Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. Fujitsu PRIMERGY servers deliver workload-optimized x86 industry standard systems for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers, versatile rack-mount servers, density-optimized multi-node servers as well as GPU servers purpose-built for the demands of AI and VDI. While all these systems are designed to handle multiple workloads, each server is optimized for specific use cases. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

**PRIMERGY RX4770 M5**

The Fujitsu PRIMERGY Server RX4770 M5 is an industry-standard x86 server system with four sockets, providing superior levels of performance, scalability and efficiency. This combination turns the server into an ideal platform for running databases and transactional applications, business intelligence (BI) workloads, back-end and in-memory databases as well as other compute-intensive applications. In addition, it substantially simplifies carrying out DC server optimization such as server virtualization or consolidation. Featuring the latest Intel® Xeon® Scalable Family processors with each up to 28 cores pushes this server to a whole new level of compute performance to deliver more efficient business results. Thanks to the highly performant and superfast DDR4 memory technology with up to 6TB memory capacity and optionally up to 24x Intel® Optane™ DC Persistent Memory NV-DIMM modules along with excellent support for NVMe Flash drives, the system can handle complex, data-intensive workloads such as in-memory databases like SAP HANA® and real-time business analytics even easier than the previous generation. The PRIMERGY RX4770 M5 supports 12 Gbit/s SAS/SATA controllers with optional FBU. It can either come as a 16x 2.5-inch hot-plug storage drives holding base unit or in a base unit holding a total of 12x storage drives even for directly connected PCIe SSDs. Up to eight PCI-Express Gen3 slots increases bandwidth and provides sufficient expandability for faster insights. With built-in redundancy and hot-pluggable components as well as advanced business-critical RAS features such as Resilient System- and Memory Technologies, the RX4770 M5 provides higher availability and uptime. Virtualization and consolidation of IT resources offer many benefits but can often lead to increased expenses for server administration. Therefore the PRIMERGY RX4770 M5 delivers state-of-the-art management capabilities with the latest generation integrated Remote Management Controller (iRMC S5) offering a variety of user-friendly functions to ensure a faster and more cost-effective infrastructure management, no matter whether the server is located in the server-room next door or in another part of the world.
## Features & Benefits

### Main Features

<table>
<thead>
<tr>
<th>Features</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>INNOVATION MEETS PERFORMANCE</strong></td>
<td>Ready for the future and data growth scenarios with the performance of two processors – marking the standard of tomorrow with an increase in computing power. New SKUs of the 2nd generation Intel® Xeon® Scalable processors deliver additional customer value with increased performance and industry leading frequency for the most demanding workloads.</td>
</tr>
<tr>
<td>Wide choice of different types of Intel® Xeon® Scalable processors as well as new 2nd generation Intel® Xeon® Scalable processors. Each processor offers up to 28 cores, up to 56 threads, 12 memory channels enabling a significantly higher performance and efficiency. They rely on Intel® UltraPath Interconnect for an increased data rate between the CPUs. Intel® Optane™ DC persistent memory is an innovative memory technology that delivers a unique combination of affordable large capacity and persistence (non-volatility). It revolutionizes the data center memory-storage hierarchy of the past and brings massive data sets closer to the CPU for faster time to insight. In total, up to 15,360 GB main memory in a mixed mode (non-volatile memory + DDR4 @ 2,933 MT/s) are available.</td>
<td></td>
</tr>
<tr>
<td><strong>ENHANCED FEATURES FOR ENHANCED COMPUTING</strong></td>
<td>Business-critical RAS features lower the risk for unplanned IT downtimes. The systems' enhanced set of features adds even more reliability, availability, and serviceability that customers need to run business-critical applications.</td>
</tr>
<tr>
<td>Extended RAS-features for fail-safe operation: Built-in redundancy and hot-pluggable components, Advanced ECC, Memory Scrubbing and SDDC. A storage drive bay configuration with up to 16x 2.5-inch or up to 12x PCIe 2.5-inch SSD SFF*, complemented by internal M.2 devices for hypervisor installations. Our power supply units with up to 96% energy efficiency and Fujitsu's Cool-safe® Advanced Thermal Design for higher ambient temperatures in the data center are available for this server.</td>
<td></td>
</tr>
<tr>
<td><strong>REVOLUTIONIZING MEMORY AND STORAGE</strong></td>
<td>Optimize, store, and move larger, more complicated data sets with Intel® Optane™ technology. This revolutionary innovation bridges critical gaps in the storage and memory hierarchy delivering persistent memory, large memory pools, fast caching and fast storage.</td>
</tr>
<tr>
<td>Intel® Optane™ persistent memory modules are DDR4 socket compatible and can co-exist with conventional DDR4 DRAM DIMMs on the same platform. They are available in capacities of 128 GB, 256 GB and 512 GB.</td>
<td></td>
</tr>
<tr>
<td><strong>INFRASTRUCTURE MANAGEMENT</strong></td>
<td>Converged data center management that provides organizations centralized control over the entire infrastructure that includes servers, storage, networking, cloud management software as well as power and cooling using a single user interface.</td>
</tr>
<tr>
<td>ISM is available with two licensing options: (1) ISM Advanced is the fully featured licensed version of ISM that provides comprehensive infrastructure management capabilities across datacenter. (2) ISM Essential provides a quick start to infrastructure management with essential monitoring and update functions.</td>
<td></td>
</tr>
<tr>
<td><strong>PROTECT YOUR COMPANY WITH SECURE SERVERS</strong></td>
<td>PRIMERGY servers come with a wide variety of such robust security features and combine these capabilities with the best quality and efficiency, and more agility in daily operations helps to turn IT into a business advantage faster.</td>
</tr>
<tr>
<td>PRIMERGY servers are equipped with beneficial features to protect against, detect and recover from security breaches (UEFI Secure Boot, TPM 2.0, signed firmware updates, agent-free device management, secure authorization and authentication, alerting and logging, secure Out of Band Management with iRMC S5, …).</td>
<td></td>
</tr>

