Top reasons
to invest in

FUJITSU Storage
ETERNUS CS200c

Data Platform for the Digital World

POWERED BY **COMMVault** 

The FUJITSU Storage ETERNUS CS200c Powered by Commvault® simplifies data protection and management in a single integrated solution for the digital world. Industry-leading software from Commvault is perfectly aligned with powerful Fujitsu system technology providing excellent features for business efficiency and continuity. The appliance addresses the challenges in protecting business applications, virtualized and hyper-converged environments and facilitates compliance with regulations including GDPR.

shaping tomorrow with you

FUJITSU

SIMPLICITY IS THE KEY

The ETERNUS CS200c is pre-loaded and pre-configured; ready to go – from “power up to back up” in thirty minutes.

Your advantages:

- “Out-of-the-box” approach lowers implementation time up to 60% and significantly reduces infrastructure spending
- Protects critical applications, virtual platforms and operating systems saving outstanding administration and training efforts
- Advanced automation minimizes manual failures and data loss

AFFORDABLE BUSINESS CONTINUITY

The ETERNUS CS200c meets SLA requirements and modernizes, unifies and simplifies your disaster recovery.

Your advantages:

- Integrated replication provides off-site protection and recovery ensuring that business-critical data is protected, even if disaster strikes
- Snapshot capabilities reduce the average RPO/RTO ensuring uninterrupted business operations
- High automation makes testing disaster recovery easy and repeatable and reaches productivity gains, both tactically and strategically

LEADING DATA PLATFORM FOR THE DIGITAL WORLD

The ETERNUS CS200c provides an Enterprise Data Management Platform which empowers you to protect and manage your data everywhere from a single console anywhere.

Your advantages:

- Simplifies IT environments and streamlines data management operations reducing both capital and operating expenses
- Combines backup and archiving in one solution bringing down infrastructure cost and reducing complexity
- Global source-side deduplication lowers data volume by 90%, improves resource usage and reduces overall costs.
- Consolidates critical data protection, compliance and discovery operations in one unified solution making it a key foundational element for GDPR compliance

SMARTEST BACKUP FOR BUSINESSES OF ALL SIZES

The integrated appliance provides a single platform and index, including backup, deduplication, archiving, disaster recovery, replication and more for businesses of all sizes.

Your advantages:

- Protects data across every platform (physical, virtual, converged, hyper-converged, cloud) consolidating infrastructure and cutting costs
- Broad range of scale- and performance-optimized models to meet the needs of small to large enterprise data centers
- Native support of more than 30 cloud platforms, among them Microsoft Azure, Amazon, OpenStack and VMware clouds
- Archiving and backup to cloud or tape allow to manage annual data growth more efficiently

MODERN VIRTUAL ENVIRONMENT PROTECTION

The appliance supports cross-platform data backup and rich life-cycle management capabilities.

Your advantages:

- Deep hypervisor integration guarantees VM protection across converged, hyper-converged or cloud platforms
- Optimizes VM resource utilization and streamlines operation by automating complex tasks reducing time and cost
- Facilitate VM migrations by converting VMs to a different virtualization platform
- Recover VMs instantly with new “Live Recovery” options minimizing planned and unplanned downtime

EFFICIENT PROTECTION OF BUSINESS-CRITICAL APPLICATIONS

Deep application and hypervisor integration ensure databases are protected, compliant and accessible whenever needed.

Your advantages:

- One solution for all leading critical enterprise applications including SAP HANA, Oracle, Microsoft, Google Apps
- Fast, application-consistent backup massively improving RTO/RPO
- Automated snapshot management accelerates recovery and automates database archival
- Built-in support for MS Exchange DAG, SAP BR*Tools or Oracle RMAN cuts cost and downtime
