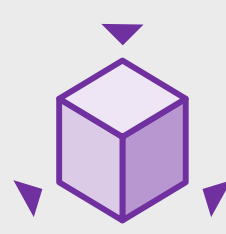

Protect and secure your data

Accelerate workloads and analytics

Three ways **NFLEX delivers value** into your data center

It's simple

- Easy to deploy & run
- Single point of contact for world-class support

It's exceptionally powerful

- Superior performance for your apps
- Industry's fastest virtualization platform

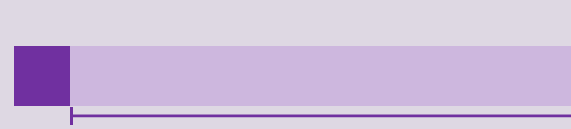

It gives you complete confidence

- Resilient compute and non-disruptive storage ops
- No strategic/operational risk (CI solution from innovative industry leaders)

#1 across all 3 VMware performance benchmarking categories!¹

90% reduction in unplanned downtime²

² ITC 2017 Global Reliability Survey Mid-Year Update

What's **in the box:**

Best-in-class components from strong partners:

- FUJITSU Server PRIMERGY CX
- NetApp FAS/AFF storage
- Extreme Networks VDX switches

NetApp and FUJITSU relationship is 20 years old!

Easily grow your configuration:

Scale both compute and storage capacity independently through expansion packs

M10
Entry FAS

M30
All Flash Small

M50
All Flash Medium

M70
All Flash Large

Start with 2 nodes and scale up to 12 FUJITSU PRIMERGY CX2560
From FAS2650 4 x 960Gb SSD, 20 x 900Gb SAS
to AFF A300 12 x 3.8Tb SSD

...all **ready for your private cloud** with VMware vSphere.
