## About ETERNUS Multipath Driver for Windows

ETERNUS Multipath Driver for Windows (hereafter referred to as "Multipath Driver") is based on Microsoft Storage Technologies - MPIO framework. Multipath Driver is equivalent to Device Specific Module (DSM) in MPIO framework.

## Supported Operation System (OS) Versions

This table shows the versions of Windows supported by Multipath Driver.

| Supported OS Versions   | Multipath Driver Version Level |
|---|--------------------------------|
| Microsoft® Windows Server® 2008 Standard<br>Microsoft® Windows Server® 2008 Enterprise<br>Microsoft® Windows Server® 2008 Datacenter<br>Microsoft® Windows Server® 2008 for Itanium-Based Systems<br>Microsoft® Windows HPC Server® 2008                | V2.0L14 or later               |
| Microsoft® Windows Server® 2008 R2 Standard<br>Microsoft® Windows Server® 2008 R2 Enterprise<br>Microsoft® Windows Server® 2008 R2 Datacenter<br>Microsoft® Windows Server® 2008 R2 for Itanium-Based Systems<br>Microsoft® Windows HPC Server® 2008 R2 | V2.0L16 or later               |
| Microsoft® Windows Server® 2012 Essentials<br>Microsoft® Windows Server® 2012 Standard<br>Microsoft® Windows Server® 2012 Datacenter  | V2.0L19 or later               |
| Microsoft® Windows Server® 2012 R2 Essentials<br>Microsoft® Windows Server® 2012 R2 Standard<br>Microsoft® Windows Server® 2012 R2 Datacenter<br>Microsoft® Windows Storage Server® 2012 R2 Standard  | V2.0L20 or later               |
| Microsoft® Windows Server® 2016 Essentials<br>Microsoft® Windows Server® 2016 Standard<br>Microsoft® Windows Server® 2016 Datacenter  | V2.0L23 or later               |
| Microsoft® Windows Server® 2019 Essentials<br>Microsoft® Windows Server® 2019 Standard<br>Microsoft® Windows Server® 2019 Datacenter  | V2.0L24 or later               |

### For Windows Server 2008

The architecture types of x86 (32-bit), x64 and IA64 (Itanium) are supported.

The software levels of SP1 (no SP applied) and SP2 are supported. SP2 is supported by V2.0L14 or later.

### For Windows Server 2008 R2

The architecture types of x64 and IA64 (Itanium) are supported.

The software levels of SP0 (no SP applied) and SP1 are supported. SP1 is supported by V2.0L16 or later.

### For Windows Server 2016

Nano Server is not supported.

### For Windows Server 2019

Nano Server is not supported.

Hyper-V are supported, see also [Hyper-V environment](#).

## Supported Storage Systems

Multipath Driver supports the following storage systems.

- ETERNUS DX60 S2
- ETERNUS DX80 S2
- ETERNUS DX90 S2
- ETERNUS DX60 S3
- ETERNUS DX60 S4
- ETERNUS DX60 S5
- ETERNUS DX100 S3
- ETERNUS DX100 S4
- ETERNUS DX100 S5
- ETERNUS DX200 S3
- ETERNUS DX200 S4
- ETERNUS DX200 S5
- ETERNUS DX200F
- ETERNUS AF150 S3
- ETERNUS AF250
- ETERNUS AF250 S2
- ETERNUS AF250 S3
- ETERNUS DX400 S2 series
- ETERNUS DX500 S3
- ETERNUS DX500 S4
- ETERNUS DX500 S5
- ETERNUS DX600 S3
- ETERNUS DX600 S4
- ETERNUS DX600 S5
- ETERNUS AF650
- ETERNUS AF650 S2
- ETERNUS AF650 S3
- ETERNUS DX900 S5
- ETERNUS DX8000 S2 series
- ETERNUS DX8000 S3 series
- ETERNUS DX8900 S4

### ETERNUS DX60 S2, ETERNUS DX80 S2, ETERNUS DX90 S2

| Storage System  | Multipath Driver Product Names                                | Version Level    |

## Virtualization Environments

| Virtualization Environments | Running on Host OS | Running on Guest OS |
|-----------------------------|--------------------|---------------------|
| <a href="#">Hyper-V</a>     | Supported          | Supported           |
| VMware                      | N/A                | Not Supported       |
| Linux Xen                   | N/A                | Not Supported       |
| Linux KVM                   | N/A                | Not Supported       |

## Hyper-V environment

Multipath Driver must be installed in the OS which see the multipath connections to the LUNs.

