

Data Sheet

FUJITSU ServiceContract Software

Support Services for IT Software

INTRODUCTION

Fujitsu offers - with its Fujitsu ServiceContract Software - support services for selected software products. They comprise the diagnostics of software faults as well as fault elimination via workaround solutions and/or the provision of software corrections if available. Depending on the software product, software versions with new functions are provided at the customer's request.

This data sheet describes the contractually relevant support services; product-specific supplements and information about the lifecycle policy are defined in a Technical Appendix.

The specific scope of the contracted services is defined together with the supported software products in the service offer / schedule provided to the customer.

Fujitsu ServiceContract Software

ServiceContract Software is a product-related service contract. It can, unless otherwise explicitly regulated, be purchased at any time during the product's lifecycle until 1 year before the end-of-service for that product. Details can be found in the product-specific Technical Appendix. Fujitsu reserves the right to check the serviceability of the product before the start of the contract and, if necessary, will establish such serviceability in agreement with the customer and at the latter's costs.

The contract period begins on the contractually agreed date and is valid for a minimum time period as agreed and defined in the service offer / schedule. If not otherwise agreed, the contract period gets automatically extended for additional 1 year at the end of the actual service period, unless the contract is terminated.

Remuneration for the ServiceContract is on a regular flat-rate basis if not otherwise agreed.

The minimum contract period is 1 year.

Services in detail

OUR SERVICE OFFERING

The following service scope applies unless otherwise specified in the product-specific Technical Appendix for the respective software product:

- **Technical Support**

Technical support covers the fault acceptance as well as the support for error diagnostics and the provision of potential initial workarounds via phone or remote access. The technical support is delivered remotely.

- **Software Maintenance**

Software corrections and patches

Software corrections and patches aimed at eliminating faults are provided if they have been made available by the respective software manufacturer. These can be individual patches, patch packages or correction versions depending on the manufacturer. Any necessary specific information is included in the Technical Appendix for the respective software product.

Installing software corrections is not part of the contract, but can be commissioned and will be invoiced separately.

New software versions (updates/upgrades)

Software versions with new functions are released by the respective manufacturer. Any necessary specific information is included in the Technical Appendix for the respective software product.

The right of a customer to be supplied with new software versions only exists if this is desired by the manufacturer of the respective software product as part of the latter's product policy. These new versions are provided, when available, for the service-authorized software product and at the request of the customer.

Installing new software versions is not part of the contract, but can be commissioned and will be invoiced separately.

SERVICES NOT INCLUDED IN THE SCOPE OF SUPPORT (EXCLUSIONS)

The regular and full data backup, including application and operating system software, is the responsibility of the customer.

SERVICE LEVELS

The agreed remote response time depends on the selected service option.

- **Call acceptance**

Call acceptance	To get in contact with Fujitsu support please see ts.fujitsu.com/serviceesk
------------------------	--

When the call entitlement has been successfully concluded the call is accepted, a reference number is assigned and processing then continues according to the defined service level. The measurement of the contracted remote response time starts with the confirmation of an incident by the help desk.

The product/license type as well as the ID for the respective software and contract number must be specified in the call.

- **Service time**

The service time is the contractually agreed period in which service is provided on a remote basis. The standard service time varies between countries.

Standard service time	Please see details for respective country under http://www.fujitsu.com/fts/support-local-terms
------------------------------	---

- **Remote response time**

The remote response time designates the time period between call acceptance and when a specialist starts to solve the problem via the phone or remote access.

The remote response time begins within the agreed service time after the call has been accepted; the measurement of time is stopped outside the agreed service time. In other words, it can last until the next day which is covered by the service time.

REMOTE SERVICE

As part of the Support Services Fujitsu provides reliable remote access functions which support fast and efficient fault diagnosis and, if necessary, eliminate errors. Remote access to a customer system is only carried out with the customer's approval which can be granted generally or on a case-by-case basis; it usually requires Internet access.

PREREQUISITES

The following prerequisites apply for the service contract. Should one or more of the prerequisites not be met, the services described can only be provided in a restricted manner or possibly not at all.

- **Supported product version**

ServiceContract is available for software version(s) for which software support is generally available according to the lifecycle policy of the software manufacturer.

- **Remote access**

It is assumed with Fujitsu ServiceContract Software Services that remote access is available for Fujitsu. If the customer does not wish to provide any remote access or this cannot be configured for some other reason, the agreed service levels cannot always be met in every situation.

- **System changes**

The Fujitsu ServiceContract Software Services can only be provided if the customer provides Fujitsu immediately and in writing with details of all the modifications to the service-authorized software product (e. g. changes to the licensing model). In the event of any extension, the same service option must be agreed as the one in the existing contract.

LEGAL INFORMATION / GENERAL TERMS AND CONDITIONS

The product, delivery and service features described above include a final list of the features of the subject of the contract and do not represent a guaranteed quality or declaration thereof in the eyes of the law.

In addition to this data sheet, the following general business terms and conditions of Fujitsu Technology Solutions in the respective local version apply (see <http://www.fujitsu.com/fts/support-local-terms>):

- "General terms and conditions for hardware and software support services of Fujitsu Technology Solutions"

Options

The following table provides an overview of standard service level options. The availability of a specific service level depends on the respective product.

Service options	ServiceContract Basic	ServiceContract Classic
Service time ¹⁾	9x5 24x7	9x5 24x7
Remote response time	4 h	4 h 2 h
Provision of software corrections and patches	On request and in agreement	On request and in agreement
Provision of new software versions	Not available	According to product specific Technical Appendix

1) Explanation of service times:

9x5 - Local business hours on local business days except legal public holidays

Further details see <http://www.fujitsu.com/fts/support-local-terms>

24x7 - Monday to Sunday including public holidays, 24 hours
