# Simplify your Workday

Fujitsu Tablets and Notebooks

shaping tomorrow with you

**FUJITSU**

A photograph of two business professionals, a man and a woman, looking at a tablet together outdoors. The woman is in the foreground, smiling and looking at the tablet. The man is partially visible behind her, also looking at the tablet. They are both dressed in business attire. The background is a blurred outdoor setting with some greenery and a building.

## Mobility at Work.

Business enterprises are relying more and more on mobile devices. This reflects the paradigm shift toward increased mobility in today's society, and by embracing mobile devices enterprises stand to profit from the undeniable benefits delivered by mobile systems. Businesses can thus reach out to a new generation of employees – the digital natives – while gradually moving toward digital work processes and enabling employees to reach a satisfactory work-life balance. At the same time, enterprises are becoming more efficient and competitive through higher workforce productivity, optimized and digitized business processes, and improved customer services. To make sure that your mobile strategy will boost your business, Fujitsu offers a truly unique portfolio of tablets and notebooks that makes it easier for employees to perform the daily tasks found in any work environment.

## ➡ Fujitsu tablets and notebooks deliver outstanding performance and convenience no matter the task.

This applies to 2 in 1 devices, specialized tablets and notebooks: Users of Fujitsu mobile devices are ready to take on the challenges of any work situation and can rely on constant connectivity, uncompromising security and a superb user experience.

Equipped with the latest 8th Generation Intel® Core™ vPro™ processor family, Fujitsu mobile devices deliver added value to users as well as business enterprises. Intelligent and flexible performance makes multitasking much less daunting, so users can approach even sophisticated applications with confidence. Smart security effectively safeguards sensitive business data. And cost-saving manageability reduces the administrative workload of enterprise mobile communication. Features like these make all work experiences more enjoyable and ensure the highest levels of user satisfaction. What's more, productivity is driven to higher levels – and the cost of operating enterprise mobile devices is significantly reduced.

FIND OUT HOW MOBILE DEVICES FROM FUJITSU CAN OPTIMIZE ENTERPRISE PROCESSES AND DELIVER MORE USER CONVENIENCE IN MANY DIFFERENT TASKS AND INDUSTRIES.

## Management and Frequent Travelers

Executives must cope with a volatile, extremely dynamic and ever-changing environment. Disruptive technologies are fundamentally changing business, society and life in general. Markets are experiencing unprecedented transformation, data analyses are replacing hunches and intuition, and constant change is the norm. It is absolutely vital that managers be in a position to ask the right questions at the right time. Fujitsu tablets and notebooks are travel and business companions that help to cut through and make process management much simpler – and thus give executives the freedom they need to address decisive business questions.

Fujitsu's mobile devices and Windows 10 Pro put convenience and productivity at your fingertips. You benefit from a new user experience, enhanced mobility, great manageability and security, as well as networking capabilities.

## Aviation and Transportation

Those people who manage the constantly growing number of passengers and complexities of freight logistics need to have uncompromising IT performance at their disposal around the clock to make sure that schedules are met. Fujitsu tablets and notebooks are the devices of choice when it comes to ease of use, connectivity, top performance and proven reliability. Users can focus their full attention on what really matters: keeping the world in motion every day. Their ultimate goal is to ensure high levels of mobility on land, sea and in the air.

**More information:**  
<https://workplace.global.fujitsu.com/>

**FLIGHT MANAGEMENT IS ONE OF THE MOST IMPORTANT CHALLENGES FACING TODAY'S PILOTS. THE VOLUME OF DATA REQUIRED IS ENORMOUS.** The **FUJITSU Tablet STYLISTIC R727** is the ideal electronic flight bag that makes life in the cockpit much easier. Navigation data, airport maps, operating manuals and updated information about fuel consumption and other key parameters are available instantly with this sleek 2 in 1 device.

- Simply attach the magnetic keyboard and the tablet is transformed into a notebook
- Ideal device for writing e-mails and checking work schedules when traveling
- When the tablet is set in the cradle, users can enjoy a desktop experience in the office or at home

Fujitsu tablets and notebooks give you the freedom to design your work processes efficiently – in the office and on the go.

