# Fast track to your VMware Software-Defined Data Center

PRIMEFLEX for VMware Cloud Foundation

Digital business demands are outpacing IT's ability to deliver at the speed required by the business, particularly when the data center is hardware-defined. IT infrastructures based on a Software-Defined Data Center architecture (SDDC) deliver greater responsiveness and agility into IT, creating a next generation data center foundation that's more cost-efficient, resilient, and adaptable to changing business scenarios.

To avoid disparate IT infrastructure that increases in complexity as businesses grow, data center customers increasingly see integrated systems as the go-to-alternative. PRIMEFLEX for VMware Cloud Foundation is a turnkey integrated system that includes all the hardware and software to simplify deployment of a large-scale hyper-converged software-defined data center infrastructure. It combines high performance, energy efficient Fujitsu PRIMERGY standard x86 servers, network switches from Extreme Networks® and VMware Cloud Foundation™, VMware's integrated platform that delivers enterprise-ready services for compute, storage, networking and security in combination with unique lifecycle management capabilities.

PRIMEFLEX
Software · Server · Storage · Connectivity
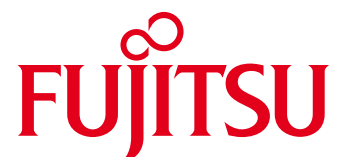

VMware Cloud Foundation

Key benefits *

- 15x faster time to market through turnkey integrated system delivery
- 20x faster application provisioning with self-service automation
- 30-40% lower TCO over a traditional 3-tier infrastructure

* based on internal VMware analysis and testing

FUJITSU

shaping tomorrow with you

Transform with confidence with PRIMEFLEX for VMware Cloud Foundation

Profit from Fujitsu's vast experience in deploying VMware infrastructure projects. As a global technology and service provider running 100+ data centers worldwide, Fujitsu has over 30 years' experience deploying and operating large data center infrastructures. If your organization is making the move to SDDC, PRIMEFLEX for VMware Cloud Foundation will make it a success.

Get fast time to value
Mitigate risk with turnkey factory-integrated delivery and benefit from 15x faster time to market to stand up your software-defined data center.

Enjoy high application performance
Get maximum performance with Fujitsu x86-servers enjoying the longest leadership positions in most of the VMware VMmark benchmark categories.

Get enterprise-class storage services
Benefit from VMware's leading hyper-converged architecture providing enterprise-class storage services and significantly simplified storage management.

Accelerate workload provisioning
Get 20x faster application provisioning through automated self-service operations.

Reduce ongoing day-to-day operations
Benefit from automated life-cycle management including upgrades and updates to reduce time spent on routine IT activities.

Deliver end-to-end security
Get end-to-end security for all applications across compute, storage and network infrastructure.

Grow as you go
Start as small as eight nodes and get non-disruptive linear scalability of compute and storage resources up to 8 server racks.

Enjoy world-class support
Get 24/7 support for the complete hardware and software stack with a single point of contact.

Simplify path to hybrid cloud
Dramatically simplify the path to hybrid cloud by delivering a common platform for private and public clouds, enabling a consistent operational experience.
