

Datasheet

ETERNUS CS8000

ImplementationPack, Basic

Introduction

Fujitsu Storage ETERNUS CS8000 is a unified data protection appliance for the complete consolidation of backup and archiving infrastructures of open systems and mainframes.

Thanks to uniform management of disks, deduplicated disks and tapes flexible service levels regarding capacity, speed and cost can be provided. A modular grid architecture delivers extreme scalability of capacity and performance. Integrated data mirroring and replication features enable comprehensive disaster recovery concepts.

Flexible SAN and Ethernet connectivity as well as VTL, NAS and WORM support allow you to use one system for backup and archiving. And support for the Cloud Object Storage functionality via an S3 front end interface makes ETERNUS CS8000 an ideal and future-proof solution for a unified and optimized data protection infrastructure.

Our implementation services open up an economic, effective and tailored way to our unified data protection solution. They offer markedly lower operating costs, reduced complexity and increased dynamic flexibility in the commercial use of all backup/restore as well as archive applications in the data center.

Your requirements

You want a reliable and complete implementation of hardware and software for an ETERNUS CS8000 so that you can achieve the following results:

- Trouble-free, swift implementation of a unified backup concept,
- Convincing integration into your existing environment

Benefits

Optimal hardware, software and service concepts have been defined and subjected to extensive checks. This offers to you:

- Concepts meeting your requirements,
- Security and simplification in the implementation process,
- A reduction in investment costs, implementation times and a quick return on investment thanks to our experiences in system integration projects,
- Simple startup of the IT infrastructure with a maximum availability of data center processes

Order codes and delivery

The services are available from your local Fujitsu sales office. When ordering please quote:

- ETERNUS CS8000 Implementation Pack, Basic
FSP:G-IM1-Impl. ET CS8000 Basic

Please note:

This service includes exactly one CS8000 system. Additional Costs for Travel and Accommodation will apply if applicable.

Service in detail

Prerequisites

The following aspects are finally clarified, defined or checked for fulfillment in a first step during the inspection of the installation locations:

- Exact installation/cabling plan
- Complete HW installation and Power setup
- Prepared network link for all necessary basic functions (e.g. ISL, Admin and Data LAN)
- Frontend and Backend connections for hosts and libraries
- Project plan for the implementation
- List of contact persons, partners and additional IT suppliers involved

Implementation

Configuration of ETERNUS CS8000 is performed in a second step.

This includes the following activities:

- Work preparation / Customer meetings [1d]
- Check HW installation and cabling [0,5d]
- Initial configuration incl. SW and FW update [0,5d]
- Frontend connectivity configuration [1d]
- Environmental configuration (e.g. Cache partitioning, LVG and PVG configuration) [1d]
- Backend connectivity configuration [1d]
- Service Access System (SAS) configuration [0,5d]
- Acceptance test and documentation of the configuration
- inline with the project plan [1,5d]

Promise

Provide a ready to run ETERNUS CS8000 solution.

The following activities are NOT part of the Service

Because this service has a limited scope, not all of possibly necessary activities are included.

This applies in particular to the following:

- Project Management
- ETERNUS CS8000 Solution Upgrade
- ETERNUS CS8000 Solution Migration
- IBM Mainframe connection
- Coaching and training

If you need one of the activities listed above, please refer to the Time based ETERNUS CS8000 Solution Implementation Pack. You will also find a detailed description there.

Your partner for Professional Services

Fujitsu is a first-class address for professional support. Take this opportunity and talk to us, especially if you need support in

- Developing concepts for IT optimization or business continuity and disaster recovery
- Integration of online storage systems, storage area networks, and data backup.

Legal Information / General Terms and Conditions

In addition to this data sheet, which includes a final list of the features of the services, the general business terms and conditions of the respective local Fujitsu entity for the performance of the services in its respective local version shall apply.

Please refer to: [Terms and Conditions](#)

More information

Fujitsu products, solutions & services

Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio

Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