**CHECK-IN AND BOARDING ARE USUALLY THE FIRST POINTS OF PERSONAL CONTACT BETWEEN THE PASSENGER AND THE AIRLINE.** Check-in and boarding processes that are customer-centric and professional set the stage for making the entire passenger experience pleasant and satisfying. The **FUJITSU Notebook LIFEBOOK U7 Series** dramatically enhances this experience.

- Impressive performance with the latest Intel® Core™ vPro™ processors
- Perfect device for mobile check-in and boarding station for demanding airlines
- Backlit keyboard, large touch pad and a brilliant display support service-centric operations

**WHEN COORDINATING SUPPLY CHAINS AND DELIVERIES, LOGISTICS MANAGERS MUST BE ABLE TO ORCHESTRATE DATA STREAMS RELIABLY.** The **FUJITSU Tablet STYLISTIC V727** with the latest 8th generation Intel® Core™ processor technology is the ideal choice for this purpose – it combines the flexibility of a durable tablet with the power of a notebook.

- Clever fanless design with a durable magnesium lid and powerful magnetic keyboard
- A 12.3-inch (31.2 cm) anti-glare FHD display with pen support and automatic backlight adjustment
- Instantly switches from tablet mode to full-performance notebook mode when the backlit keyboard is attached

**DURING REPAIR AND MAINTENANCE SERVICE ENGINEERS MUST INSPECT EVERY AIRCRAFT COMPONENT WITH IN-DEPTH PRECISION.** The **FUJITSU Tablet STYLISTIC Q738** is an extremely durable and secure 2 in 1 detachable which is the ideal device for this scenario.

- The 13.3-inch (33.8 cm) FHD anti-glare display with pen and touch support ensures excellent performance
- The magnesium case and reinforced corners provide strength under tough working conditions
- The light weight (at just 796 grams) makes mobile work effortless, especially with the Wacom AES pen

## Healthcare

Today many doctors and nursing staff still have to gather data manually and then enter the information using a stationary PC. Repetitive tasks are time consuming, data entry by hand increases the risk of error. Paper-based data is not always available where needed or accessible when wanted. Fujitsu tablets optimize these processes by providing secure, mobile data input capabilities and access to electronic patient information anytime and anywhere in real-time, thus giving doctors and nursing staff more time to spend with their patients for better care.

CARING FOR PATIENTS IN HOSPITALS OFTEN INVOLVES A LOT OF STRESS. DOCTORS AND NURSING STAFF MUST REACT TO CONSTANTLY CHANGING WORKING CONDITIONS WITH A HIGH DEGREE OF ACCURACY. The lightweight and easy-to-read **FUJITSU Tablet STYLISTIC V727** is the perfect choice for healthcare environments.

- The FHD anti-glare display ensures brightness and readability at all times
- Touch support and the Wacom AES pen with 4K pressure levels makes note-taking quite easy
- The magnetic backlit keyboard transforms the mobile device into a full-fledged office system.

GENERAL PRACTITIONERS WHO COMMUTE BETWEEN THEIR OFFICES AND HOSPITALS MUST MAKE SURE THAT THEY CAN SERVE THEIR PATIENTS BEST ACROSS SEVERAL LOCATIONS. EFFICIENT ACCESS TO ARCHIVED ELECTRONIC MEDICAL DATA OPTIMIZES PROCESSES CONSIDERABLY. The **FUJITSU Tablet STYLISTIC R727** is the ideal device for this scenario as it combines the flexibility and light weight of a tablet with the productivity of a notebook.

- The anti-glare display enables users to write notes or signatures with a digital pen
- Effortlessly delivers the power needed to run demanding applications, with a runtime spanning a full day
- Reports can be viewed on a larger display by simply docking the tablet into the cradle

DOCTORS AND NURSING STAFF MUST COMPLETE DIVERSE TASKS DURING THE WORKDAY. The **FUJITSU Tablet LIFEBOOK P728** supports these multi-mode work styles with ease.

- Weighing just 1.2 kg, the device takes the productivity of mobile users to the next level
- The anti-glare display with 12.5-inch FHD screen ensures an uncompromising viewing experience
- Extended battery runtime gives users the freedom they need for long workdays

OPTIMIZED DATA INPUT AND REAL-TIME INFORMATION HAVE AN IMPACT ON THE QUALITY OF HEALTHCARE PROCESSES TODAY. The extremely robust and secure 2 in 1 detachable **FUJITSU Tablet STYLISTIC Q738** ensures high levels of convenience at work.

