Fujitsu offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. Fujitsu Server PRIMERGY systems deliver workload-optimized x86 industry standard servers for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers for remote and branch offices, versatile rack-mount servers and density-optimized multi-node servers. Whatever the size of your business – large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

Fujitsu PRIMERGY TX1330 M5
The Fujitsu PRIMERGY Server TX1330 M5 is an advanced technology server, highly expandable and robust, designed to meet classic small and medium-sized enterprise requirements across industries. It features the latest Intel® Xeon® E-2300 product family processors plus up to 128GB DDR4 memory at 3,200 MT/s to boost performance across standard business workloads such as file/print, web, ERP/CRM, email, business specific applications. The server has high levels of secure expandability for consolidating and managing large datasets, with up to 24x 2.5-inch hot-plug storage devices (3.5-inch drive configurations are also available) along with 4x low latency PCIe SSD devices (up to 16x 2.5-inch devices can be fielded alongside), advanced RAID controllers (up to 4/8GB cache) and data back-up options. Up to 4 PCIe slots (Gen4/3) are available to add RAID cards, networking options (such as 10/25 Gb controllers). High availability features such as high-efficiency redundant power supplies plus redundant fans ease operator concerns and provide investment protection. The aesthetic design makes it suitable for deployment in public areas such as showrooms, retail premises or offices. M.2 modules for efficient OS installation along with dual microSD capability for VMware ESXi, plus USB 3.2 Gen 2 ports enhance the server’s functionality. Furthermore, advanced remote server management and centralized infrastructure management are available via iRMC S6, and the Fujitsu Infrastructure Management Suite (ISM) respectively, with an ISM Essential license available free-of-charge and ISM Advanced available as an option.
