FUJITSU Storage ETERNUS CS200c S4

Integrated Backup Appliance for the Digital World

ETERNUS CS Data Protection Appliances

Data protection appliances from Fujitsu simplify and consolidate backup and archive infrastructures. Fujitsu specializes in mapping the right technology for individual needs depending on your business size. Our appliances offer advanced capabilities such as deduplication, replication, archiving and cross media mix, thus mitigating risk, minimizing downtime and protecting business against cyber-attack.

ETERNUS CS200c S4

The FUJITSU Storage ETERNUS CS200c Powered by Commvault® simplifies data protection and management in a single integrated solution for the digital world. Industry-leading software from Commvault is perfectly aligned with powerful Fujitsu system technology providing excellent features for business efficiency and continuity. The solution addresses the challenges in protecting business applications, virtualized, converged and hyper-converged environments and facilitates compliance with regulations.

The pre-loaded and pre-configured appliance enables the hassle-free setup of a comprehensive data protection environment and reduces the implementation time by 60 %. ETERNUS CS200c with the integrated Commvault Software provides comprehensive functionality including backup, archiving, deduplication, disaster recovery, replication, snapshot, tape and cloud support to radically simplify data management across its lifecycle.

Features & Benefits

Main Features	Benefits
Integrates correctly-sized system technology and leading data protection software	<ul style="list-style-type: none">■ Easy and fast deployment, simple to purchase■ Maximizes resources■ Budget security
Backup, archiving and deduplication capabilities within one appliance	<ul style="list-style-type: none">■ Managing the complete data lifecycle efficiently■ Reduces network requirements and storage costs
Protects a wide range of applications, virtual and hyper-converged infrastructures with a single integrated solution	<ul style="list-style-type: none">■ Increases availability and recoverability meeting highest RTO/RPO demands■ Cuts cost and downtime

Key characteristics

ETERNUS CS200c – Data Protection in a box

- The ETERNUS CS200c is a complete data protection infrastructure in a box. Using Commvault Software the appliance serves as a standardized platform for the backup and archiving of data from physical and virtual environments. The solution is designed to meet customer demands for easy planning, deployment, operation as well as the requests for a unified backup solution across large or distributed enterprises.
- The ETERNUS CS200c is equipped with fast hard disks and flash storage to boost backup and deduplication performance. The solution offers a broad range of models and licensing options.
- The appliance setup is easy thanks to the pre-loaded appliance image and automated deployment support. The central management console with GUI and remote access is used to track, index, schedule, and perform data transfer. The unified management makes backup administration and scheduling quite easy and eliminates multiple management points. It also reduces risks, cuts costs and frees up administration resources.
- The ETERNUS CS200c is ideal for companies of all sizes looking for a data protection solution in a box, for consolidating backup infrastructures, for enterprises with branch offices/subsidiaries and for easy data backup in specific areas, such as VM environments (traditional, converged, hyper-converged), MS Exchange or Desktop/Laptop clients.
- The appliance is ideally suited as backup solution for FUJITSU Integrated System PRIMEFLEX. For more information about PRIMEFLEX see: www.fujitsu.com/primeflex.

ETERNUS CS200c - Data Protection Software

- The Appliance Software of the ETERNUS CS200c is based on technology-leading Commvault software and is closely coupled with powerful Fujitsu system technology. The ETERNUS CS200c combines all the advantages of an integrated appliance with the flexibility of a dedicated backup software license. The appliance comes with pre-installed software and you can freely select out of all available Commvault software license flavors, among them capacity, pure VM infrastructure or per user. The licensing is always perpetual offering highest investment protection.
- Modern backup, recovery, archiving, and data management capabilities protect ever-growing data volumes, efficiently manage information assets, and quickly find, recover and access data. The software provides data deduplication at the source (client server) or the target (ETERNUS CS200c) dramatically reducing storage capacity and cost. The appliance offers application support for Windows, Linux/Unix, VMware, Hyper-V, Oracle, SAP and more. Furthermore, the software delivers native support for more than 40 cloud storage providers across public and private clouds among them Azure, AWS, Google, Oracle, VMware.
- The hardware snapshot management converts time-consuming manual tasks into automated, repeatable and consistent operations for a wide range of storage arrays including Fujitsu Storage ETERNUS arrays. Deep application and virtual machine integration provides rapid, automated recovery of critical workloads meeting recovery time objectives (RTO) and recovery point objectives (RPO).
- Choose the tape attachment to copy or move not frequently used, cold data from the appliance disk storage to FUJITSU Storage ETERNUS LT tape system. Tape storage as low cost media provides offline backup to thwart cyberattacks and is ideal for long-term retention, archiving, and second-tier backup. For more information about ETERNUS LT see: www.fujitsu.com/eternus-lt.

