

Media Backgrounder Fujitsu in Retail

February 2018

Hyperconnectivity, where everyone and everything are linked, is transforming modern retail. In today’s competitive market environment, creating a unique and engaging shopping experience is critical to driving in-store sales and is vital to retailers’ success. Being able to derive meaningful insights into shopper behavior, engagement and preferences gives retailers the edge – and it is the digital transformation of retail, enabling stores to leverage the power of technologies such as the Internet of things and artificial intelligence, that allows traditional retailers to compete with their online counterparts. Now, just like in the online world, retailers have access to insights into shopper behavior, enabling them to tweak store layouts, effectively deploy associates and provide excellent customer service. This is Connected Retail.

Fujitsu’s retail portfolio is based around this hyper-connected world, and focuses on four areas that enable retailers to deliver a differentiated customer experience:

- **Innovative retail solutions** – to support and future-proof the customer experience in today’s multichannel world; this includes Fujitsu Market Place – our omni-channel point of sale (PoS) application– and new solutions from our innovation labs in Japan
- **Connected enterprise** – linking applications, information and communication within the store, between the front and back office, and between multiple vendors to deliver a seamless and integrated customer journey, including enterprise solutions, and outcome-based enterprise services
- **Leading-edge hardware** – underpinning the in-store applications are a range of Fujitsu integrated and modular Point of Service terminals based on a common set of components to reduce deployment and support costs
- **Global delivery** – the assets and capabilities to deliver consistent cross-border solutions

Building on a deep understanding of retail that we have gained over the past 40 years with more than 500 customers and 82,000 stores in 52 countries worldwide, Fujitsu’s mission is to deliver a differentiated customer experience that will increase sales, operational effectiveness and customer satisfaction for our retail clients.

Fujitsu lowers the risk to retailers of implementing next generation solutions as it understands the constantly changing challenges that they face. It supports them with consultancy, the design and implementation of bespoke solutions and the appropriate technologies necessary to meet and satisfy consumer demand for anywhere / anytime retailing. Its portfolio of applications supports the omni-channel world and fully integrates with existing enterprise systems to protect and enhance previous investments. Not only can Fujitsu deliver solutions and any relevant third-party components anywhere that a business wants to trade, but it also offers complementary elements relating to networks, helpdesks and applications support, server and cloud infrastructure.

Fujitsu’s Retail Portfolio

The Fujitsu retail portfolio encompasses the front and back office and beyond, including point of service, mobile and self-service solutions, end-to-end retail business applications including business analytics, customer loyalty and dynamic digital media. These comprehensive solutions are delivered through a suite of managed IT services across the store, networks, applications and infrastructure.