The figure above to the left is for a LUN on storage system that is recognized on Host OS. In a configuration like this, Multipath Driver must be installed in Host OS.

The figure above to the right is for a LUN on storage system is not recognized on Host OS. The Guest OS directly recognizes the LUN on storage system without going through Host OS. For example, if you install MS iSCSI Initiator in Guest OS, the right figure is applied. Multipath Driver must be installed in the Guest OS.

### CAUTION

- For the configuration shown above in the figure to the left, even if the LUN on the Host OS is configured to be seen by the Guest OS, Multipath Driver does not need to be installed in Guest OS.
- The host interface which supports the configuration shown above in the figure to the right is iSCSI and Virtual Fibre Channel.
- When use Virtual Fibre Channel,It is necessary to connect FC switch corresponding to NPIV.

### The supported Host OS of Multipath Driver.

- Microsoft Windows Server 2008 Standard (x64)
- Microsoft Windows Server 2008 Enterprise (x64)
- Microsoft Windows Server 2008 Datacenter (x64)
- Microsoft Windows Server 2008 R2 Standard (x64)
- Microsoft Windows Server 2008 R2 Enterprise (x64)
- Microsoft Windows Server 2008 R2 Datacenter (x64)
- Microsoft Windows Server 2012 Standard (x64)
- Microsoft Windows Server 2012 Datacenter (x64)
- Microsoft Windows Server 2012 R2 Standard (x64)
- Microsoft Windows Server 2012 R2 Datacenter (x64)
- Microsoft Windows Server 2016 Standard (x64)
- Microsoft Windows Server 2016 Datacenter (x64)
- Microsoft Windows Server 2019 Standard (x64)
- Microsoft Windows Server 2019 Datacenter (x64)

### The supported Guest OS of Multipath Driver.

- Microsoft Windows Server 2008 Standard (32-bit, x64)

- Microsoft Windows Server 2008 Enterprise (32-bit, x64)
- Microsoft Windows Server 2008 Datacenter (32-bit, x64)
- Microsoft Windows Server 2008 R2 Standard (x64)
- Microsoft Windows Server 2008 R2 Enterprise (x64)
- Microsoft Windows Server 2008 R2 Datacenter (x64)
- Microsoft Windows Server 2012 Essentials (x64)
- Microsoft Windows Server 2012 Standard (x64)
- Microsoft Windows Server 2012 Datacenter (x64)
- Microsoft Windows Server 2012 R2 Essentials (x64)
- Microsoft Windows Server 2012 R2 Standard (x64)
- Microsoft Windows Server 2012 R2 Datacenter (x64)
- Microsoft Windows Server 2016 Essentials (x64)
- Microsoft Windows Server 2016 Standard (x64)
- Microsoft Windows Server 2016 Datacenter (x64)
- Microsoft Windows Server 2019 Essentials (x64)
- Microsoft Windows Server 2019 Standard (x64)
- Microsoft Windows Server 2019 Datacenter (x64)

## Channel Adapter ID and Connection Points

CAID is the information displayed on the Multipath Manager window and it can identify the location of the port in the storage system.

CAID is different from a physical port number. To confirm a physical port number, refer to the manual of the storage system. Please note that the port position and the physical port number depend on the type of storage system.

## Assigned-/ Non-assigned-CM Type Storage Systems

For ETERNUS, there are two system types: “Assigned-CM” and “Non-assigned-CM.” With Assigned-CM storage systems, the main access path for each LU is assigned to a particular controller. With Non-assigned-CM storage system, there are no assigned LU access paths as such.

With “Assigned-CM” type storage systems, the path connected to the assigned controller is active. Paths to other controllers are on standby. With “Non-assigned-CM” type storage systems, all paths are active and used for access.

The table below shows the “Assigned-CM” and “Non-assigned-CM” storage systems.

Load balancing/fail over performance can differ depending on “Assigned-CM” and “Non-assigned-CM” use and the number of paths employed. For details, refer to the supplied product manual.

**Notes**

---

**1. LUN mapping**

If LUN mapping in the storage system is not set properly, Windows may not recognize LUNs correctly. For proper LUN mapping, the LUN numbers Windows recognizes must be in ascending order from LUN 0.

---

**2. HBA driver settings**

If the HBA driver settings are not correct, Windows may not recognize LUNs correctly. For proper HBA driver settings, follow the instructions written in the “Disk Storage System Server Connection Guide” or “User Guide – Server Setting Guide” that comes with the storage system.

