Fujitsu U-Scan Genesis Self Checkout-System

From the world's leading provider of self-Checkout solutions comes the most compact, intuitive and advanced U-Scan® product line.

U-Scan Genesis

The self checkout system U-Scan Genesis is a flexible system for every need:

The self-service checkout from Fujitsu are easy to operate and carry transactions quickly and reliably. The modular design provides special cost advantages: Retailers may at any time supplement such as additional parking for plastic bags and make profit of existing investments – even for future feature upgrades or shop conversions.

Ergonomic Design

The new U-Scan Genesis™ from Fujitsu is completely re-engineered to meet your customers' needs for simple, fast, and efficient transactions while providing maximum flexibility, space-savings, and reliability. The unique design of the U-Scan Genesis makes it highly adaptable to your store's own requirements—today and tomorrow.

Because your retail business is ever-changing, U-Scan Genesis has been designed to provide a modular and flexible architecture that makes it simple—and cost effective—for you to take advantage of future feature upgrades and make changes to your store's layout.

U-Scan Genesis protects your self-checkout investment unlike any other solution on the market today.

Customer Driven Improvements

The U-Scan Genesis incorporates significant design improvements that make self-checkout simpler, more intuitive and faster for shoppers. Graphical user interface improvements such as larger, more appealing screen visuals and the integration of a familiar consumer market design provides shoppers with an easy checkout experience resulting in decreased attendant intervention. All cash and coin accepting and dispensing is located together

above the scanner, which speeds up the transaction process and reduces the likelihood of customers leaving money behind. The bill acceptor features accuracy and acceptance rates up to two times faster than other solutions on the market, while the completely redesigned bill dispenser significantly reduces bill jams—the most common service and maintenance issue.

All the primary components (customer display, scanner, receipt printer, coin and cash acceptors and dispensers, pin pad) are located within inches of each other, eliminating customer steps to and from devices located out of reach. A new “rich content” customer user interface and ATM-style “follow me” LEDs guide the customer through the checkout process.

Easy To service

With the U-Scan Genesis, service and maintenance issues need not tie up your self-checkout lanes for extended periods of time. Easy serviceability enables your store associates to solve most simple maintenance issues quickly, so you minimize customer disruptions and greatly reduce service costs. Replacing the receipt paper is as simple as opening a drawer; no key or supervisor is required. The CPU, coin hopper and bill dispensers are mounted on slide-out rails and shelves, with front accessibility that makes servicing or replacement of parts a snap, without tools, or complicated teardowns.

Reliable Performance

The U-Scan Genesis leverages many of the same advanced and reliable components as other leading retail-hardened systems from Fujitsu, to stand up to the demands of high volume checkout environments. With its

“Direct Mode” feature, the U-Scan Genesis provides exactly the same functionality as your existing PoS software application. This means there's no duplicative training for your cashiers; what they see at the PoS is identical to what's visible in Direct Mode at the U-Scan Genesis. The U-Scan Genesis also comes with an uninterruptible power supply (UPS), providing safe and clean stand-by power. In case of electrical service disruptions, you won't be plagued with lost transactions, voids and frustrated customers.

Optional lane lights, assist shelves, bumpers and custom finishes are available so that you may customize your U-Scan Genesis installation for a unique and differentiating customer experience.

Fits Your Space

Featuring a smaller footprint than all previous U-Scan models, the U-Scan Genesis adapts to even tighter spaces and more locations, giving you the option to install more self-checkout lanes in the same square footage. With several models to choose from, retailers large and small alike can find a unit that will suit their needs.

Self Checkout-System U-Scan Genesis 2

U-Scan 1+—Single-bag unit with scale space to accommodate additional large items is ideal for small retail outlets, convenience store, drug and discount retailers in both standard and express lane configurations.

U-Scan 2—Dual-bag model works well in almost any retail store environment, where both bagging capacity and overall space savings are critical.

U-Scan 4—Four-bag system is perfect for higher volume supermarkets and mass merchandise retailers fitting in significantly less space than most popular 3-bag systems

Fujitsu U-Scan Genesis 4

U-Scan 6 & U-Scan 8—Six and Eight bag configurations use the same modular bagging components as the U-Scan 4, giving you any combination of ultimate item capacity processing.

U-Scan Carousel—Rotating bagging platform that can accommodate large order sizes with variable configurations of either 6 bag racks or 4 bag racks and recycle bin space, in addition to a secondary scale for larger items. All configurations provide easy accessibility to bagged purchases.

U-Scan Kiosk—Super compact, cashless model which is ideal for departments within larger stores or anywhere unassisted sales are needed. U-Scan Kiosk is also perfect for the convenience store operation.

U-Scan Payment Station—Full-service tendering only (coin and bill accepting and dispensing) model increases throughput during significant customer surges or where register space is limited.

Because the U-Scan Genesis is modular, you can easily upgrade to a different capacity model and configuration as your self-checkout needs change. You'll save even more space using the Fujitsu iPad mobile attendant, a wireless handheld device that performs the same functions as the fixed location attendant station. The iPad offers easy-to-use, fully-integrated software and allows cashiers to interact more freely with self-checkout customers and provide faster assistance.

Maximize Your ROI

Be sure to ask about our Self-Checkout Best Practices and U-Scan Training programs, designed to increase customer acceptance of your U-Scan system and maximize your return on investment. We provide real-world experience and expertise to our customers every day.
