Workplace Embedded Tools

BIOS Integrated Tools

Workplace Embedded Tools are a set of intelligent tools integrated in the BIOS of a single device. They help to offload the IT department's daily workload by offering routine functions to keep a device up-to-date. Additional security functionality protects and prevents access to vital business data. Increase Productivity through uninterrupted operation as maintenance tasks are performed on each device without disturbing the user. TCO are kept low as the tools are BIOS integrated and do not require additional software to function properly.

Workplace Embedded Tools offer the following features:

- Auto BIOS Update
 - BIOS Update from Fujitsu server (license free)
 - BIOS Update from the customer's own customized servers
- Easy PC Protection

Auto BIOS Update

During the BIOS Post a device checks for new BIOS versions. The update frequency can be configured.

- Basic Version (license free)
The latest BIOS Version is automatically downloaded via the Internet from a Fujitsu Server
- Advanced Version
Customers can define their own server, store the BIOS files and distribute the released BIOS versions automatically

Benefits:

- Basic Version (license free)
Customers without their own administrators can download and update the latest BIOS version automatically via the internet from a Fujitsu Server
- Advanced Version
Customers with their own administrators can release and distribute the selected BIOS versions automatically from their own server

Auto BIOS Update will be configured with Workplace Manager or directly in the BIOS.

Easy PC Protection

During the boot process a device checks whether it's predefined sever is available. If a device can contact the server and is allowed to boot at a certain time, the device is booted without any BIOS password. In other cases the user has to enter the BIOS password. The administrator can define time intervals where booting a device without BIOS password is allowed.

Benefits:

- If the company's network is not accessible (within a predefined time), a password is required to boot the device
- Anti-Theft function: Stolen devices can't be booted
- Unauthorized users can't boot a device without a password
- Administrators can lock the devices at specific time intervals

Easy PC Protection can be configured with Workplace Manager.

Product version	Order Number
Workplace Embedded Tools	<p>The license is included in the following products: FUJITSU Desktop ESPRIMO Q/D/P556/2, D/P757, Q/D/P957</p> <p>For other supported products, the order code is S26361-F2542-E437</p>

The license will be written in the BIOS of a single device.

Features	Benefits
Auto BIOS Update	Keeps the BIOS version of a device automatically updated
Easy PC Protection	Locks a device's BIOS, if booted outside the enterprise's network

Workplace Embedded Tools

Supported Client Computing Devices

- An overview of supported devices can be found on our Web pages ([Feature Finder](#))

Additional Tools

- Workplace Manager

Operating System Requirements

- The configuration tool Workplace Manager is compatible with
 - Windows Server® 2012 Standard, 64 Bit
 - Windows Server® 2012 R2 Standard, 64 Bit

More information

Fujitsu OPTIMIZATION Services

In addition to Fujitsu Workplace Embedded Tools, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Dynamic Infrastructures

With the Fujitsu Dynamic Infrastructures approach, Fujitsu offers a full portfolio of IT products, solutions and services, ranging from clients to datacenter solutions, Managed Infrastructure and Infrastructure as a Service. How much you benefit from Fujitsu technologies and services depends on the level of cooperation you choose. This takes IT flexibility and efficiency to the next level.

Computing products

www.fujitsu.com/global/services/computing/

- PRIMERGY: Industrial standard server
- SPARC Enterprise: UNIX server
- PRIMEQUEST: Mission-critical IA server
- ETERNUS: Storage system
- BS2000 mainframes

Software
