Fujitsu PRIMERGY RX2540 M4 Server

The data center standard without compromise

PRIMERGY RX2540 M4

The FUJITSU Server PRIMERGY RX2540 M4 sets higher standards for usability, scalability and cost-efficiency. It is a 2U dual-socket rack server ideal for running enterprise applications, collaboration and messaging workloads as well as traditional databases. Plus, it substantially simplifies carrying out infrastructure-related tasks like server virtualization and consolidation. As one of the key innovations, versatile performance is guaranteed by a new generation of processors. The PRIMERGY RX2540 M4 can be equipped with two of the latest Intel® Xeon® Processor Scalable Family CPUs with up to 28 cores each. Along with DDR4 memory technology with up to 3TB it boosts application performance to be able to cope with the increasing data growth and shortens time to business results. The modular design of the server offers excellent expandability with up to 28 disk drives, high storage density, up to 8 PCIe Gen 3 I/O expansion slots. A variety of onboard DynamicLoM options, plus its dual-port embedded LAN meet future requirements, cost-optimized. The PRIMERGY RX2540 M4 comes with two redundant hot-plug power supply units, offering up to 96% energy efficiency. The Cool-safe® Advanced Thermal Design allows for operation in ambient temperatures of up to 45 °C/104 °F. Both these features in line help to reduce operational expenses.
