ESPRIMO MRE (Meeting Room Edition)

Collaboration and Smart Meeting Room Solution from Fujitsu

Transform your meeting rooms into smart working spaces

In today's business world, with its increasingly sophisticated optimization of business processes, solutions are required that can be seamlessly integrated into the existing IT infrastructure. This is where Fujitsu's collaboration solution, ESPRIMO MRE (Meeting Room Edition) steps in — allowing all participants to share presentation content wirelessly without the need for any time-consuming connecting up of disparate devices. With the ESPRIMO MRE installed in the conference room and the corresponding user software installed on all client devices with a standard operating system, a smooth and prompt start is guaranteed for conferences and meetings. Participants can view and interact with content in real time, as well as share documents seamlessly. The ESPRIMO MRE helps enhance productivity in different kinds of workplace scenarios, be it company meetings and conferences, customer briefings, demos and discussions, collaborative project work or classroom setup in schools and colleges.

Enhanced usability, productivity and seamless wireless collaboration

Hassle-free — eliminates dongles, cables or adapters, and meeting delays

- Faster and seamless wireless connection ensures that meetings start on time
- Improved usability – quickly switch presenters or exchange presentations at the click of the mouse
- Content from up to four participants can be shown on each connected presentation screen
- Parallel operation of different participants' content on screens
- Connect client devices based on Windows, macOS, iOS, Android, ChromeOS and Linux

User-friendly collaboration solution for meeting rooms

Enables colleagues to work together more productively during meetings

- Turn existing conference rooms into smart, connected meeting rooms
- Real-time content sharing, annotation, file transfers
- Participants can easily connect from virtually any locations, with virtually any client
- The native touch capabilities of Intel Unite® allow a presenter to control the meeting content from virtually any touch-enabled display, creating a more dynamic meeting environment

Easy integration and expandability

Enterprise-level manageability features

- Tight integration with the company network
- Managed with Intel Unite® Server software
- Plug-in extensions for the integration of existing Smart Device Solutions, such as Skype for Business (plugin design concept)
- Remote manageability with Intel® vPro™ technology; regular software updates to expand existing functionality

Advanced security: designed for use in the corporate network

Intel Unite ensures a secure, encrypted connection in meeting rooms

- Meeting access protected with ultra-secure, alternating PIN codes
- External participants join the meeting over a secure, peer-to-peer connection that is separate from the company's intranet

Components

The ESPRIMO MRE (Meeting Room Edition) consists of various hardware and software components, which are pre-configured to the appliance.

Component	Description
Appliance can be ordered with ESPRIMO Q958/MRE	Order Code: S26361-K1012-V620
Appliance contents	ESPRIMO Q958 Hardware; Intel Unite® V4.0 and V3.3 Software for wireless meetings
Software (preloaded)	Intel Unite® V4.0 and V3.3 Hub software including quick setup utility, Win10 Pro(64) MAIN preloaded, Windows 10 Pro license included Microsoft Office 1-month trial pre-loaded
Software CD included in package	Intel Unite® V4.0 and 3.3 Client, Hub and Server Software and documentation on CD
Hardware	Based on ESPRIMO Q958 with processor of Core i5-8500 series, 1x 4GB DDR4-2666, SSD PCIe 256GB M.2 NVMe, WLAN, internal speaker and VESA cover
Interfaces	
Front	1x Audio microphone, 1x Audio headphone, 2x USB 3.1 (Gen2), 1x USB3.1 Type-C (Gen2)
Rear	2x DisplayPort, 1x DVI-D, 2x USB3.1 (Gen2), 2x USB3.0, 2x USB2.0, 1x Kensington Lock support, 1x Ethernet (RJ-45), Integrated WLAN

Compliance

Q958/MRE	
Model	MPC3
Germany	TÜV GS
Europe	CE
USA/Canada	FCC Class B cTUVus
Global	RoHS (Restriction of hazardous substances) WEEE (Waste electrical and electronic equipment) Microsoft Operating Systems (HCT / HCL entry / WHQL) ENERGY STAR® 7.1 EPEAT® Gold (dedicated regions)
Compliance notes	This product is free of polyvinyl chloride (PVC) when ordered with the optional PVC free power cord

We recommend Product Support Services with various Service Level Agreements for peace of mind with all our products and for ensuring problem-free IT operations.

Solutions

<https://www.fujitsu.com/global/solutions/industry/>

Fujitsu's solutions are a combination of reliable products, excellent services, in-depth expertise and world-wide partnerships. They cover up one or more areas (e.g. planning, implementation, support, management and training services) and have been developed for specific business needs.

Infrastructure solutions are offers where our best products, services and technologies are merged with those of our partners in order to generate business benefits for our customers.

Branch solutions are especially tailor-made to meet the individual requirements of each branch.

Business and technology solutions offer a large number of solutions for a wide range of branches that handle corporate problems such as security and sustainability.

Services

<http://www.fujitsu.com/global/services/>

Various adaptable offers ensure that the IT solutions deliver considerable benefits and real business value. We use our comprehensive experience in managing complex IT transformation programs in order to support the customer in planning, providing and delivering IT services in a highly demanding and changing business environment.

Application Services support the development, integration, test, provision and administration of tailor-made and standard applications. The services enable companies to improve their business operations and productivity.

Business Services is aimed at the challenges involved in planning, providing and operating IT in a complex and changing IT environment.

Managed Infrastructure Services enable customers to implement an IT environment which meets their requirements: a high degree of IT service quality and service for data centers and end-user applications.

Fujitsu Green Policy Innovation

<https://www.fujitsu.com/emeia/about/local/>

- Fujitsu Green Policy Innovation is our worldwide project for reducing environmental pollution. On the basis of our global expertise, we are working for environmentally-friendly energy use through the application of IT.
