Data Sheet
FUJITSU Accessory PalmSecure SL Sensor
Security Access Protection
For maximum security

With the FUJITSU PalmSecure SL Sensor the user can authenticate with the portable sensor to their smart device when on the go. Compared to fingerprints, which are information sources located on the body's surface, palm vein data is contained inside the body, making it more difficult to forge. It provides 1:1 matching authentication.

Security
■ Highly secure biometric solution through palm vein authentication. It provides a powerful combination of strong biometric authentication for log-in security, access management and data protection for both client and enterprise environments.

Usability and Ergonomics
■ PalmSecure is effortless to use. Simply hold the palm over a small infrared scanner and within a second the identity is verified. Because the system is contactless it is completely hygienic.
