FUJITSU Server PRIMERGY will give you the servers you need to power any workload and changing business requirements. As business processes expand so does the need for applications. Each has its own resource footprint, so you need a way to optimize your computing to better serve your users. PRIMERGY systems will help you match your computing capabilities to your business priorities with our complete portfolio of expandable PRIMERGY tower servers for remote and branch offices, versatile rack-mount servers as well as hyper-converged multi-node servers. They convince by business proven quality with a wide range of innovations, highest efficiency cutting operational cost and complexity, provide more agility in daily operations, and integrate seamlessly to let help you concentrate on core business functions.

FUJITSU Server PRIMERGY RX rack systems are versatile rack-optimized servers providing best-in-class performance and energy efficiency, and thus form the ‘standard’ in each data center. PRIMERGY RX servers already deliver 25 years of development and production know-how resulting in extremely low failure rates below market average, and lead to continuous operations and outstanding hardware availability.

PRIMERGY RX4770 M5
The FUJITSU Server PRIMERGY RX4770 M5 is an industry-standard x86 server system with four sockets, providing superior levels of performance, scalability and efficiency. This combination turns the server into an ideal platform for running databases and transactional applications, business intelligence (BI) workloads, back-end and in-memory databases as well as other compute-intensive applications. In addition, it substantially simplifies carrying out DC server optimization such as server virtualization or consolidation. Featuring the latest Intel® Xeon® Scalable Family processors with each up to 28 cores pushes this server to a whole new level of compute performance to deliver more efficient business results. Thanks to the highly performant and superfast DDR4 memory technology with up to 6TB memory capacity and optionally up to 24x Intel® Optane™ DC Persistent Memory NV-DIMM modules along with excellent support for NVMe Flash drives, the system can handle complex, data-intensive workloads such as in-memory databases like SAP HANA® and real-time business analytics even easier than the previous generation. The PRIMERGY RX4770 M5 supports 12 Gbit/s SAS/SATA controllers with optional FBU. It can either come as a 16x 2.5-inch hot-plug storage drives holding base unit or in a base unit holding a total of 12x storage drives even for directly connected PCIe SSDs. An onboard dual-channel 10 Gbit/s Ethernet controller, together with 8 PCI-Express Gen3 slots, help to increase bandwidth for even faster time-to-business insights. With built-in redundancy and hot-pluggable components as well as advanced business-critical RAS features such as Resilient System- and Memory Technologies, the RX4770 M5 provides higher availability and uptime. Virtualization and consolidation of IT resources offer many benefits but can often lead to increased expenses for server administration. Therefore the PRIMERGY RX4770 M5 delivers state-of-the-art management capabilities with the latest generation integrated Remote Management Controller (iRMC S5) offering a variety of user-friendly functions to ensure a faster and more cost-effective infrastructure management, no matter whether the server is located in the server-room next door or in another part of the world.
Features & Benefits

### Main Features

#### INNOVATION MEETS PERFORMANCE
- Wide choice of different types of Intel® Xeon® Scalable processors as well as new 2nd generation Intel® Xeon® Scalable processors. Each processor offers up to 28 cores, up to 56 threads, 12 memory channels enabling a significantly higher performance and efficiency. They rely on Intel® UltraPath Interconnect for an increased data rate between the CPUs. Intel® Optane™ DC persistent memory is an innovative memory technology that delivers a unique combination of affordable large capacity and persistence (non-volatility). It revolutionizes the data center memory-storage hierarchy of the past and brings massive data sets closer to the CPU for faster time to insight. In total, up to 15,360 GB main memory in a mixed mode (non-volatile memory + DDR4 @ 2,933 MT/s) are available.

#### ENHANCED FEATURES FOR ENHANCED COMPUTING
- Extended RAS-features for fail-safe operation: Built-in redundancy and hot-pluggable components, Advanced ECC, Memory Scrubbing and SDDC. The RX4770 M5 comes with onboard LAN for basic LAN, DynamicLoM via OCP slot for extended requirements. A storage drive bay configuration with up to 16x 2.5-inch or up to 12x PCIe 2.5-inch SSD SFF*, complemented by internal M.2 devices for hypervisor installations. Our power supply units with up to 96% energy efficiency and Fujitsu’s Cool-safe® Advanced Thermal Design for higher ambient temperatures in the data center are available for this server.

#### PROTECT YOUR COMPANY WITH SECURE SERVERS
- PRIMERGY servers are equipped with beneficial features to protect against, detect and recover from security breaches (UEFI Secure Boot, TPM 2.0, signed firmware updates, agent-free device management, secure authorization and authentication, alerting and logging, secure Out of Band Management with iRMC S5, ...).

