

## Fujitsu Software BS2000 openSM2 (Open Systems) Package Version 10.0

The package for Fujitsu Software BS2000 OS DX V1.0 and OSD/XC V11.0  
System Performance Monitor

### Topics

#### Product line openSM2

Round-the-clock performance monitoring forms the basis for effective and economic operation of IT systems.

Fujitsu Technology Solutions offers the openSM2 product line, a consistent solution for corporate performance.

openSM2 provides comprehensive online monitoring with configurable alarm management, detailed bottleneck analyses as well as forecasts of future performance requirements and so gives the customer the capability to optimize the performance of his systems.

The openSM2 product line consists of the products openSM2 (BS2000) and openSM2 (Open Systems) package.

#### openSM2 (Open Systems)

openSM2 (Open Systems) supports the server systems Linux, Microsoft Windows, VMware vSphere, the storage systems ETERNUS DX as well as SNMP-capable systems.

The openSM2 (Open Systems) package for the SE server offers, in conjunction with openSM2 (BS2000), a powerful solution to monitor all server units and application units in the SE server and the systems running on the server as well as the storage systems and SNMP capable devices in and connected to the SE server.

openSM2 has a web-based user interface, the openSM2 Manager.

## Features and Benefits

Together with openSM2 V21.0 (BS2000)

See the [Datasheet](#)

Main features	Benefits
<ul style="list-style-type: none"><li>• Simple installation and configuration</li><li>• Comfortable graphical user interfaces</li><li>• Central performance monitoring of heterogeneous IT infrastructures</li><li>• Uniform tool for various system types</li></ul>	<ul style="list-style-type: none"><li>• Ready to run</li><li>• Intuitive to use</li><li>• Efficient and transparent performance management</li><li>• Unified and graphically supported processing of all measurement data</li></ul>

### openSM2 Manager

The openSM2 Manager is the web-based user interface to monitor the performance of SE servers. The openSM2 Manager is available as add-on software in the SE Manager. It runs on the management unit and enables central monitoring of the systems in the SE server as well as additional systems outside the SE server insofar as this has been licensed and configured accordingly.

### Measurement data

openSM2 enters a large number of server and operating system measurement data for server systems.

openSM2 collects measurement data from the entire server and the individual virtual machines for the virtualized server systems.

openSM2 also collects measurement data from the groups for SNMP-capable systems

# Technical Details

## Requirements

<b>Technical Requirements Hardware</b>	Fujitsu Server BS2000
<b>Technical Requirements Software</b> openSM2 (BS2000)	See release notes OS DX V1.0 and OSD/XC V11.0
<b>User Requirements</b>	Knowledge of BS2000

## Installation

<b>User Interface</b>	German and English, others upon request
<b>Installation</b>	By the customer (see Release Notes)

## Documentation and Training

<b>Documentation</b>	See <a href="#">Manuals</a> openSM2 User Guide Help functions of the user interfaces
<b>Training</b>	See <a href="#">Courses</a> (German)

## Purchase and Delivery

<b>Conditions</b>	This software product is supplied to the customer under the conditions for the use of software products against a single payment or instalments.
<b>Order and Delivery</b>	The software product may be obtained from your local Fujitsu Technology Solutions GmbH regional office.

## Fujitsu Platform Solutions

In addition to Fujitsu Software BS2000, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions, and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
