FUJITSU PLAN 1Gbit PCI 2.1 Intel® I210 T1

Single port 1 Gbit PCIe 2.1 card

Ethernet cards enable data exchange between all the devices connected in a local network (LAN). A networked IT infrastructure that functions well is of great significance when managing and controlling critical business processes in a company. The wide range of complex information transported across the network relies on fast and reliable data processing by the network cards.

PLAN 1Gbit PCI 2.1 Intel® I210 T1
The Intel Ethernet Server adapter Intel® I210 T1 offers a Gigabit Ethernet port for entry-level servers and audio-video applications with an innovative power management. IEEE 802.1Qav Audio-Video-Bridging (AVB) for tightly controlled media stream synchronization, buffering, and reservation.

Power management features such as Energie Efficient Ethernet (EEE) and DMA Coalescing (DMAC) provide a low cost equipment with a high-performing PCI Express Gen 2.1 - 2.5GT/s connection.

Based on environmental friendly design the Intel Ethernet Server adapter Intel® I210 offers a completely lead-free product with a combination of power management and space saving design ideal for compact workstations and entry level servers.
