

Empowering Service Providers

Next Generation Services

Fujitsu Virtual Desktop-as-a-Service (vDaaS)

Boost your annuity business without investment with our new cloud desktop service

Are you looking to boost your annuity business? Or take a new cloud offering to market? Our ready-made vDaaS service lets you do both, with no up-front cost or risk. It's a simple cloud desktop model backed by a Gartner Magic Quadrant Leader in workplace services.

Simple & transparent pricing model

Start from as little as 20 seats and grow, with the ability to flex up & down for short term requirements – all priced per user, per month.

No CapEx – no risk

100% OpEx, so no up-front cost or risk for you or your customers.

Become a Service Integrator without the headache

You manage your individual customer tenants and any additional services using the simple administration platform. We handle everything else.

Secure UK hosting

Highly available, secure, and hosted from the UK, with recovery to other vDaaS regions and direct connections into other public cloud services.

Truly hybrid model

Consume vDaaS from our public cloud, your own private instance, or on your customers' site – depending on the requirement.
