Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. Fujitsu PRIMERGY servers deliver workload-optimized x86 industry standard systems for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers, versatile rack-mount servers, density-optimized multi-node servers as well as GPU servers purpose-built for the demands of AI and VDI. While all these systems are designed to handle multiple workloads, each server is optimized for specific use cases. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

PRIMERGY RX8770 M7
PRIMERGY RX8770 M7 is the new High-end of Fujitsu x86 PRIMERGY portfolio. A powerful 8-socket rack server, especially designed for back-end in memory application databases like SAP S/4HANA. To scale-up corporate workloads and high-performance database and In-memory database processing. The server constitutes a highly scalable, 4th generation Intel Xeon Scalable Family processor-based server that significantly extends the economic advantages of x86 industry standard scale-up solutions. It scales the usage patterns for in-memory solutions like SAP S/4HANA to highest performance levels, far beyond the 4-socket x86 server class. PRIMERGY RX8770 M7 provides extreme scalability as regards the 8-socket processing performance of the Platinum processor level 84xxH (480 cores), memory expandability with 128 DIMM slots (max. 32 TB DDR5 RDIMM) with up to 4800 MT/s, 24 x PCIe SSD storage devices. It scales up linearly with I/O, memory, and CPUs inside the 6U rack system unit without the need for infrastructure changes. Very large corporate databases and heavy load transactional processing applications, where response time and throughput is paramount, will benefit best from the platform’s efficient scalability and high I/O bandwidth. Likewise, corporate SAP S/4HANA, Decision Support services and Business Intelligence solutions, where performance for time-to-results constitutes the business-critical value, will profit from its enormous processing power. The PRIMERGY RX8770 M7 provides all the business-critical attributes for a constantly reliable IT operation at latest high-performance levels.
## Features & Benefits

<table>
<thead>
<tr>
<th>Main Features</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Octo-socket scale-up performance</td>
<td>The result is a high performing in-memory database server, that sets a new performance reach achievable with x86 rack server technology.</td>
</tr>
<tr>
<td>With PRIMERGY RX8770 M7, 4x Intel Ultra Path Interconnect (UPI) the highspeed link architecture is used to enable seamless 8-socket scalability using the 4th generation of Intel® Xeon® Platinum 84xx processor family with up to 60 cores per socket.</td>
<td>This comprehensive portfolio expansion will give you the opportunity to benefit from extreme scale-up performance and reliability of PRIMERGY industry standard servers in your datacenter backend for SAP S/4HANA in-memory databases.</td>
</tr>
<tr>
<td>New level of expansion options</td>
<td>Transition to SAP S/4HANA will find the perfect compute platform</td>
</tr>
<tr>
<td>Compared to predecessor generation Intel Xeon servers, the new PRIMERGY RX8770 M7 with Intel Xeon Platinum 84xx H processors scales up to 480 cores per server, combined with the massive memory capacity using up to 128 DIMM sockets with a maximum of 32 TB memory, the RX8770 M7 truly constitutes the high-end x86 performance class.</td>
<td>Demanding application like large in-memory databases will perform constantly on highest level due to easy internal expansion option to support all demands</td>
</tr>
<tr>
<td>Linear internal Scalability</td>
<td>The result is an IT business platform that provides unprecedented operational continuity and more value for money in the high-end server range.</td>
</tr>
<tr>
<td>RX8770 M7 provides linear scalability by simultaneously expanding I/O capacity, memory capacity and CPU performance. Not only will CPU performance convince, but in line with additional 16 DDR5 DIMM slots (8 channel with 2 slots each) per socket a total of 128 slots for 32 TB memory per system is possible. With 4x Intel UPI link technology, a fully populated 8 CPU system will provide highest performance and throughput.</td>
<td></td>
</tr>
<tr>
<td>Unleash extreme power and sustainability</td>
<td></td>
</tr>
<tr>
<td>The new PRIMERGY RX8770 M7 packs its scalability for 8 socket performance, 16 x PCIe slots, up to 128 memory slots on 8 CPU/ Memory boards, and 3+1 or 3+3 power supply redundancy features into a space saving 6U rack unit.</td>
<td></td>
</tr>
<tr>
<td>Integrated High Availability as Standard</td>
<td></td>
</tr>
<tr>
<td>4x Intel UPI links, DDR5 RDIMM support with 4800 MT/s, 10x hot-plug redundant fans, hot-plug power supplies (3+1 and 3+3 redundancy), up to 24 x 2.5 inch hot-plug SATA/ SAS /PCIe SSD storage devices and PCIe 5.0 slots enable reliable operation. Remote Management via iRMC S6 1024 MB attached memory incl graphics controller IPMI 2.0 compatible works with Fujitsu Integrated Management (ISM). New security features have been built in to the Intel Xeon scalable processor family to enable advanced actions for error circumvention, assisted by the enterprise x86 operating systems.</td>
<td></td>
</tr>
</tbody>
</table>

- **Intel® Xeon® Platinum 8490H** (60C, 1.9 GHz, TLC: 112.5 MB, Turbo: 2.90 GHz, 16 GT/s, 4,800MHz, 350 W)

**Processor notes**

- no mix of different processor types

**Memory notes**

- Max capacity maybe changed.

