Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. Fujitsu Server PRIMERGY systems deliver workload-optimized x86 industry standard servers for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers for remote and branch offices, versatile rack-mount servers and density-optimized multi-node servers. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

PRIMERGY CX2560 M6

The Fujitsu Server PRIMERGY CX2560 M6 is a dual-socket x86 system designed for high performance with the latest generation of powerful processors, large memory capacity and scalable I/O resources in a small footprint. This combination made this server into an ideal all-rounder for virtualization and cloud scenarios. The multi-node system supports the 3rd Generation Intel® Xeon® Scalable Processors and delivers up to 24 cores per CPU and 3 UPI links the best performance for your workloads. To keep high-performance applications running smoothly, the CX 2560 M6 offers space for 24 DIMM modules with a bandwidth of up to 3200 MT/s. In combination with Intel® Optane™ persistent memory 200 series, capacity can increase up to 2 TB at lower prices than DRAM. The availability of larger persistent memory capacities allows larger amounts of data to remain closer to the CPU, which means faster processing and better insights. Get the storage flexibility and choose between 6xSAS/SATA/NVMe or 6xNVMe storage drives per node. The PRIMERGY CX2560 M6 supports the new PCIe 4th generation with 3 slots and also provide a TPM and dedicated RAID module slot. A DynamicLoM adapter based on the new OPC V3 technology is seamless integrated in the system and makes your business ready for future changes.

The PRIMERGY CX400 M6 enclosure, in which the CX2560 M6 node is used, allows the sharing of power and cooling to reduce costs. The CX400 M6 is a modular 2U shared infrastructure chassis for up to four nodes with all the traditional data center attributes such as standard 19” racks, cabling and rear-aisle serviceability access. It is the ideal solution which keeps pace with your growth and provides the flexibility to adapt to various virtualization and cloud scenarios.
Features & Benefits

<table>
<thead>
<tr>
<th>Main Features</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compact and modular foundation</td>
<td>With PRIMERGY CX400 M6 together with the CX2560 M6 node, you get much more server density in combination with high performance and best of data secure. It is the ideal solution for virtualization and cloud scenarios. In case the requirements change, it is possible to gradually add or remove server nodes as required by your business needs.</td>
</tr>
<tr>
<td>The PRIMERGY CX2560 M6 together with the PRIMERGY CX400 M6 chassis is Fujitsu’s densest computing solution. There is room for up to four 1U dual-socket server nodes plus up to 24 storage drives. The CX400 M6 allows nodes and components to share power, cooling and management. Hot-plug and redundant power supply units and fan modules ensure maximum reliability.</td>
<td>Ready for the future and data growth scenarios with the performance of up to two processors per node. Make the standard of tomorrow with an increase in computing power. With the new Intel® Xeon® processor generation, you get more performance on a small density.</td>
</tr>
<tr>
<td>High performance on a small footprint</td>
<td>With DDR4 and the Intel® Optane™ persistent memory the CX2560 M6 delivers a unique combination of affordable large capacity and high performance. It helps businesses drive innovation, process more data and make better decisions while lowering total cost and protecting data.</td>
</tr>
<tr>
<td>The PRIMERGY CX2560 M6 comes with latest 3rd Generation Intel® Xeon® processors that delivers high performance (up to 165W TDP), three UPI links per socket as well as a high core count of up to 24 cores per CPU.</td>
<td>Be ready for future changes and combine high-performance PCIeSSD with normal SATA/SAS drive or choose only the PCIeSSD for your IT environment. No matter what, you will not only reduce latency but also improve the data transfer speed of your IT infrastructure.</td>
</tr>
</tbody>
</table>

Increased power with lower consumption

- 24 memory slots in total supporting 6TB memory with DDR4 DIMM modules (@ 3,200 MT/s) or up to 12TB memory in combination with Intel® Optane™ persistent memory. Persistent memory improves workload performance and power efficiency while reducing data loss and downtime with enhanced error handling. The modules revolutionizes the data center memory-storage hierarchy of the past and bring massive data sets closer to the CPU for faster time to insight.

