FUJITSU Accessory PalmSecure™ SDK V02 (Software Development Kit) Security Access Protection

Develop a customized PalmSecure™ solution

The FUJITSU PalmSecure™ Software Development Kit allows you to develop your own solutions using the Fujitsu PalmSecure™ product family. It includes source code for sample applications and tools that you can modify or adopt as needed. The SDK includes 1 PalmSecure™ sensor, drivers, application key and much more.

Application Possibilities:

- PC Log-in system
- Safe Deposit Box
- Time & attendance system
- Electronic Medical Record
- ATM
- Payment system
- Kiosk Terminal
- Access Control

Source code for sample applications provided:

- Sensor driver
- Sample Application for rapid architecting of custom applications
- Sample Interface library for Microsoft.NET Framework/Java
- Sensor maintenance tool
- Sales support tool
- Firmware update tool
- Enterprise library (optional purchasable item)

SDK Kit includes:

- PalmSecure™ Sensor
- Foldable palm guide and sensor holder
- USB cable (1m)
- PalmSecure™ Software for programming (Professional edition)
- PalmSecure™ SDK Application Key
- Development license (1 year downloadable period)
- SDK V02 professional Edition includes: 10 Windows and 10 Linux developers license, 1 Windows Distribution license and 1 Linux Distribution license

PalmSecure™ SDK V02 (Software Development Kit)

Technical specifications

Software Details:

Authentication library: a program in a library format that enrolls vein data and authenticates a person. This library can be redistributed with an distribution license and additional license to run the libraries on a PC. Licenses have to be ordered seperately

Sensor driver: the driver for operating the sensor

Sample Application: provides C++/VB and C# source code and sequence charts that enable easy and rapid architecting of applications. These are available in standalone or client/server configurations.

Sample interface library for Microsoft .NET FRamework: the sample programs which interface between applications created by Java language or VB.NET/C# language and the Authentication library created by the C language.

Sensor maintenance tool: provides the ability to diagnose malfunctions in the sensor that can be used to identify failures.

Firmware update tool: the firmware on the sensor unit can be updated easily with the firmware update tool.

PalmSecure TM SDK Support Website: offers technical data, enhanced services for related software and timely Q&A support valid for 1 year after registration
