Fujitsu Advanced Theft Protection

The proliferation of portable devices in the last decade has made it far easier for criminals to acquire sensitive information such as banking or medical details. While encryption helps to protect data, organizations that do not have a technique for swift recovery can never truly ensure their clients' confidentiality. When a device has been lost or stolen, there is a very real possibility that the data stored on it will be compromised – whether the data has been encrypted or not.

Single point solutions – such as encryption alone – are no longer sufficient to adequately protect an enterprise from all points of attack. IT departments getting by with minimal compliance protection expose themselves to unnecessary risks and potential liability. Multi-layered security strategies are therefore necessary. Fujitsu recognizes the necessity for layered security and offers an advanced solution to cover security needs of all kinds.

Advanced Theft Protection - Offerings

Using a modular approach, Advanced Theft Protection responds to the different requirements of large enterprises as well as small and medium-sized businesses. Fujitsu ATP, together with Absolute Data & Device Security (DDS), formerly Absolute Computrace®, fulfills the need for real security.

Absolute Data & Device Security (DDS) is an adaptive endpoint security solution. It provides you with a persistent connection to all of your endpoints and the data they contain. This means you're always in control, even if a device is off the network or in the hands of an unauthorized user.

Absolute Data & Device Security (DDS) is the successor of the following products:

- Absolute Track
- Data Protection
- ComputraceOne

Absolute Data & Device Security (DDS) is available through Absolute distribution channels. To find out where to purchase Absolute DDS, please contact Absolute EMEA Sales at +44 118 902 2000, or email fujitsu@absolute.com.

Absolute Persistence® Technology

Fujitsu continues to embed Absolute Persistence® technology in the BIOS of selected FUJITSU Tablet STYLISTIC and FUJITSU Notebook LIFEBOOK. To find out if your device is Persistence® capable, please check the device's data sheet on our website.

Please notice that it may be necessary to activate the Absolute Persistence® technology on certain systems. This can be done with a tool which is available [here](#).

Fujitsu platform solutions

In addition to Fujitsu Advanced Theft Protection, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Dynamic Infrastructures

With the Fujitsu Dynamic Infrastructures approach, Fujitsu offers a full portfolio of IT products, solutions and services, ranging from clients to datacenter solutions, Managed Infrastructure and Infrastructure-as-a-Service. How much you benefit from Fujitsu technologies and services depends on the level of cooperation you choose. This takes IT flexibility and efficiency to the next level.
