

Datasheet

CS800 Reference Architecture based on FUJITSU Server PRIMERGY

Implementation Pack

Introduction

Fujitsu ImplementationPack provides the implementation service of the CS800 Reference Architecture (CS800 RA) based on a FUJITSU PRIMERGY RX2540 M6.

The service covers the installation of the VMware ESXi® software and the CS800 RA software into a virtual machine on ESXi®, as well as the configuration and initial operation of the system.

Supplementary information may also be provided in product specific Technical Appendices to this datasheet.

Scope of Service

Fujitsu provides the services described in this datasheet for the specific system for which this service has been commissioned, including all integral components for the purchased configuration. Where applicable, further product specific details are described in a Technical Appendix for the respective product.

The implementation is considered complete when all functional tests as described in the respective Technical Appendix are executed successfully. After the completion of the implementation and accomplishment of the orientation session with the customer, the system is prepared in the optimal way for further configuration and for initial operation by the customer.

Data migration is not part of this service. Further services that are not part of the Fujitsu Implementation Pack, can be provided on request and will be charged on a time and material basis in accordance with the valid Fujitsu price list. The implementation is performed properly and according to the manufacturer's specifications by certified technicians.

Order codes

- FUJITSU Implementation Pack for CS800 RA
FSP:G-IM32100PRSER (SP SOL Imp CS800RA IMPL PACK)

Service in Detail

Hardware Installation (Rack & Stack)

This service does not include the installation of a PRIMERGY server. The installation of a PRIMERGY server into an appropriate rack with required cabling is provided by the InstallationPack service which is ordered using the following code:

FSP:G-IPBS00MPRSER Installation Pack Basic Single Server Product (Up to 2 HU), 9x5

Further detail is available in the “Fujitsu Installation Services EMEA Offering” datasheet.

The CS800 Reference Architecture based on FUJITSU Server PRIMERGY ImplementationPack covers the implementation of VMware ESXi® and CS800 RA software onto one PRIMERGY server.

Remote Implementation

For remote installation of the ESXi® and the CS800 software, remote access needs to be granted to the iRMC of the PRIMERGY and the virtual console of the iRMC.

Implementation

- Verification and, where applicable, update of the BIOS or firmware in agreement with the customer
- Installation of the appropriate version of the VMware ESXi® operating system and supported drivers.
- Basic configuration of the ESXi®
- Creation and configuration of the VM for the CS800 RA
- Installation the CS800 RA software onto the VM

System Handover

After the successful implementation Fujitsu will conduct a customer orientation session with following topics:

(Duration: 1 hour)

- Introduction to the ESXi® GUI
- Startup and shutdown fo the CS800 RA virtual machine
- Accessing the virtual console with the Cent-OS GUI
- Basic configuration of the CS800 RA
- Q&A session

The customer should provide a conference room and projector for this orientation session if carried out on site.

After this Fujitsu will handover the system following defined process. Acceptance of the customer by signature that the implementation was completely performed in accordance with the description for the purchased ImplementationPack will complete the handover.

Service Time

Service specialists with product and system-specific knowledge perform the implementation at the agreed date and during the local business hours (standard service time) that may vary between countries. Standard service time.

Please see details for respective country under <http://www.fujitsu.com/fts/support-local-terms>

Any different implementation times can be agreed if required and against payment of additional costs.

Travel Expenses

Implementation is assumed to be delivered remotely and therefore, no travel costs are included in Implementation Pack pricing outside of DE, AT and CH. If a requirement dictates that implementation activities must be delivered on site then the associated costs will be charged additionally.

Prerequisites

The following prerequisites apply for the execution of the Implementation Pack:

- The system and all other components required for the installation are located directly at the installation location.
- The required infrastructure (connections for the power supply, LAN, SCSI, etc.) including the necessary building cabling, are to be provided by the customer in such a way that they can be connected to the system.
- Installation of the hardware and establishment of the physical connections. (See Hardware Installation (Rack & Stack))
- Basic configuration parameters, as defined in the pre-installation planning checklist.
- The implementation service must be claimed by the customer within 90 days after placement of the order. Fujitsu reserves the right to increase the fee for the ImplementationPack after this period.
- Customer should provide a conference room and projector for the orientation session if carried out on site.

Exclusions

This Fujitsu ImplementationPack is only available for the initial installation of a new CS800 RA on PRIMERGY server.

Planning or design services for the integration of the system into the IT environment of the customer or an assessment of the IT environment are not included in the Implementation Pack.

This service does not include installation or configuration of switches and/or networking equipment. We do not offer advanced performance testing or tuning as a part of this service.

As a part of this service, Fujitsu will not load, manage, migrate, or manipulate your data. Details of such services provided by Fujitsu can be advised on request.

Legal Information / General Terms and Conditions

In addition to this data sheet, which includes a final list of the features of the services, the general business terms and conditions of the respective local Fujitsu entity for the performance of the services in its respective local version shall apply.
