

Data Sheet

FUJITSU PRIMERGY NVIDIA® Tesla™ M60 Card

Graphics-accelerated virtual desktops and applications

By using NVIDIA GRID™ technology, businesses are able to realize the benefits of virtualization - security, manageability and flexibility - while delivering the full PC experience that users expect.

The NVIDIA® GRID™ technology offers the ability to offload graphics processing from the CPU to the GPU in virtualized environments. The NVIDIA® GRID™ card allows hardware virtualization of the GPU, this means multiple users can share a single GPU, improving user density while providing true PC performance and compatibility.

PRIMERGY NVIDIA® Tesla™ M60 Card

The NVIDIA Tesla M60 is a dual-slot PCIe Gen3 graphics card with two high-end NVIDIA Maxwell™ graphics processing units. It has 16GB of GDDR5 memory (8GB per GPU), and a 300W max. power consumption. It is designed for desktop graphics and Virtual Desktop Infrastructures (VDI) for up to 16 concurrent users.

NVIDIA GRID™ Software License

It is necessary to purchase NVIDIA GRID™ Software from Authorized NVIDIA Partners for NVIDIA GRID Software License. Please contact the Authorized NVIDIA Partners. Fujitsu is also an authorized NVIDIA Partner. We can offer NVIDIA GRID Software to customers. Four different GRID software editions are available to meet any demand:

NVIDIA GRID Virtual Applications edition:

- For organizations deploying XenApp or other RDSH solutions. Designed to deliver PC Windows applications at full performance

NVIDIA GRID Virtual PC edition:

- A great user experience leveraging PC applications, browsers, and high-definition
- Compatible with Windows

NVIDIA Quadro Virtual Datacenter Workstation edition:

- Ultimate performance for engineers and designers
- Compatible with Linux, Windows and CUDA

NVIDIA GRID Education edition:

- Same functions with "NVIDIA Quadro Virtual Datacenter Workstation edition"
- This edition is for educational institutions. There is an applicable condition.

Main Features	Benefits
<ul style="list-style-type: none"> ■ 2 high end Maxwell graphic processors and 16 GB GDDR5 memory ■ 4096 NVIDIA CUDA® cores ■ 36 x H.264 1080p30 stream 	<ul style="list-style-type: none"> ■ Improve the productivity of all users and the access from anywhere on any device ■ Add your most graphics-intensive users to your virtual solutions ■ Advanced Video Coding

Technical details

Technical details

Card category	Remote Graphics
Graphics memory size	16 GB GDDR5 with ECC
Slot	PCIe 3.0 x16
Formfactor	Full height (double slot density)
Card notes	2x Maxwell GPU
Max. number per system unit	2x in PRIMERGY RX2540 M4 2x in PRIMERGY CX2570 M4 2x in PRIMERGY RX2540 M5
Operating system pre-installed	Information to released operating systems can be found in the server datasheets. Details can be found in the released drivers list on the support portal.
Graphics card notes	GPU pass through and vGPU; vDGA / vGPU and vSGA

Order code	Brand name	Graphics cores	Graphics memory size
S26361-F2222-E964	NVIDIA® Tesla® M60	4096 cores	16 GB GDDR5 with ECC

Environment

Power consumption	300 W @ full performance

More information

Fujitsu products, solutions & services

In addition to Fujitsu with PRIMERGY NVIDIA® Tesla™ M60 Card, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio

Build on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offering. This allows customers to leverage from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
