FUJITSU

The flexibility
to move.
The strength
to perform.

SAP on Azure from Fujitsu

A stronger, cloud-based SAP estate can transform the performance of your business. But migration means complexity and risk. Getting the move right takes time and expertise you might not have. And getting it even a little bit wrong can have severe consequences. Your business-critical systems might go down. You could lose data. And suddenly, your reputation could be at risk.

At Fujitsu, we have the knowhow and tools to smooth your move. We've completed hundreds of SAP migrations and system upgrades for our clients – including large-scale moves to SAP S/4 HANA. And we're trusted, global partners of both SAP and Microsoft. It means we can manage the risks while you focus on the rewards, like improved productivity and business growth.

Simple migration. Fast innovation.

You don't have to worry about the complexity of moving your SAP landscape into the cloud. Our SAP-certified experts will help you choose the right solution and manage it for you. So, you can spend more time improving your business with your modern, simplified estate.

We'll then work with you to transform SAP applications and processes, supported by Microsoft. And we'll enhance your SAP systems with the latest technologies from all three partners. Which means you can innovate and grow faster. And your business will always be gaining new value from a cutting-edge SAP estate.

Good things come in threes.

Your modernization will be handled by unique global partnerships, bringing together leaders in critical systems, hyperscale cloud and Hybrid IT integration – all with deep knowledge of each other's products and services.

And as a SAP-certified and Microsoft Gold Partner, your migration will be in safe hands with Fujitsu. We've worked closely with both providers for over 30 years, implementing and managing some of the largest SAP and Azure deployments around.

It all means that you'll get best-in-class IT from the best in the business.

Three leaders. One point of contact.

You'll have the expertise of three technology leaders behind your modernization. But there's only one number to call. We manage the entire process and partner ecosystem, so you can simplify, transform and digitalize SAP landscapes.

Why Microsoft?

- Gain access to over 100 cloud services, including enterprise productivity and collaboration tools.
- Develop and deploy with global reach, using a proven hyperscale cloud for SAP systems.
- Create innovative new solutions faster, with your SAP systems in close proximity to ground-breaking Azure services.

Why Fujitsu?

- We manage over 3,000 SAP systems and 800,000 users.
- One of the largest Azure practices and some of the largest deployments.
- Deep knowledge of all areas of Hybrid IT and multi-cloud.