Easy Expandability

- Meet future demands and have the ability to scale easily your server system for your business needs. The PRIMERGY CX2560 M6 come with the base units of 6x2.5'' of SAS/SATA/NVMe or 6x2.5'' NVMe drives. In total, you have room for up to 24x storage drives in a CX400 M6 chassis with four CX2560 M6 nodes.

- Be ready for future changes and combine high-performance PCIeSSD with normal SATA/SAS drive or choose only the PCIeSSD for your IT environment. No matter what, you will not only reduce latency but also improve the data transfer speed of your IT infrastructure.

Operating panel

Status LEDs
- Power (DC-On: green / AC-On: white)
- System status (orange)
- LAN speed (green / yellow)
- LAN connection (green)
- Identification (blue)

BIOS

BIOS features
- UEFI compliant
- IPMI support
- BIOS settings save and restore
- Remote PXE boot support

Operating Systems and Virtualization Software

Operating system release link

Operating system notes
Use of certified or supported operating systems and virtualization software is subject to proactive acceptance of the respective License Agreements/ EULAs/ Subscription and support terms of the Software manufacturer as applicable for the relevant Software whether preinstalled or optional. The software may only be available bundled with a software support subscription which – depending on the Software - may be subject to separate remuneration.

Dimensions

Dimensions (W x D x H) 193.5 x 580.5 x 40 mm

Height Unit Rack 1 U

Weight 4.9 kg

Node size 1 U half wide

Environment

Operating ambient temperature 5 - 35 °C

Operating temperature note
PRIMERGY servers are designed for the usage with operating temperatures of up to 35°C. There could be configurations that are not able to work within this normal operation class. Please use the Fujitsu WebArchitect (www.fujitsu.com/configurator/public) to get detailed information on the corresponding configurations.

Operating relative humidity 10 - 85 % (non condensing)

Temperature and humidity notes
Air cooling can support up to 165W CPU

Maximum altitude 3,000 m

Operating environment

Compliance

Compliance link: https://sp.ts.fujitsu.com/sites/certificates

Compliance notes: There is general compliance with the safety requirements of all European countries and North America. National approvals required in order to satisfy statutory regulations or for other reasons can be applied for on request.

* Warning: This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Components

Notes

Compatibility: If and to the extent a list of components or certain compatibilities are specified in the product data sheet, these component lists and compatibility specifications are exhaustive. Using deviating or other system components and applications together with the product may but does not necessarily have to lead to compatibility problems. A final statement and/or commitment on the compatibility of such deviating or other system components and applications can only be provided after a corresponding verification through a dedicated compatibility testing.

Continuity management: The product may in connection with and depending on the specific configuration include elements to support time- and performance-critical applications, however high availability (e.g., 99.9999%) and failsafe performance is not a standalone product feature. If and to the extent the product is to be used in such business-critical environments, it is within the sole responsibility of the user to set up the specific additional technical features (e.g., Storage Cluster), redundancies, and operational conditions as required to ensure such high availability or failsafe performance.

Security: The properties of the product provide a baseline for product security and therefore end-customer IT security. However, these properties are not sufficient on their own to protect the product from all existing threats, such as intrusion attempts, data exfiltration and other forms of cyberattacks. To customize security settings, please use the configuration options as available for the respective product. During operation, the IT security of this product is within the responsibility of the respective administrator/end-user of the product. Please note, that Fujitsu as a manufacturer does not make any policy prescriptions or advocacy statements regarding IT security best practices and/or general product operation.

Warranty

Warranty period: 3 years

Warranty type: Onsite warranty

Recommended Service: 24x7, Onsite Response Time: 4h - For locations outside of EMEA please contact your local Fujitsu partner.

Service Lifecycle: at least 5 years after shipment, for details see https://support.ts.fujitsu.com/

Service Weblink: https://www.fujitsu.com/emeia/support/
More information

Fujitsu products, solutions & services
In addition to Fujitsu PRIMERGY CX2560 M6, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio
Build on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offering. This allows customers to leverage from alternative sourcing and delivery models to increase their business agility and to improve their IT operation’s reliability.
