

Fujitsu Enterprise & Cyber Security

## 0365 Compromise Assessment

Professional Services

### An assessment of potential 0365 compromise through intelligence led security

#### Summary

If you believe your organisation may have fallen victim to the 0365 Chain Attack disclosed by Fujitsu's Cyber Threat Intelligence (CTI) team (or have any other concerns related to 0365 security), then the 0365 Compromise Assessment will help you to analyse whether there are signs of a breach in your environment. Fujitsu CTI will:

- Conduct eDiscovery searches and message traces for affected accounts based on threat intel of previously analysed campaigns and those identified on premise
- Check for secondary campaigns that may have been conducted from within the organisation based on known indicators
- Analyse attempted sign-ins for any suspicious activity with particular regard paid to those made from known attacker locations and atypical differences
- Check for amended or deleted Outlook rules consistent with attacker TTPs on known compromised accounts
- Provide a summary report of findings and recommendations
- \*Check for the creation of administrator accounts
- \*Analyse administrator account sign-ins

*\*Dependent on Active Directory being accessible from the 0365 portal*

#### Why work with Fujitsu?

As an ICT service provider, Fujitsu has been designing, implementing and operating robust and secure ICT solutions for many years throughout the public and private sector.

Our services are backed up through our established Enterprise & Cyber Security practice, enabling us to provide an end-to-end service that

can integrate or support your organisation's requirements, policy and strategy. We have:

- Experience in incident response including threat intelligence research
- A proven track record providing strategic guidance and practical solutions on implementing leading practice and regulatory compliance
- A strong brand and market presence and a reputation for providing high quality services to our customers
- A passion to work collaboratively to ensure maximum customer engagement

#### Customer Responsibilities

To complete the 0365 Compromise Assessment we will require your participation. Here are some of the things you will need to do:

- Create 0365 accounts for incident responders (IR)
- Grant temporary global admin privileges for IR accounts
- IR accounts added as eDiscovery Administrators
- Provide, if available, any emails that are believed to relate to 0365 compromise
- Provide details on where user sign-ins should be expected from, geographically
