Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. Fujitsu Server PRIMERGY systems deliver workload-optimized x86 industry standard servers for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers for remote and branch offices, versatile rack-mount servers, density-optimized multi-node servers as well as GPU accelerated servers optimized for AI. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

PRIMERGY GX2570 M6
The Fujitsu Server PRIMERGY GX2570 M6 is an advanced dual socket rack server enhanced with the latest technology high-density GPU configurations to accelerate Artificial Intelligence (AI), Data Science and High Performance Computing (HPC) workloads to extract breakthrough insights from data. This powerful system comes with a high density, next generation 8x NVIDIA A100 SXM4 GPU (80GB) configuration along with up to 2x 3rd Generation Intel® Xeon® Processor Scalable Family CPUs and up to 2TB (32 DIMM) latest generation DDR4 technology plus NVIDIA certified. Designed for delivering high-grade GPU acceleration, the server is meant for demanding use-cases such as Deep Learning (AI) and Data Science deployments, plus other demanding workloads such as HPC. The server is also well-balanced by design, and fields up to 10x storage devices (four can be high-speed NVMe), and up to 10x PCIe Gen4 expansion slots (8x can be assigned for NIC cards for high speed direct access to the GPU). Energy efficient 3000W Platinum power supplies (2+2 redundant) provide ample power to run the high-grade workloads. Furthermore, the server supports Fujitsu ISM, to enhance admin productivity and ease server usage across the entire lifecycle.
# Features & Benefits

<tbody>
<tr>
<td>Top of the line performance for heavy-duty AI, Data Science and HPC workloads</td>
<td>True no-compromise technology with 3rd Generation Intel® Xeon® Scalable Processors, high performance DDR4 memory, NVIDIA A100 80GB GPUs with high-speed interconnects. These servers perform far better across heavy-duty Deep Learning (AI), Data Science and HPC workloads, than regular units. NVIDIA certified testing ensure server is already checked out for multiple use-cases.</td>
</tr>
<tr>
<td>8x NVIDIA A100 SXMs GPUs (HGX platform) plus 2x 3rd Generation Intel® Xeon® Scalable Processors with up to 2TB memory (32 DIMM slots).</td>
<td>Drive options include high-speed NVMe, storage and networking controllers, so that the server can be tailored to specific business needs. Versatile PCIe slots allow efficient server upgrade. While essential I/O requirements are also met with dedicated I/O ports.</td>
</tr>
<tr>
<td>Broad range of flexible hardware configuration options</td>
<td>High efficiency power supplies save costs over the server lifecycle, while the provision for N+1 redundancy (in this case 2+2) allows a standby PSU to replace a PSU which has failed, ensuring the server continues working without loss of valuable data or hardware damage, protecting your investment.</td>
</tr>
<tr>
<td>Up to 6x high speed SAS/SATA/NVMe drives (front) plus 4 optional NVMe (rear), 10x PCIe Gen4 slots (8x PCIe can field NICs for high speed direct access to 8x GPUs), support for advanced RAID cards, 1x OCP LAN. Additional I/O ports include 2x USB 3.0, 1x VGA. Investment and lifecycle cost protection</td>
<td>Administrator confidence as Fujitsu pretests software and hardware. ISM functions include server status and event monitoring, update, inventory and archive management, logging and auditing, floor layout and rack-view, all via an easy to use UI, for easy server administration.</td>
</tr>
<tr>
<td>Easy to deploy, use and maintain</td>
<td></td>
</tr>
<tr>
<td>Pre-tested qualified OS support by Fujitsu apart from NVIDIA certifications, support for essential FUJITSU ISM functions.</td>