---

## Multipath Driver Updates

The following table shows the updates for each Multipath Driver version:

| Version No.              | Detail   |
|--------------------------|--|
| V2.0L10<br>(Jan / 2005)  | <ul style="list-style-type: none"> <li>First edition</li> <li>- Added Microsoft MPIO framework</li> <li>- Added support for iSCSI</li> <li>- Added support for Storport Miniport</li> </ul>  |
| V2.0L11<br>(Jul / 2005)  | <ul style="list-style-type: none"> <li>- Added support for Windows Server 2003 x64</li> <li>- Included the GR Multipath Driver V1.0L14</li> </ul>  |
| V2.0L12<br>(Jun / 2006)  | <ul style="list-style-type: none"> <li>- Added support for the ETERNUS4000 and ETERNUS8000</li> <li>- Added support for the QLogic Storport Miniport driver</li> <li>- Added support for load balancing in the MSCS environment (added a function to convert SCSI2 Reserve to Persistent Reserve)</li> <li>- Added a function to collect an event log for the following sense information: 06/fb80 (Sense key = 0x06, ASC = 0xfb, ASCQ = 0x80)</li> </ul>  |
| V2.0L13<br>(Aug / 2007)  | <ul style="list-style-type: none"> <li>- Added support for the ETERNUS2000</li> </ul>  |
| V2.0L14<br>(Apr / 2008)  | <ul style="list-style-type: none"> <li>- Added support for Windows Server 2008</li> <li>- Added support for SAS</li> <li>- Added event log ID=305 (detection of no controller redundancy in the storage system)</li> </ul>   |
| V2.0L15<br>(Jun / 2009)  | <ul style="list-style-type: none"> <li>- Added support for the ETERNUS DX series</li> <li>- Discontinued the client version package that was included in the product</li> <li>- Discontinued the HTML version user's guide</li> </ul>  |
| V2.0L16<br>(Oct / 2009)  | <ul style="list-style-type: none"> <li>- Added support for Windows Server 2008 R2</li> <li>- Improved the path switching process when path failures occur</li> <li>- Added a function to collect an event log for the following sense information: 06/fb8x (Sense key = 0x06, ASC = 0xfb, ASCQ = 0x8x)</li> </ul>  |
| V2.0L17<br>(Oct / 2010)  | <ul style="list-style-type: none"> <li>- Added a function to set timeout information of the Emulex Storport Miniport driver</li> <li>- Added a function to monitor I/O response time</li> <li>- Added a function to monitor the recurrence of path reconnection errors</li> <li>- Added a function to scan devices</li> <li>- Added the following event logs<br/>ID=203, 204, 306, 308, 310, 311, 1014, 2000, 2002, 2004, 2012, 2022, 2032,2100</li> <li>- Changed some parts of character strings that are displayed in the description column of the following event logs:<br/>ID=201, 202, 301, 304, 305, 401, 402, 403, 1010, 1020, 1030, 1040, 1050,1051, 1100, 1200</li> </ul> |
| V2.0L18<br>(June / 2011) | <ul style="list-style-type: none"> <li>- Added support for the ETERNUS DX80 S2, DX90 S2, and DX400 S2 series.</li> <li>- Added the function the warning status remains for six minutes.</li> </ul>   |
| V2.0L19<br>(Nov / 2012)  | <ul style="list-style-type: none"> <li>- Added support for Windows Server 2012</li> </ul>  |
| V2.0L20<br>(Jul / 2013)  | <ul style="list-style-type: none"> <li>- Added support for the TPG Referrals function. For details, refer to "ETERNUS Web GUI User's Guide ETERNUS DX80 S2/DX90 S2, ETERNUS DX410 S2/DX440 S2, ETERNUS DX8100 S2/DX8700 S2" (tenth edition or later)</li> <li>- Added a function to set timeout information to the Emulex Storport Miniport driver that has the file name elxfc.sys</li> <li>- Added the following event logs:<br/>ID=312 and 313</li> </ul>   |
| V2.0L21<br>(Jul / 2014)  | <ul style="list-style-type: none"> <li>- Added support for the Storage Cluster function.</li> </ul>  |

---

| Version No.             | Detail   |
|-------------------------|--|
| V2.0L22<br>(Jul / 2015) | - Added support for the ETERNUS DX8700 S3/DX8900 S3. |
| V2.0L23<br>(Dec / 2016) | - Added support for Windows Server 2016              |
| V2.0L24<br>(Jan / 2019) | - Added support for Windows Server 2019              |