**USB 3.x ports**

- 2 USB 3.1 (2x rear)

**Graphics (15-pin)**

- 2 (1x rear display port), (1x front VGA)

**LAN / Ethernet**

- 2

**Management LAN (RJ45)**

- 1 x dedicated management LAN port for iRMC S6 (10/100/1000 Mbit/s)

**Interface notes**

- Management LAN traffic can be switched to shared onboard LAN controller port, speed and connector is related to installed interface card.

**Fast IDE/Ultra DMA-100**

- All hardware storage controller options are described under Components

**RAID controller**

- All hardware storage controller options are described under Components

**SATA Controller**

- Intel® C741, 2x SATA ports are used for M.2 modules

**LAN Controller**

- Intel® i210 onboard#10/100/1000 Mbit/s Ethernet

**Remote management controller**

- Integrated Remote Management Controller (iRMC S6, 1024 MB attached memory incl. graphics controller)

**Trusted Platform Module (TPM)**

- TPM 2.0 module
PCI-Express 5.0 x8
PCI-Express 5.0 x16
24 x Full height
Slot Notes
Twelve PCIe 5.0 x16 slots supported as default (An upgrade cable kit up to 24 PCIe 5.0 x16 slots.)

Drive bays (Base unit specific)
Storage drive bays
24 x 2.5-inch hot-plug SAS/SATA/PCIe
Number of fans
10
Fan configuration
hot-plug
Fan notes
N+1 redundant
Operating buttons
On/off switch
ID button
Status LEDs

19” rackmount
Yes
Weight
approx. 105 kg
Weight notes
Actual weight may vary depending on configuration

Environmental compliance
Operating ambient temperature
10 - 35 °C
Operating relative humidity
8 - 90 %
Temperature and humidity notes
There could be configurations that are not able to work within this normal operation class. Please use the Fujitsu WebArchitect (www.fujitsu.com/configurator/public) to get detailed information on the corresponding configurations
Operating environment
FTS 04230 – Guideline for Data Center (installation specification)
Operating environment link
Noise emission
Measured according to ISO 7779 and declared according to ISO 9296
Sound pressure (LpAm)
91.8 dB
Sound power (LWAd; 1B = 10dB)
9.3 B
Environmental (Base unit specific)

Operating ambient temperature | 5 - 45 °C
Power supply configuration | hot-plug PSU, min. 4 / max. 6x per system
Hot-plug power supply redundancy | Optional
Active power (max. configuration) | 8,298.2 W
Apparent power (max. configuration) | 8393 VA
Heat emission (max. configuration) | 29873.5 kJ/h (28314.6 BTU/h)
Rated current max. | 15-12.5A
Power supply | 2600W hot-plug, 96% (Titanium efficiency), 200-240V, 50/60Hz
Power supply notes | input nominal voltage (AC): 100V-240V, max: 90V-264V; input dropout 10ms/100% load, 47Hz-63Hz
Product | PRIMERGY RX8770 M7

- Fibre Channel Host Bus Adapter 2 x 32 Gbit/s Emulex LPE35002-M2-F MMF LC-style
- Fibre Channel Host Bus Adapter 1 x Qlogic QLE2870-FJ-BK MMF LC-style
- Fibre Channel Host Bus Adapter 2 x Qlogic QLE2872-FJ-BK MMF LC-style
- Fibre Channel Host Bus Adapter 1 x Emulex LPE36000-M64-F MMF LC-style
- Fibre Channel Host Bus Adapter 2 x Emulex LPE36000-M64-F MMF LC-style

### Notes

**Compatibility**

If and to the extent a list of components or certain compatibilities are specified in the product data sheet, these component lists and compatibility specifications are exhaustive. Using deviating or other system components and applications together with the product may but does not necessarily have to lead to compatibility problems. A final statement and/or commitment on the compatibility of such deviating or other system components and applications can only be provided after a corresponding verification through a dedicated compatibility testing.

**Continuity management**

The product may in connection with and depending on the specific configuration include elements to support time- and performance-critical applications, however high availability (e.g., 99.9999%) and failsafe performance is not a standalone product feature. If and to the extent the product is to be used in such business-critical environments, it is within the sole responsibility of the user to set up the specific additional technical features (e.g., Storage Cluster), redundancies, and operational conditions as required to ensure such high availability or failsafe performance.

**Security**

The properties of the product provide a baseline for product security and therefore end-customer IT security. However, these properties are not sufficient on their own to protect the product from all existing threats, such as intrusion attempts, data exfiltration and other forms of cyberattacks. To customize security settings, please use the configuration options as available for the respective product. During operation, the IT security of this product is within the responsibility of the respective administrator/end-user of the product. Please note, that Fujitsu as a manufacturer does not make any policy prescriptions or advocacy statements regarding IT security best practices and/or general product operation.

### Warranty

**Warranty period**

3 years

**Warranty type**

Onsite warranty

**Warranty Terms & Conditions**

**Recommended Service**

24x7 Onsite Service with 4h Onsite Response Time

**Service Lifecycle**

at least 5 years after shipment, for details see [https://support.ts.fujitsu.com/](https://support.ts.fujitsu.com/)

**Service Weblink**

More information

Fujitsu products, solutions & services
In addition to Fujitsu PRIMERGY RX8770 M7, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio
Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