### Mainboard

- **Mainboard type**: D3753
- **Chipset**: Intel® C624
- **Processor quantity and type**: 2 or 4 x Intel® Xeon® Gold 5xxx processor / Intel® Xeon® Gold 6xxx processor / Intel® Xeon® Platinum 8xxx processor
- **Mainboard type**: 2 or 4
- **Processor notes**: A minimum of 2 processors must be configured, no mix of different processor types
- **Memory slots**: 48 (12 DIMMs per CPU, 6 channels with 2 slots per channel)
- **Memory slot type**: DIMM (DDR4 / DDR-T for non-volatile memory modules)
- **Memory capacity (min. - max.)**: 16 GB - 15 TB
- **Memory protection**: Advanced ECC, Memory Scrubbing, SDDC, Memory Mirroring support, Rank sparing memory support
- **Memory notes**: Max. 6 slots populated with DCPMM modules per CPU, please see relevant system configurator for details. Memory Mirroring Mode with identical modules in both channel pairs of a bank (4 or 6 modules per bank) per CPU. Rank Sparing Mode with minimum of 2 modules single ranked (1R) or dual ranked (2R) or 1 module quad ranked (4R) per CPU.

### Interfaces

- **USB 3.x ports**: 5 x USB 3.0 (2x front, 2x rear, 1x internal)
- **Graphics (15-pin)**: 2 x VGA (1 x front, 1 x rear)
- **Serial 1 (9-pin)**: 1 x RS-232-C
- **Management LAN (RJ45)**: 1 x dedicated management LAN port for iRMC S5 (10/100/1000 Mbit/s)
  - Management LAN traffic can be switched to shared onboard LAN controller port, speed and connector is related to installed interface card.

### Onboard or integrated Controller

- **RAID controller**: All hardware storage controller options are described under Components
- **SATA Controller**: Intel® C624, 1 x SATA channel for ODD
- **LAN Controller**: DynamicLoM based on Intel® C624 (Intel® X722)
  - Optional DynamicLoM OCP adaptors:
    - 2 x 10 Gbit/s Ethernet (RJ45)
    - 2 x 10 Gbit/s SFP+
    - 4 x 1 Gbit/s Ethernet (RJ45)
    - 4 x 10 Gbit/s SFP+
  - All supported features are described in relevant system configurator.
  - Wake-on-LAN supported on onboard Port 1.
  - Extra LAN controller (PCIe Cards) are listed below. (210 LAN card via project release possible)
- **Remote management controller**: Integrated Remote Management Controller (iRMC S5, 512 MB attached memory incl. graphics controller)
- **IPMI 2.0 compatible**: IPMI 2.0
- **Trusted Platform Module (TPM)**: Infineon / TPM 1.2 or TPM 2.0 module; TCG compliant (option)

### Slots

- **PCI-Express 3.0 x16**: 8 x whereas 4x full height and 4x low profile with up to 167mm length
## Slots

**Slot Notes**

Important note: 4 PCIe slots are supported with the first and second processor. Additional 4 PCIe slots are supported with the third and forth processors.

- Slot 1&2: PCIe Gen3 x16 @CPU1 for low profile cards with up to 167mm length
- Slot 3&4: PCIe Gen3 x16 @CPU4 for full height cards with up to 167mm length
- Slot 5: PCIe Gen3 x16 @CPU2 for low profile cards with up to 167mm length
- Slot 6&7: PCIe Gen3 x16 @CPU3 for full height cards with up to 167mm length
- Slot 8: PCIe Gen3 x16 @CPU2 for low profile cards with up to 167mm length (used for the internal modular RAID controller if selected)

**PCI-Express 3.0 x4**

- PCI-Express 3.0 x16
  - 8 x
  - 6 x PCIe slot 1 & 2 not available; reserved for additional air cooling

### Drive bays

**Storage drive bays**: 2.5-inch hot-plug SAS/SATA/PCIe

- 2 x M.2 slot whereas slot 1 supports 80mm or 110mm and slot 2 supports 42mm or 80mm

