Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. Fujitsu Server PRIMERGY systems deliver workload-optimized x86 industry standard servers for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers for remote and branch offices, versatile rack-mount servers and density-optimized multi-node servers. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

PRIMERGY CX400 M7
The Fujitsu PRIMERGY Server CX400 M7 offers a great mix of flexibility, high capacity, and top-notch performance for rapidly changing IT requirements. The modular 2U chassis provides space for up to four compact nodes that can be added or removed depending on business needs. The four server nodes are equipped with the 4th Generation Intel® Xeon® Scalable processors and offer the optimal performance for virtualization and cloud scenarios. The enclosure allows nodes and components to share power, cooling, and management. It houses hot-plug and redundant power supply units and supports hot-plug and redundant fan modules. There is room for up to 24x2.5” SAS/SATA/NVME storage devices and provides the flexibility to scale as the business grows. The PRIMERGY CX server nodes provide the power for infrastructure virtualization, high performance and technical computing, web services, cloud computing while also serving as a foundation for hyper-converged infrastructures. With workloads and administrative tasks becoming increasingly complex, the Infrastructure Manager (ISM) and the Remote Management Controller (iRMC S6) help to manage a variety of hardware resources in data centers and converged infrastructures so you can focus on your business needs and objectives. In addition to some new software and hardware features, the server also offers an optionally lockable front bezel to avoid unauthorized physical access directly in the data center.
Features & Benefits

<table>
<thead>
<tr>
<th>Main Features</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compact and modular foundation</td>
<td>With the PRIMERGY CX400 M7 multi-node server, you get much more server density compared to the standard rack servers. This makes it ideal for service providers - e.g. for the automotive industry to model new designs, for state and local authorities to provide citizen services or for a retailer to analyze consumer trends. In case the requirements change, the CX400 M7 makes it possible to gradually add or remove server nodes as required by your business needs.</td>
</tr>
</tbody>
</table>

Superior performance in a dense form factor | The PRIMERGY CX400 M7 is a scalable IT infrastructure enabling flexible and fast response to rapidly changing IT demands. It provides an ideal platform for scale-out workloads such as virtualization, all kinds of enterprise applications, high performance computing, deep learning or data analytics. With the new generation of Intel® Xeon® Processors you get the best out of your PRIMERGY CX400 M7 server. |

Easy scalability for rapidly changing workloads | Be ready for future changes and combine high-performance PCIeSSD with normal SATA/SAS drive or choose only the PCIeSSD for your IT environment. With the flexibility of the CX400 M7, you can easily scale your server environment to meet your business needs and requirements. No matter what, you will not only reduce latency but also improve the data transfer speed of your IT infrastructure. |

Revolutionize data center management | Fujitsu offers comprehensive infrastructure management and server management solutions, which is key to efficient data center operations. They provide all the functions for flexible and automated 24x7 IT operations and improve end-user productivity via intelligent and innovative system management solutions. Fujitsu Software Infrastructure Manager enables organizations to drive towards the path of achieving software-defined infrastructure, by automating and simplifying infrastructure operations across compute, storage, and networking. |
## Technical details

### PRIMERGY CX400 M7

</tr>
<tr>
<td>Memory capacity (min. - max.)</td>
<td>12 TB</td>
</tr>
</tbody>
</table>

### Interfaces

- **Storage drive bays**: 24x 2.5" drive or HDD less configuration x 2.5-inch hot-plug

### Fan configuration

- **Fan configuration**: 10x hot-plug and redundant fans modules with 9+1 redundancy
- **Fan notes**: System operation also in degraded mode
- **Number of fans**: 10
- **Fan configuration**: 9+1 Redundancy and Hotplug
- **Fan notes**: Hotplug operation requires cable arm option

### Operating panel

- **Operating buttons**: On/off switch, ID button
- **Status LEDs**: Power (DC-On: green / AC-On: white), Identification (blue), CSS Indicator, Global Error Indicator

### General system information

- **Operating system release link**: Use of certified or supported operating systems and virtualization software is subject to proactive acceptance of the respective License Agreements/EULAs/Subscription and support terms of the Software manufacturer as applicable for the relevant Software whether preinstalled or optional. The software may only be available bundled with a software support subscription which – depending on the Software - may be subject to separate remuneration.

