INTRODUCTION

Fujitsu offers - with its Fujitsu Support Pack Software - support services for selected software products (perpetual Software and/or Software Subscription). They comprise the diagnostics of software faults as well as fault elimination via workaround solutions and/or the provision of software corrections if available. Depending on the software product, software versions with new functions are provided at the customer's request.

This data sheet describes the contractually relevant support services, product-specific supplements and information about the lifecycle policy for the product are defined in a Technical Appendix.

The specific scope of the contracted support services is defined in the Support Pack certificate or in the Delivery Note provided to the customer (see also Technical Appendix to the respective product).

Fujitsu Support Pack Software

Support Pack Software is a product-related service contract for a fixed period and with once-only remuneration.

The specific contract term depends on the respective software product. Before expiry, the service period can be extended by purchasing a corresponding follow-on Support Pack.

In the case of Software Subscriptions, Fujitsu Support Packs must be contracted with the software subscriptions at the same time. The respective contract term depends on the contract term applicable to the software subscriptions. Extensions are not possible. However, new software subscriptions can be commissioned with corresponding new Fujitsu Support Packs before the end of the contract period.

Unless otherwise agreed, the term of the contract (service period) begins with receipt of the license key for the respective software product. The service is provided based on a one-time fee to be paid in advance when the Support Pack is purchased and based on the activation according to the “Supplementary terms for Fujitsu Support Packs”. The “Supplemental terms for Fujitsu Support Packs” need to be applied product-specifically (also see Technical Appendix).
Services in detail

OUR SERVICE OFFERING

The following service scope applies unless otherwise specified in the software product-specific Technical Appendix for the respective software product:

- Technical Support
  Technical support covers the fault acceptance as well as the support for error diagnostics and the provision of potential initial workarounds via phone or remote access. The technical support is delivered remotely.

- Software Maintenance
  Software corrections and patches
  Software corrections and patches aimed at eliminating faults are provided if they have been made available by the respective software manufacturer. These can be individual patches, patch packages or correction versions depending on the manufacturer. Any necessary specific information is included in the Technical Appendix for the respective software product. Installing software corrections is not part of the contract, but can be commissioned and will be invoiced separately.

New software versions (updates/upgrades)

Software versions with new functions are released by the respective manufacturer. Any necessary specific information is included in the Technical Appendix for the respective software product. The right of a customer to be supplied with new software versions only exists if this is desired by the manufacturer of the respective software product as part of the latter's product policy. These new versions are provided, when available, for the service-authorized software product and at the request of the customer. Installing new software versions is not part of the contract, but can be commissioned and will be invoiced separately.

SERVICES NOT INCLUDED IN THE SCOPE OF SUPPORT (EXCLUSIONS)

The regular and full data backup, including application and operating system software, is the responsibility of the customer.

SERVICE LEVELS

The time starts within the agreed service time with the initial call acceptance; time measurement is stopped outside the agreed service time. In other words, the described reaction times can last until the next day which is covered by the service time.

The agreed remote response time depends on the selected service option and the severity level of the fault. The severity level of a fault is defined by the customer during call acceptance together with the agent at the Fujitsu Help Desk.

<table>
<thead>
<tr>
<th>Severity</th>
<th>Critical impairment to operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 1</td>
<td>The fault in the service-authorized software product causes serious impairment to the customer's business processes through stand-still or total failure of the system. A bypass is not possible.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Severity</th>
<th>Significant impairment to operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 2</td>
<td>The fault in the service-authorized software product results in considerable impairment to the operability of business processes, essential applications or to the system. A bypass is not possible with reasonable efforts.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Severity</th>
<th>Moderate impairment to operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 3</td>
<td>The service-authorized software product is functioning with moderate impairment to the performance of business processes. The fault may be temporarily circumvented using an available workaround; the delay in fault elimination is acceptable.</td>
</tr>
</tbody>
</table>

- Call acceptance

Call acceptance

To get in contact with Fujitsu support please see ts.fujitsu.com/servicedesk

When the call entitlement has been successfully concluded the call is accepted, a reference number is assigned and processing then continues according to the defined service level. The measurement of the contracted remote response time starts with the confirmation of an incident by the help desk.

