### ETERNUS LT Tape Storage

The affordable ETERNUS LT tape systems offer impressive scalability and reliability. The highly automated and cost-efficient backup solution meets a wide range of demanding storage requirements including long-term archiving, disaster recovery and unattended backup for businesses of all sizes. The ETERNUS LT family provides data encryption offering enhanced security and compliance.

### ETERNUS LT260

The ETERNUS LT260 LTO based tape library combines flexible scalability, exceptional storage density with excellent automated and remote management capabilities for the highly efficient handling of fast growing backup and archive volumes.

It starts from 1200 TB of compressed LTO-7 capacity in a 6U chassis of up to 8.4 PB in the maximum configuration of one base module and six expansion modules. Each module has 80 slots and can be equipped with up to six drives for connectivity, performance and redundancy.

ETERNUS LT260 can be split into a maximum of six partitions per unit serving different application environments in parallel. A graphical web interface and a high level of automation enable simple and remote operation without on-site experts. The ETERNUS LT260 systems are enabled for encryption offering enhanced security and compliance.