- The 13.3-inch (33.8 cm) FHD anti-glare display delivers a great viewing experience
- Touch and pen support with 4K pressure levels makes data input very flexible
- The cradle with backlit keyboard dock transforms the tablet into a full-fledged notebook in seconds

THE CONSISTENT FLOW OF INFORMATION IN HEALTHCARE PROCESSES DEMANDS COMPLETE ACCESS TO PATIENT INFORMATION. The **FUJITSU Notebook LIFEBOOK S938** is ideal for this scenario with features like fast data access, extremely long battery runtime and best-in-class data protection.

- The 13.3-inch (33.8 cm) high-resolution screen brilliantly displays images that are sharp and crisp
- Battery runtime of 21 hours ensures data access even for the longest shift
- Embedded PalmSecure™ technology provides maximum security and data protection

## Experience the natural writing experience on Fujitsu notebooks and tablets

The stylus was probably one of the first tools ever invented. Thus it should come as no surprise that the stylus is making a comeback in the digital age. To date most computer input pens have not been well-suited for writing, drawing and marking. But Fujitsu tablet devices are different. They have been optimized for use with the new-generation digital 4K stylus. This multifunction tool gives users a natural writing experience – it's just like using an ink pen.

### More information:

<https://workplace.global.fujitsu.com/>

**THE NEW STYLUS – JUST YOUR STYLE.** A stylus is a writing implement that works by touch or pressure, rather than with ink. For a tablet it usually looks a bit like a pen, and can be used to select options, write, or draw on a touchscreen. With its high degree of precision and reliability, the stylus assures a seamless writing/drawing experience. Like a natural extension of your hand, inspiring you to be more creative digitally. It is a very handy tool designed for simplified operation of a tablet PC (2-1, Slate) device, be it for taking notes and OCR text conversion identification, digital signature, drawing, etc. A stylus allows you to use it much like you would a typical ink pen making it easy to work on a variety of applications that allow you to write and draw in freehand using just your tablet and a stylus. Fujitsu tablets are optimized with a 4K stylus for smart usage – even with some apps.

**NATURAL WRITING EXPERIENCE** – Like a natural extension of your hand.

**UNMATCHED PRECISION** – Reliable response, regardless of the size of the target location on the screen

The Digital Pen Experience

**CLEAN** – Screen is protected from unhygienic stains

**WEATHER AGNOSTIC** – Easy to use, even with gloves.

**SAFE** – Screen is protected from potential scratches

### Highly precise natural behavior

The digitizer has multiple electrostatic coils arranged orthogonally (X-axis, Y-axis) to each other. One coil and the pen coil act as the transmitting unit; the others act as receiving units. The transmitting unit generates an electric field. The generated electric charge is detected according to the electric field which has been identified on the receiving unit.

## Enjoy innovative features that make your work much easier

Security, connectivity, ease of use: It's the details that determine how enjoyable the user experience will be. And it's these details that really pay off in the business world – if everything is done right, users are more satisfied and their productivity increases. This attention to details is what makes Fujitsu tablets and notebooks different from all the others. Discover the innovative features that will make your work and your life much easier.

### More information:

<https://workplace.global.fujitsu.com/>

## → Mobility features that matter.

### PALM VEIN SENSOR

Identify yourself with your hand – it's easy, natural and very reliable.

### FAMILY PORT REPLICATOR CONCEPT

A port replicator that supports easy connectivity while also reducing complexity and costs.

### USER EXCHANGEABLE BATTERY

The ideal feature for light travelers – take Fujitsu notebooks and tablets along without any need for a battery charger!

### PULL OUT LAN CONNECTOR

High-speed LAN within two seconds? It's easy, and you will never need an adapter again.

### 4G LTE TECHNOLOGY

The best connectivity – no matter where you are.

### FAST CHARGING BATTERY

80% battery recharge in 60 minutes, saving 30 minutes in comparison to standard battery recharging time.

### FAN-LESS DESIGN

Enjoy a quiet work experience.

### NEAR FIELD COMMUNICATION

Ready for contactless short-range data exchange. A wide range of application options – e.g., in micro-payment, access control and component identification/inspection.