**Notes accessible drives**: All possible options described in relevant system configurator.

**Optional accessible drives**: 1 x 5.25/9.5mm for DVD-RW/Blu-ray

### Drive bays (Base unit specific)

**Storage drive bays**: 16 x 2.5-inch hot-plug SAS/SATA/PCIe

**General system information**

- **Number of fans**: 12
- **Fan configuration**: hot-plug
- **Fan notes**: 11+1 redundant

### Operating panel

**Operating buttons**

- On/off switch
- NMI button
- Reset button
- ID button

**Status LEDs**

- System status (green)
- Global error (orange)
- Identification (blue)
- Hard disks access (green)
- Power (green)
- CSS (orange)
- At system rear side:
  - System status (green)
  - CSS (orange)
  - Identification (blue)
  - Global error (orange)
  - LAN connection (green)
  - LAN speed (green / yellow)

### BIOS

**BIOS features**

- UEFI compliant
- Legacy BIOS compatibility customer configuration option
- Secure boot support
- ROM based setup utility
- GPT support for boot drives larger than 2.2 TB
- Memory Redundancy support (Mirroring, Sparing)
- IPMI support
- Recovery BIOS
- BIOS settings save and restore
- Local BIOS update from USB device
- Online update tools for main Linux versions
- Local and remote update via ServerView Update Manager
- IPv4/IPv6 remote PXE & iSCSI boot support
- Cryptographically Signed BIOS Firmware Update
- HTTP and HTTPS Boot
- PCIe Bifurcation configurable
Operating Systems and Virtualization Software

Operating system release link  http://docs.ts.fujitsu.com/dl.aspx?id=d4ebd846-aa0c-478b-8f58-4c7bf3230473

Operating system notes  Support of other Linux derivatives on demand

Use of certified or supported operating systems and virtualization software is subject to proactive acceptance of the respective License Agreements/ EULAs/ Subscription and support terms of the Software manufacturer as applicable for the relevant Software whether preinstalled or optional. The software may only be available bundled with a software support subscription which – depending on the Software - may be subject to separate remuneration.

Infrastructure and Server Management

DC Infrastructure Management

- Infrastructure Manager (ISM)
  - Essential Edition
  - Advanced Edition

Server Management

- Infrastructure Manager (ISM)
  - Essential Edition
  - Advanced Edition
- ServerView Suite

Management notes  For further information regarding ISM and ServerView Suite see dedicated data sheets.

Manageability link  http://docs.ts.fujitsu.com/dl.aspx?id=9e92297a-16fb-4c69-8559-e38e7b42f6ee

Dimensions / Weight

Rack (W x D x H)  482.6 mm (Bezel) / 434.8 mm (Body) x 724.8 x 86.9 mm

Mounting Depth Rack  741.3 mm

Height Unit Rack  2 U

19" rackmount  Yes

Mounting Cable depth rack  200 mm (1,000 mm Rack recommended)

Weight  max. 29.7 kg

Weight notes  Actual weight may vary depending on configuration

Rack integration kit  Rack integration kit as option

Environment

Operating temperature note  Cool-safe® Advanced Thermal Design (above 35 °C or below 10 °C) depending on configuration. Please use the Fujitsu WebArchitect (www.fujitsu.com/configurator/public) to get detailed information on the corresponding configurations.

Operating relative humidity  10 - 85 % (non condensing)

Noise emission  Measured according to ISO 7779 and declared according to ISO 9296

Sound pressure (LpAm)  47.4 dB(A) (idle) / 47.4 dB(A) (operating)

Sound power (LWAd; 1B = 10dB)  6.5 B (idle) / 6.5 B (operating)

Noise notes  Noise emissions depends on operation modes, system configuration and ambient temperature. Operating mode measured based on OLTIS with 50% load. *OLTIS = FUJITSU Load Profile which stresses all components of a server with a given load level.

Environmental (Base unit specific)

Operating ambient temperature  5 - 40 °C (41 - 104 °F) / 5 - 35 °C (41 - 95 °F)

Electrical values

Power supply configuration  2 hot-plug power supplies (standard), single power supply configuration possible

Hot-plug power supply redundancy  Optional

Active power (max. configuration)  2,335 W

Apparent power (max. configuration)  2360 VA

Heat emission (max. configuration)  8406.0 kJ/h (7967.3 BTU/h)

Rated current max.  20 A (100 V) / 8 A (240 V)

Active power note  To estimate the power consumption of different configurations use the Fujitsu Product Configurator: www.fujitsu.com/configurator/public

Power supply  1600W hot-plug, 94% (Platinum efficiency), 200-240V, 50 / 60Hz

Power supply notes  Hot plug power supply redundancy with AC input Voltage at 200 - 240V only

More information

In addition to Fujitsu PRIMERGY RX4770 M5, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio
Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.

Fujitsu Green Policy Innovation
Fujitsu Green Policy Innovation is our worldwide project for reducing burdens on the environment. Using our global know-how, we aim to contribute to the creation of a sustainable environment for future generations through IT.