#### INFRASTRUCTURE MANAGEMENT
- ISM is available with two licensing options: (1) ISM Advanced is the fully featured licensed version of ISM that provides comprehensive infrastructure management capabilities across datacenter. (2) ISM Essential provides a quick start to infrastructure management with essential monitoring and update functions.

#### Benefits

- Ready for the future and data growth scenarios with the performance of two processors — marking the standard of tomorrow with an increase in computing power. New SKUs of the 2nd generation Intel® Xeon® Scalable processors deliver additional customer value with increased performance and industry leading frequency for the most demanding workloads. Intel® Optane™ DC persistent memory technology will transform critical data workloads — from cloud and databases, to in-memory analytics, and content delivery networks but also for future technologies such as Artificial Intelligence of Virtual Reality applications.

- Business-critical RAS features lower the risk for unplanned IT downtimes. The systems’ enhanced set of features adds even more reliability, availability, and serviceability that customers need to run business-critical applications. The right Ethernet connection for all: Basic via onboard LAN, extended with DynamicLoM via OCP guarantees the highest flexibility to integrate the server into existing infrastructures – now and in future without overhauling the existing infrastructure. On top of that, this server is not only “greener”, but also less expensive over time. Cool-safe® ATD and highly efficient hot-plug power supplies save energy costs.

- PRIMERGY servers come with a wide variety of such robust security features and combine these capabilities with the best quality and efficiency, and more agility in daily operations helps to turn IT into a business advantage faster.

- Converged data center management that provides organizations centralized control over the entire infrastructure that includes servers, storage, networking, cloud management software as well as power and cooling using a single user interface.

### Processor notes

A mimimum of 2 processors must be configured, no mix of different processor types.

### Memory slots

48 (12 DIMMs per CPU, 6 channels with 2 slots per channel)

### Memory slot type

DIMM (DDR4 / DDR-T for non-volatile memory modules)

### Memory capacity (min. – max.)

16 GB - 15 TB

### Memory protection

- Advanced ECC
- Memory Scrubbing
- SDDC
- Memory Mirroring support
- Rank sparing memory support

### Memory notes

Max. 6 slots populated with DCPMM modules per CPU, please see relevant system configurator for details. Memory Mirroring Mode with identical modules in both channel pairs of a bank (4 or 6 modules per bank) per CPU. Rank Sparing Mode with minimum of 2 modules single ranked (1R) or dual ranked (2R) or 1 module quad ranked (4R) per CPU.

- 512 GB (8 module(s) 64 GB) DDR4, registered, ECC, 2,933 MT/s, PC4-2933, LRDIMM, 4Rx4

Non-volatile memory modules

- 128 GB (1 module(s) 128 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 1Rx4
- 256 GB (2 module(s) 128 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 1Rx4
- 512 GB (2 module(s) 256 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 2Rx4
- 512 GB (4 module(s) 128 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 1Rx4
- 1024 GB (4 module(s) 256 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 1Rx4
- 2048 GB (4 module(s) 512 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 4Rx4
- 768 GB (6 module(s) 128 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 1Rx4
- 1536 GB (6 module(s) 256 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 2Rx4
- 3072 GB (6 module(s) 512 GB) DDR-T, registered, ECC, 2,666 MT/s, NVM, DCPMM, 4Rx4

Interfaces

- USB 3.0 ports: 5 x USB 3.0 (2x front, 2x rear, 1x internal)
- Graphics (15-pin): 2 x VGA (1 x front, 1 x rear)
- Serial 1 (9-pin): 1 x RS-232-C
- Management LAN (RJ45): 1 x dedicated management LAN port for iRMCS5 (10/100/1000 Mbit/s)
  Management LAN traffic can be switched to shared onboard LAN controller port, speed and connector is related to installed interface card.

Onboard or integrated Controller

- RAID controller: All hardware storage controller options are described under Components
- SATA Controller: Intel® C624, 1 x SATA channel for ODD
- LAN Controller: DynamicLoM based on Intel® C624 (Intel® X722)
  Optional DynamicLoM OCP adaptors:
  - 2 x 10 Gbit/s Ethernet (RJ45)
  - 2 x 10 Gbit/s SFP+
  - 4 x 1 Gbit/s Ethernet (RJ45)
  - 4 x 10 Gbit/s SFP+
  All supported features are described in relevant system configurator.
  Wake-on-LAN supported on onboard Port 1.
  Extra LAN controller (PCIe Cards) are listed below. (i210 LAN card via project release possible)
- Remote management controller: Integrated Remote Management Controller (iRMCS5, 512 MB attached memory incl. graphics controller)
  IPMI 2.0 compatible
- Trusted Platform Module (TPM): Infineon / TPM 1.2 or TPM 2.0 module; TCG compliant (option)

