Balanced efficiency and expandability for demanding cloud and virtualization scenarios

Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. Fujitsu Server PRIMERGY systems deliver workload-optimized x86 industry standard servers for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers for remote and branch offices, versatile rack-mount servers and density-optimized multi-node servers. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

PRIMERGY CX2560 M7
The PRIMERGY Server CX2560 M7 is a dual-socket x86 system designed for high performance with the latest generation of powerful processors, large memory capacity and scalable I/O resources in a small footprint. This combination made this server into an ideal all-rounder for virtualization and cloud scenarios. The multi-node system supports the 5th Generation Intel® Xeon® Scalable Processors and delivers up to 32 cores per CPU and 4UPI links the best performance for your workloads. To keep high-performance applications running smoothly, the CX2560 M7 offers space for 24 DIMM modules with a bandwidth of up to 4800 MT/s. Get the storage flexibility and choose between 6xSAS/SATA/NVMe or 6xNVMe storage drives per node. The PRIMERGY CX2560 M7 supports the new PCIe 5th generation with 3 slots and also provide a TPM and dedicated RAID module slot. A DynamicLoM adapter based on the new OPC V3 technology is seamless integrated in the system and makes your business ready for future changes.

The PRIMERGY CX400 M7 enclosure, in which the CX2560 M7 node is used, allows the sharing of power and cooling to reduce costs. The CX400 M7 is a modular 2U shared infrastructure chassis for up to four nodes with all the traditional data center attributes such as standard 19" racks, cabling and rear-aisle serviceability access. It is the ideal solution which keeps pace with your growth and provides the flexibility to adapt to various virtualization and cloud scenarios.
## Features & Benefits

<tbody>
<tr>
<td>Compact and modular foundation</td>
<td>With PRIMERGY CX400 M7 together with the CX2560 M7 node, you get much more server density in combination with high performance and best of data secure. It is the ideal solution for virtualization and cloud scenarios. In case the requirements change, it is possible to gradually add or remove server nodes as required by your business needs.</td>
</tr>
<tr>
<td>The PRIMERGY CX2560 M7 together with the PRIMERGY CX400 M7 chassis is Fujitsu’s densest computing solution. There is room for up to four 1U dual-socket server nodes plus up to 24 storage drives. The CX400 M7 allows nodes and components to share power, cooling and management. Hot-plug and redundant power supply units and fan modules ensure maximum reliability.</td>
<td>Ready for the future and data growth scenarios with the performance of up to two processors per node. Make the standard of tomorrow with an increase in computing power. With the new Intel® Xeon® processor generation, you get more performance on a small density.</td>
</tr>
<tr>
<td>High performance on a small footprint</td>
<td>With DDR5 memory the CX2560 M7 delivers a unique combination of affordable large capacity and high performance. It helps businesses drive innovation, process more data and make better decisions while lowering total cost and protecting data.</td>
</tr>
<tr>
<td>The PRIMERGY CX2560 M7 comes with latest 5th Generation Intel® Xeon® processors that delivers high performance (up to 270W TDP), three UPI links per socket as well as a high core count of up to 32 cores per CPU.</td>
<td>Be ready for future changes and combine high-performance PCIeSSD with normal SATA/SAS drive or choose only the PCIeSSD for your IT environment. No matter what, you will not only reduce latency but also improve the data transfer speed of your IT infrastructure.</td>
</tr>
<tr>
<td>Increased power with lower consumption</td>
<td></td>
</tr>
<tr>
<td>24 memory slots in total supporting 6TB memory with DDR5 DIMM modules (@ 4,800 MT/s) . Persistent memory improves workload performance and power efficiency while reducing data loss and downtime with enhanced error handling. The modules revolutionizes the data center memory-storage hierarchy of the past and bring massive data sets closer to the CPU for faster time to insight.</td>
<td></td>
</tr>
<tr>
<td>Easy Expandability</td>
<td></td>
</tr>
<tr>
<td>Meet future demands and have the ability to scale easily your server system for your business needs. The PRIMERGY CX2560 M7 come with the base units of 6x2.5” of SAS/SATA/NVMe or 6x2.5” NVMe drives. In total, you have room for up to 24x storage drives in a CX400 M7 chassis with four CX2560 M7 nodes.</td>

- InfiniBand HCA 1 x 200Gb/s PCIe x16 QSFP for the US market max. one IB HCA 200Gb controller can be installed (Mellanox)

### Notes
#### Compatibility
If and to the extent a list of components or certain compatibilities are specified in the product data sheet, these component lists and compatibility specifications are exhaustive. Using deviating or other system components and applications together with the product may but does not necessarily have to lead to compatibility problems. A final statement and/or commitment on the compatibility of such deviating or other system components and applications can only be provided after a corresponding verification through a dedicated compatibility testing.

#### Continuity management
The product may in connection with and depending on the specific configuration include elements to support time- and performance-critical applications, however high availability (e.g., 99.9999%) and failsafe performance is not a standalone product feature. If and to the extent the product is to be used in such business-critical environments, it is within the sole responsibility of the user to set up the specific additional technical features (e.g., Storage Cluster), redundancies, and operational conditions as required to ensure such high availability or failsafe performance.

#### Security
The properties of the product provide a baseline for product security and therefore end-customer IT security. However, these properties are not sufficient on their own to protect the product from all existing threats, such as intrusion attempts, data exfiltration and other forms of cyberattacks. To customize security settings, please use the configuration options as available for the respective product. During operation, the IT security of this product is within the responsibility of the respective administrator/end-user of the product. Please note, that Fsas Technologies Inc. as a manufacturer does not make any policy prescriptions or advocacy statements regarding IT security best practices and/or general product operation.

### Warranty
- **Manufacturer warranty period**: 3 years
- **Warranty type**: Onsite warranty
- **Recommended Service**: 24x7, Onsite Response Time: 4h - For locations outside of EMEA please contact your local Fujitsu partner.
- **Service Lifecycle**: at least 5 years after shipment, for details see https://support.ts.fujitsu.com/
