FUJITSU Dot Matrix Printer DL7400 Pro

Heavy duty, high-speed multi part printing

With its reputation for professional quality the FUJITSU Dot Matrix Printer DL7400 Pro is the first choice for heavy duty printing of multi-part invoices, sales orders, stationery and other similar documents. This printer is ideal for any application that involves the need for carbon and carbonless copies. Besides excellent paper handling features, this 24-pin dot-matrix printer offers impressive high speed printing and up to 7 copies at once (plus the original).

DS-Printer_Ver1-0

- At 12 cpi, print speeds range from 216 cps for letter quality to 606 cps for high draft quality.

Barcode printing as standard

- At 12 cpi, print speeds range from 216 cps for letter quality to 606 cps for high draft quality.

Flat printing structure

- This allows for smoother paper feeding and improves the accuracy of print positioning, while the printing penetrates from the surface paper to the bottom paper in multiple batches. It is also effective when handling heavy loads of multiple paper.

A variety of paper paths

- 8 paper paths are available of which up to 4 forms can be loaded on the printer at the same time. This means that there is no need to bother changing the forms each time.

APTC and HCPP function

- Detecting paper thickness, adjusting head gap automatically and changing paper paths can be handled by using the application software or Windows driver even if several paper forms are loaded at the same time.
