Maximum productivity in a 1U housing

PRIMERGY RX2530 M5
The Fujitsu Server PRIMERGY RX2530 M5 is a rack server that provides high performance, expandability and energy efficiency in a 1U space-saving housing. The PRIMERGY RX2530 M5 is ideal for virtualization, scale-out scenarios, and small databases as well as for high performance computing thanks to the high performance of the Intel® Xeon® Processor Scalable Family CPUs with up to 28 cores and the latest DDR4 memory technology. The system can also be equipped with the new 2nd generation processors of the Intel® Xeon® Scalable Family (CLX-R) delivering industry-leading frequencies. Moreover, the RX2530 M5 delivers a great expandability by supporting up to 3,072 GB of main memory and the capability to use up to 12x Intel® Optane™ DC Persistent Memory NV-DIMM modules. It is future-proof with M.2 device support and the latest iRMC S5 for server management of the next generation. Up to 10 hard disk drives or optionally high-speed PCIe SSDs offer a flexible storage configuration option. A variety of onboard DynamicLoM options, plus its dual-port embedded LAN meet future requirements, cost-optimized. The limited space of a 1U chassis offers highly efficient power supply units and their redundancy on demand. The optional Cool-safe® Advanced Thermal Design this will result in lower operational costs.
