Data Sheet
Fujitsu PRIMERGY TX1330 M4 Server

Highly expandable advanced server for typical SME business requirements

PRIMERGY TX1330 M4
The FUJITSU Server PRIMERGY TX1330 M4 is an advanced technology, highly expandable and robust mono-socket server to meet multiple industry plus classic small and medium-sized enterprise requirements. It features the latest compute and memory for appropriately sized workloads such as file/print, web, ERP/CRM, email, business specific applications plus use cases with high storage requirements such as centralized storage and databases. It features the latest powerful Intel® Xeon® E-2200/E-2100 product family processors with up to 128GB DDR4 memory at 2,666 MT/s, to boost application performance. The new processors with higher core counts, higher speed plus the doubled memory capacity allow customers to handle demanding workloads without moving to more expensive units. The server has high levels of secure expandability with up to 24x 2.5-inch hot-plug storage devices (3.5-inch drive configurations are also available) along with 4x ultra-fast NVMe devices (up to 16x 2.5-inch devices can be fielded alongside), advanced RAID controllers (up to 4/8GB cache) and data back-up options, making it ideal for consolidating and managing large datasets. Up to 4 PCIe slots are available to add RAID cards, networking options (such as 10/25 Gb controllers). High availability features such as the optional Fujitsu Battery Backup Unit, high-efficiency (94%), redundant power supplies or redundant fans ease operator concerns and provide investment protection. The aesthetic design makes it suitable for deployment in public areas such as showrooms, retail premises or offices. New generation technologies include M.2 modules for efficient OS installation along with Dual microSD capability for VMware ESXi, plus USB 3.1 Gen 2 ports. Furthermore, advanced server management is available via iRMC S5, the Fujitsu ServerView® Suite, and a free ISM Essential license. These provide administrators with comprehensive support across server installation, deployment and administration.

Note: Check the product configurator for the server compatible components currently available at launch.
Features & Benefits

<table>
<thead>
<tr>
<th>Main Features</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advanced technology for workload-versatile performance</td>
<td>The server compute and memory can be optimized for most appropriately sized standard workloads across industries with the Intel® Xeon® E-2200 processors offering the highest performance in the toolbox. The workloads can range from appropriately sized, individual to virtualized multi-app environments including workloads such as file/print, email, ERP/CRM, messaging, centralized data storage and industry specific applications. The new higher core count, faster processors and doubled memory capacity make these servers suitable for more powerful applications than their previous generation. In terms of storage and networking, NVMe drives offer ultra-fast storage for low-latency applications, while the server’s huge storage capacity offers secure, cost-effective capability to consolidate and manage large datasets, combined with growth potential. Redundant LAN offers reliable data connectivity out of the box. Advanced options such as 10/25 GbE or Fiber Channel networking cards offer high data transfer for demanding environments, e.g. virtualized environments or centralized storage.</td>
</tr>
<tr>
<td>Wide range of compute/memory with the combination of the latest Intel® Xeon® E-2200/2100 processors, and up to 128GB DDR4 memory (4 DIMMs) at 2,666 MT/s. Affordable Core™ i3 and Pentium™ processors are also available. High storage and networking expandability with the server supporting up to 4x NVMe devices plus either 8x3.5-inch storage devices or 16x2.5-inch devices. Maximal capacity with standard drives is up to 12x3.5-inch devices, or up to 24x2.5-inch devices. It also supports Fujitsu’s powerful RAID controllers (including SAS 3.0, 4/8 GB cache). Backup options include LTO and RDX. Security optimization includes TPM 2.0 support plus Fujitsu’s secure 3-way lock for server access. Server also features redundant (2x1Gbe) LAN as standard plus advanced networking options (10/25Gb Ethernet, Fiber Channel controllers).</td>
<td></td>
</tr>
<tr>
<td>Future ready plus capabilities for enhanced utilization</td>
<td>The server compute and memory can be optimized for most appropriately sized standard workloads across industries with the Intel® Xeon® E-2200 processors offering the highest performance in the toolbox. </table>
## Technical details

### PRIMERGY TX1330 M4

#### Mainboard
- **Mainboard type**: D3673
- **Chipset**: Intel® C246
- **Processor quantity and type**: 1 x Intel® Xeon® E-2200 processor family / Intel® Xeon® E-2100 processor family / Intel® Pentium® processor / Intel® Core™ i3 processor
- **Memory slots**: 4
- **Memory slot type**: DIMM (DDR4)
- **Memory capacity (min. - max.)**: 4 GB - 128 GB
- **Memory protection**: ECC
- **Memory notes**: Mix and match possible; with dual channel operation better performance (2 modules with equal capacity necessary). Single channel (1 module) configuration possible.