Slots

- PCI-Express 3.0 x16: 8 x whereas 4x full height and 4x low profile with up to 167mm length
- Slot Notes: Important note: 4 PCIe slots are supported with the first and second processor. Additional 4 PCIe slots are supported with the third and forth processors.
  Slot 1&2: PCIe Gen3 x16 @CPU1 for low profile cards with up to 167mm length
  Slot 3&4: PCIe Gen3 x16 @CPU4 for full height cards with up to 167mm length
  Slot 5: PCIe Gen3 x16 @CPU2 for low profile cards with up to 167mm length
  Slot 6&7: PCIe Gen3 x16 @CPU3 for full height cards with up to 167mm length
  Slot 8: PCIe Gen3 x16 @CPU2 for low profile cards with up to 167mm length (used for the internal modular RAID controller if selected)
- PCI-Express 3.0 x4
### PCI-Express 3.0 x16
- 8 x PCI-Express 3.0 x16
- 6 x PCIe slot 1 & 2 not available; reserved for additional air cooling

### Drive bays
**Storage drive bays**
- 2.5-inch hot-plug SAS/SATA/PCIe
  - 2 x M.2 slot whereas slot 1 supports 80mm or 110mm and slot 2 supports 42mm or 80mm

**Notes accessible drives**
All possible options described in relevant system configurator.

**Optional accessible drives**
1 x 5.25/9.5mm for DVD-RW/Blu-ray

### Drive bays (Base unit specific)
**Storage drive bays**
- 16 x 2.5-inch hot-plug SAS/SATA/PCIe
- 8 x 2.5-inch hot-plug SAS/SATA/PCIe

### General system information
**Number of fans**
- 12

**Fan configuration**
- hot-plug

**Fan notes**
- 11+1 redundant

### Operating panel
**Operating buttons**
- On/off switch
- NMI button
- Reset button
- ID button

**Status LEDs**
- System status (green)
- Global error (orange)
- Identification (blue)
- Hard disks access (green)
- Power (green)
- CSS (orange)
- At system rear side:
  - System status (green)
  - CSS (orange)
  - Identification (blue)
  - Global error (orange)
  - LAN connection (green)
  - LAN speed (green / yellow)

### BIOS
**BIOS features**
- UEFI compliant
- Legacy BIOS compatibility customer configuration option
- Secure boot support
- ROM based setup utility
- GPT support for boot drives larger than 2.2 TB
- Memory Redundancy support (Mirroring, Sparing)
- IPMI support
- Recovery BIOS
- BIOS settings save and restore
- Local BIOS update from USB device
- Online update tools for main Linux versions
- Local and remote update via ServerView Update Manager
- IPv4/IPv6 remote PXE & iSCSI boot support
- Cryptographically Signed BIOS Firmware Update
- HTTP and HTTPS Boot
- PCIe Bifurcation configurable
### Operating Systems and Virtualization Software

**Certified or supported operating systems and virtualization software**

- Windows Server 2019 Datacenter
- Windows Server 2019 Standard
- Windows Server Datacenter, version 1809
- Windows Server Standard, version 1809
- Hyper-V Server 2016
- Windows Server 2016 Datacenter
- Windows Server 2016 Standard
- Windows Server Datacenter, version 1709
- VMware vSphere™ 6.7
- VMware vSphere™ 6.5
- SUSE® Linux Enterprise Server 12
- Red Hat® Enterprise Linux 8
- Red Hat® Enterprise Linux 7
- Oracle® Linux 7
- Oracle® VM 3

**Operating system release link**

**Operating system notes**

Support of other Linux derivatives on demand

### Server Management and Infrastructure Management

**Standard**

- Infrastructure Manager (ISM) Essential
- Node Management
- Health status Monitoring and Control
- Capacity/Threshold Management
- Power Management
- Converged Management
- Auto Discovery
- Remote Management
- Update Management
- Logging and Auditing

**ServerView Suite (Deploy)**

- ServerView Installation Manager
- ServerView Scripting Toolkit

**ServerView Suite (Control)**

- ServerView Operations Manager (incl. PDA and ASR & R)
- ServerView Agents and CIM provider
- ServerView Agentless Management
- ServerView System Monitor
- SVOM- Event Manager
- ServerView RAID Manager
- SVOM- Threshold Manager
- Power Monitor (monitoring the Power Consumption)
- Power Management (iRMC)
- Storage Management (server) with SVOM/SV-RAID

**ServerView Suite (Integrate)**

- ServerView Integration packs for MS System Center, VMware vCenter, VMware vRealize, Nagios, and HP SIM
### Server Management and Infrastructure Management