The product/license type as well as the ID for the respective software and contract number must be specified in the call.

- Service time

The service time is the contractually agreed period in which service is provided on a remote basis. The standard service time varies between countries.

Standard service time

Please see details for respective country under ts.fujitsu.com/support-terms

- Remote response time

The remote response time designates the time period between call acceptance and when a specialist starts to solve the problem via the phone or remote access. The remote response time begins within the agreed service time after the call has been accepted; the measurement of time is stopped outside the agreed service time. In other words, it can last until the next day which is covered by the service time.
REMOTE SERVICE
As part of the Support Services Fujitsu provides reliable remote access functions which support fast and efficient fault diagnosis and, if necessary, eliminate errors. Remote access to a customer system is only carried out with the customer's approval which can be granted generally or on a case-by-case basis; it usually requires Internet access.

PREREQUISITES
The following prerequisites apply for the service contract. Should one or more of the prerequisites not be met, the services described can only be provided in a restricted manner or possibly not at all.

• Remote access
It is assumed with Fujitsu Support Pack Software services that remote access is available for Fujitsu. If the customer does not wish to provide any remote access or this cannot be configured for some other reason, the agreed service levels cannot always be met in every situation.

• System changes
The Fujitsu Support Pack Software Services can only be provided if the customer provides Fujitsu immediately and in writing with details of all the modifications to the service-authorized software product (e. g. changes to the licensing model). In the event of any extension, the same service option must be agreed as the one in the existing contract.

LEGAL INFORMATION / GENERAL TERMS AND CONDITIONS
The product, delivery and service features described above include a final list of the features of the subject of the contract and do not represent a guaranteed quality or declaration thereof in the eyes of the law.

In addition to this data sheet, the following general business terms and conditions of Fujitsu Technology Solutions in the respective local version apply (see ts.fujitsu.com/support-terms):
• "General terms and conditions for hardware and software support services of Fujitsu Technology Solutions"
• "Supplemental terms for Fujitsu Support Packs"

Concerning individual conditions of the individual Software Support offering, there is more information available on the produce specific Technical Appendix.
Options

The following table provides an overview of standard service level options. The availability of a specific service level depends on the respective product.

<table>
<thead>
<tr>
<th>Service options</th>
<th>Support Pack 9x5</th>
<th>Support Pack 24x7</th>
</tr>
</thead>
<tbody>
<tr>
<td>Service time 1)</td>
<td>9x5</td>
<td>24x7</td>
</tr>
<tr>
<td>Remote response time *</td>
<td>4 h / NBD</td>
<td>4 h / ND</td>
</tr>
<tr>
<td>Provision of</td>
<td>On request and in agreement</td>
<td>On request and in agreement</td>
</tr>
<tr>
<td>software corrections and patches</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Provision of new software versions</td>
<td>According to product specific Technical Appendix</td>
<td>According to product specific Technical Appendix</td>
</tr>
</tbody>
</table>

Remark: * Severity Levels
The remote response times listed above designate the service level for severity level 1 / 2 - 3 faults

1) Explanation of service times:
   9x5 - Local business hours on local business days except legal public holidays
   Further details see ts.fujitsu.com/support-terms
   24x7 - Monday to Sunday including legal public holidays, 24 hours
   NBD: Next business day
   ND: Next day
More information

Fujitsu Portfolio
Product Related Services ensure system availability and business continuity of customers' IT systems during all phases of a product's lifecycle. Depending on the criticality of IT systems and processes customers can choose between reactive services and proactive/preventive services. Product Related Services can be added to both hardware and software product in perfectly tailored packages.

Fujitsu Portfolio
Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation’s reliability.