#### Interfaces
- **USB 2.x ports**: 4 (4x external rear)
- **USB 3.x ports**: 4 (2x internal, 2x external front, USB 3.0 is now known as USB 3.1 Gen 1). Server also has 2x external rear USB 3.1 Gen 2 ports
- **Graphics (15-pin)**: 1 analog graphics interface derived from iRMC (up to 1600x1200 or 1920x1080 at 16bpp)
- **Serial connection**: 1 x serial RS-232-C
- **LAN / Ethernet**: 2 x 1 Gb/s Ethernet; RJ45
- **Management LAN (RJ45)**: 1 x dedicated management LAN port for iRMC S5 (10/100/1000 Mbit/s) Management LAN traffic can be switched to shared onboard Gbit LAN port

#### Onboard or integrated Controller
- **RAID controller**: Optionally integrated RAID 0/1 or RAID 5/6 controller for SAS base units (occupies one PCIe slot). All hardware storage controller options are described under Components
- **SATA Controller**: Intel® C246, 2 ports used for accessible drives
- **SATA controller type notes**: 4 port for internal SATA HDDs with RAID 0, 1, 10 for Windows and Linux;
- **LAN Controller**: Intel® i210 onboard 2 x 10/100/1000 Mbit/s Ethernet iSCSI, PXE-Boot and Wol. are supported
- **Remote management controller**: Integrated Remote Management Controller (iRMC S5, 512 MB attached memory incl. graphics controller) IPMI 2.0 compatible
- **Trusted Platform Module (TPM)**: TPM 2.0 module (option)

#### Slots
- **PCI-Express 3.0 x1 (mech. x4)**: 1 x Full height, up to 168 mm length
- **PCI-Express 3.0 x4**: 1 x Full height, up to 168 mm length
- **PCI-Express 3.0 x8**: 2 x Full height, up to 240 mm length notched
- **Slot Notes**: Optional PCIe to legacy PCI adapter available. In SAS configuration 1x PCIe-Express occupied by modular RAID controller.

#### Drive bays
- **Storage drive bays**: 3.5-inch or 2.5-inch hot-plug SAS/SATA
- **Accessible drive bays**: 3 x 5.25/1.6-inch
- **Notes accessible drives**: all possible options described in relevant system configurator

#### Fan Configuration

#### Operating panel
- **Operating buttons**: On/off switch, NMI button, Reset button
Operating panel

Status LEDs
- System status (orange / yellow)
- Identification (blue)
- Hard disks access (green)
- Power (orange / green)

At system rear side:
- System status (orange / yellow)
- Identification (blue)
- LAN connection (green)
- LAN speed (green / yellow)
- CSS (yellow)

BIOS

BIOS features
- ROM based setup utility
- Recovery BIOS
- BIOS settings save and restore
- Local BIOS update from USB device
- Online update tools for main Linux versions
- Local and remote update via ServerView Update Manager
- Remote PXE boot support
- Remote iSCSI boot support

Operating Systems and Virtualization Software

Certified or supported operating systems and virtualization software
- Windows Server 2019 Datacenter
- Windows Server 2019 Standard
- Windows Server 2019 Essentials
- Windows Server Datacenter, version 1809
- Windows Server Standard, version 1809
- Hyper-V Server 2016
- Windows Server 2016 Datacenter
- Windows Server 2016 Standard
- Windows Server 2016 Essentials
- Windows Storage Server 2016 Standard
- Windows Server Datacenter, version 1709
- VMware vSphere™ 7.0
- VMware vSphere™ 6.7
- VMware vSphere™ 6.5
- SUSE® Linux Enterprise Server 12
- Red Hat® Enterprise Linux 8
- Red Hat® Enterprise Linux 7
- Univention Corporate Server 4

Operating system release link

Operating system notes
Support of other Linux derivatives on demand
RHEL 7.5 and SLES 15 GA are not supported for the new CPUs including the Intel® Xeon® E-2200 product family.

Server Management

Dimensions / Weight

Floor-stand (W x D x H) 177 x 560 x 455 mm
Rack (W x D x H) 483 x 495 x 175 mm

Height Unit Rack 4 U

Weight
- Rack: 13 kg - 25 kg; Tower: 15kg - 28 kg

Weight notes
Actual weight may vary depending on configuration

Rack integration kit
Rack integration kit can be ordered as option

- NVIDIA® Quadro® P400, 2 GB, N/A, PCIe x16, 3 x miniDP

### Rack infrastructure
- Cable Management for 19-inch DataCenter / PRIMECENTER Racks
- Cable Arm 2U for PRIMECENTER- and 3rd-party racks

---

### Warranty
- Manufacturer warranty period: 1 year
- Warranty type: Onsite warranty

### Support Pack Options
- Globally available in major metropolitan areas:
  - 9x5, Next Business Day Onsite Response Time
  - 9x5, 4h Onsite Response Time (depending on country)
  - 24x7, 4h Onsite Response Time (depending on country)

### Recommended Service
- 24x7, Onsite Response Time: 4h - For locations outside of EMEA please contact your local Fujitsu partner.

### Service Lifecycle
- at least 5 years after shipment, for details see https://support.ts.fujitsu.com/

### Service Weblink
- http://www.fujitsu.com/fts/services
More information

Fujitsu platform solutions
In addition to Fujitsu PRIMERGY TX1330 M4, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Dynamic Infrastructures
With the Fujitsu Dynamic Infrastructures approach, Fujitsu offers a full portfolio of IT products, solutions and services, ranging from clients to datacenter solutions, Managed Infrastructure and Infrastructure as-a-Service. How much you benefit from Fujitsu technologies and services depends on the level of cooperation you choose. This takes IT flexibility and efficiency to the next level.