ETERNUS CS200c without license

- The 'ETERNUS CS200c without license' is the best choice for existing Commvault environments. The appliance is pre-configured and pre-installed offering an easy and quick start-up.
- Use this delivery model to deploy quickly new Commvault media agents into the existing environment.

Technical details

General Specification

	ETERNUS CS200c ECO	ETERNUS CS200c FLEX		ETERNUS CS200c FLEXC
Model	ECO08	FLEX32	FLEX48	FLEXC
Capacity (net usable)	8 TB	16, 32 TB	24, 48 TB	24 - 144 TB
Backup Performance (max)	17.2 TB/h	20.6 TB/h		37.8 TB/h
Restore Performance (max)		1 TB/h		7.7 TB/h
Performance Notes	<p>The performance numbers depend on user data and environment. The dates were measured under the following conditions: ECO model: Backup: 1 client, 4 streams, data reduction 90%; Restore: 1 client, 2 streams FLEX model: Backup: 2 clients, 6 streams, data reduction 90%; Restore: 1 client, 2 streams FLEXC model: Backup: 6 clients, 18 streams, data reduction 90%; Restore: 7 client, 18 streams Restore values are limited by the client disk subsystem.</p>			
Note	Capacity value calculated using Base 10 (i.e. 1TB = 1,000,000,000,000 bytes)			
Ethernet Ports	3 x 1 Gbps 2 x 10 Gbps	3 x 1 Gbps 4 x 10 Gbps	3 x 1 Gbps 4 x 10 Gbps	3 x 1 Gbps 4 x 10 Gbps
Fibre Channel Ports			2 x 16 Gbps	2 x 16 Gbps
SAS Ports (external)	8 x 12 Gbps	8 x 12 Gbps	8 x 12 Gbps	8 x 12 Gbps

Software

Appliance Software functions	Backup and Recovery; Archiving; Replication; Application support; Cloud attachment Compression und Deduplication to Disk; Primary and Secondary copy encryption Depending on licensing: Snapshot support; Snapshot replication; Tape attachment; Mailbox archiving; Endpoint data protection Unlimited file clients, NAS clients and VMs
------------------------------	---

Installation specification

Dimension notes	482.4 mm (Bezel) / 445 mm (Body) x 770 x 86.6 mm
19" rackmount	Yes
Height Unit standard	2 U
Weight	25 kg
Power supply	450W hot-plug, 94% (Platinum efficiency), 100-240V, 50 / 60Hz 800W hot-plug, 94% (Platinum efficiency), 100-240V, 50 / 60Hz
Note	ETERNUS CS200c FLEXC can scale and therefore have up to 12 HU and 200 kg (441 lb) in total

Environment

Operating ambient temperature	5 - 45 °C (41 - 113 °F)
Sound pressure (LpAm)	Minimum noise : 33 dB(A) (idle) / 33 dB(A) (operating) Typical noise : 44 dB(A) (idle) / 44 dB(A) (operating)
Sound power (LWAd; 1B = 10dB)	Minimum noise : 5.6 B (idle) / 5.6 B (operating) Typical noise : 7.5 B (idle) / 7.5 B (operating)
Noise notes	Noise emissions depends on operation modes, system configuration and ambient temperature. Typical hardware configuration which is the base for measurement according to ISO 7779: 2x PSU 450W. 2x CPU Xeon E5-2630 v4 2.20 GHz, 4x RAM 8GB, HDD 2x 500GB SATA
Operating environment	FTS 04230 – Guideline for Data Center (installation specification)
Operating environment link	http://docs.ts.fujitsu.com/dl.aspx?id=589915e9-1bf8-40f7-8ba4-7cac9371f2f0

Warranty

Warranty period	3 years
Warranty type	Onsite warranty
Warranty Terms & Conditions	www.fujitsu.com/warranty

Product Support Services - the perfect extension

Warranty

Support Pack Options for HW-Services	Available in major business areas: 9x5, Next Business Day Onsite Response Time 9x5, 4h Onsite Response Time (depending on country) 24x7, 4h Onsite Response Time (depending on country)
---	--

Support Pack Options for SW-Services	9x5, 4h Remote Response Time 24x7, 4h Remote Response Time
---	---

Recommended Service	24x7 Fujitsu support for enterprise class HW and SW services. SW-Services are mandatory.
----------------------------	---

Service Lifecycle	5 years after end of product life
--------------------------	-----------------------------------

Spare Parts availability	5 years
---------------------------------	---------

Service Weblink	www.fujitsu.com/emeia/products/product-support-services
------------------------	--

Compliance

Compliance notes	There is general compliance with the safety requirements of all European countries and North America. National approvals required in order to satisfy statutory regulations or for other reasons can be applied for on request.

Fujitsu products, solutions & services

In addition to FUJITSU ETERNUS CS200c S4, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio

Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
