# Empowering Work Life Shift

Remote work solutions from Citrix powered by Fujitsu Integrated System PRIMEFLEX for Nutanix Enterprise Cloud

The COVID-19 pandemic has fundamentally changed the way we work and interact, pushing many organizations to adopt remote work policies rapidly. Adressing the evolving needs of the workforce in a way that is both versatile and efficient, Virtual Desktop Infrastructure (VDI) solutions from Citrix have become increasingly relevant in a post-pandemic world.

For organizations looking to deploy or expand their VDI infrastructure, Hyper-Converged Infrastructures (HCI) provide a robust and efficient foundation for Citrix VDI deployments. They offer not only simplified management, scalability, performance optimization, high availability, cost efficiency, and data efficiency, but also integrated backups and disaster recovery as well as support for hybrid and multi-cloud environments.

Citrix VDI on Fujitsu Integrated System PRIMEFLEX for Nutanix Enterprise Cloud offers a synergistic solution that combines the performance, scalability, and simplicity of a Nutanix HCI environment with the user experience and management capabilities of Citrix. This combination empowers organizations to deliver reliable, high-performance virtual desktops to their users while optimizing infrastructure efficiency and reducing costs.

## Benefits for your VDI environment

- Simplified deployment and management
- Scalability and flexibility
- Performance optimization
- Cost efficiency
- High availability and resilience
- Integrated disaster recovery
- Enhanced security
- Support for hybrid clouds

# PRIMEFLEX for Nutanix Enterprise Cloud
# Laying the on-premises foundation of your hybrid multi-cloud environment

Pre-configured and rigorously tested in advance, PRIMEFLEX for Nutanix Enterprise Cloud from Fujitsu offers IT organizations a seamless solution that includes all IT infrastructure components and software for Citrix VDI deployments. With a standardized implementation and accompanying infrastructure support service, PRIMEFLEX for Nutanix Enterprise Cloud significantly enhances the user experience across the entire life cycle of a Hyper-Converged Infrastructure – from initial deployment to ongoing operation and maintenance.

**Fujitsu VDI Assessment Service – your road to success**
In addition to a robust infrastructure foundation for VDI deployments, Fujitsu offers a VDI Assessment Service. This service helps assess the suitability of Virtual Desktop Infrastructures for your organization and provides tailored support to deliver a world-class VDI solution aligned with your infrastructure and business needs.

**Simplified deployment and management**
PRIMEFLEX for Nutanix Enterprise Cloud integrates computing, storage, and networking into an easily managed solution. Deploying Citrix VDI on PRIMEFLEX for Nutanix Enterprise Cloud streamlines setup and management, reducing complexity and operational overhead.

**Performance optimization**
PRIMEFLEX for Nutanix Enterprise Cloud with features like distributed storage and data tiering, combined with Citrix's HDX technology, delivers high-performance VDI experiences, even in demanding use cases.

**High availability and resilience**
PRIMEFLEX for Nutanix Enterprise Cloud ensures high availability with built-in redundancy and failover capabilities, minimizing downtime and data loss risks for Citrix virtual desktops.

**Enhanced security**
PRIMEFLEX for Nutanix Enterprise Cloud provides robust security features like data encryption and access control, safeguarding sensitive data and applications in Citrix VDI deployments.

**Scalability and flexibility**
Citrix VDI on PRIMEFLEX for Nutanix Enterprise Cloud supports linear scalability, enabling seamless growth without compromising performance or user experience. This scalability is crucial for accommodating changing business requirements and user demand.

**Cost efficiency**
PRIMEFLEX for Nutanix Enterprise Cloud reduces costs by consolidating hardware resources, eliminating separate storage arrays, and reducing capital and operating expenses. The Nutanix infrastructure makes deploying Citrix VDI solutions more affordable.

**Integrated disaster recovery**
PRIMEFLEX for Nutanix Enterprise Cloud provides native support for disaster recovery, enabling replication of virtual desktops and data across dispersed sites, thus ensuring business continuity alongside Citrix's VDI solutions.

**Support for hybrid cloud**
PRIMEFLEX for Nutanix Enterprise Cloud supports hybrid cloud deployments, allowing seamless extension of VDI environments to public cloud platform and maintaining a consistent user experience with Citrix across different environments.