### DC Infrastructure Management

- **Infrastructure Manager (ISM)**: Essential Edition, Advanced Edition

### Server Management

- **Infrastructure Manager (ISM)**: Essential Edition, Advanced Edition
- **ServerView Suite**: ServerView Suite

### Manageability link

- **http://docs.ts.fujitsu.com/dl.aspx?id=9e92297a-16fb-4c69-8559-e38e7b42fee6**

### Dimensions / Weight

- **Rack (W x D x H)**: 480 mm (w/ bezel) / 443.5 mm (body) x 860 x 86.5 mm
- **Mounting Depth Rack**: 812.8 mm
### Dimensions / Weight

### Environment

**Operating temperature note**
PRIMERGY servers are designed for the usage with operating temperatures of up to 35°C. There could be configurations that are not able to work within this normal operation class. Please use the Fujitsu WebArchitect (www.fujitsu.com/configurator/public) to get detailed information on the corresponding configurations.

**Operating relative humidity**
10 - 85 % (non condensing)

**Maximum altitude**
3000 m

**Operating environment**
FTS 04230 – Guideline for Data Center (installation specification)

**Operating environment link**

**Noise emission**
According to ISO9296

**Sound power (LWAd; 1B = 10dB)**
7.6B (idle) / 7.9B (operating)

**Sound power (LWAd; 1B = 10dB)**
7.4B (idle) / 8.1B (operating)

### Electrical values

**Max. input of single power supply**
2,600 W (96% efficiency)

**Power supply configuration note**
2x PSU in 1+1 redundancy configuration. In case of one PSU fail, system might throttle to keep system running, depends on HW configuration.

**Power supply efficiency**
96 % (80 PLUS titanium)

**Rated voltage range**
100 V - 240 V

**Rated frequency range**
47 Hz - 63 Hz

**Rated current max.**
30 A with two PSU (15A per PSU)

**Electrical value notes**
Active power max. value depends on system configuration. For details see System Architect.

### Compliance

**Product**
PRIMERGY CX400 M7

**Model**
CX400D

**Global**
RoHS (Substance limitations in accordance with global RoHS regulations)
WEEE (Waste electrical and electronical equipment)

**Europe**
CE

**USA/Canada**
cTUVus
ICES-003 Class A
FCC Class A

**Japan**
VCCI Class A

**South Korea**
KN32
KN35

**Australia/New Zealand**
AS/NZS CISPR32 Class A

**Taiwan**
CNS 13438 class A

**Compliance link**
https://sp.ts.fujitsu.com/sites/certificates

**Compliance notes**
There is general compliance with the safety requirements of all European countries and North America. National approvals required in order to satisfy statutory regulations or for other reasons can be applied for on request.
Components

Rack infrastructure
Cable Management 2U for PRIMECENTER- and 3rd-party racks

Notes

Compatibility
If and to the extent a list of components or certain compatibilities are specified in the product data sheet, these component lists and compatibility specifications are exhaustive. Using deviating or other system components and applications together with the product may but does not necessarily have to lead to compatibility problems. A final statement and/or commitment on the compatibility of such deviating or other system components and applications can only be provided after a corresponding verification through a dedicated compatibility testing.

Continuity management
The product may in connection with and depending on the specific configuration include elements to support time- and performance-critical applications, however high availability (e.g., 99.9999%) and failsafe performance is not a standalone product feature. If and to the extent the product is to be used in such business-critical environments, it is within the sole responsibility of the user to set up the specific additional technical features (e.g., Storage Cluster), redundancies, and operational conditions as required to ensure such high availability or failsafe performance.

Security
The properties of the product provide a baseline for product security and therefore end-customer IT security. However, these properties are not sufficient on their own to protect the product from all existing threats, such as intrusion attempts, data exfiltration and other forms of cyberattacks. To customize security settings, please use the configuration options as available for the respective product. During operation, the IT security of this product is within the responsibility of the respective administrator/end-user of the product. Please note, that Fujitsu as a manufacturer does not make any policy prescriptions or advocacy statements regarding IT security best practices and/or general product operation.

Warranty

Warranty period
3 years

Warranty type
Onsite warranty

Recommended Service
24x7, Onsite Response Time: 4h - For locations outside of EMEA please contact your local Fujitsu partner.

Fujitsu products, solutions & services
In addition to Fujitsu PRIMERGY CX400 M7, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio
Build on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offering. This allows customers to leverage from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
