

Fast track to Nutanix HCI

PRIMEFLEX
for Nutanix

Digital business demands are outpacing IT's ability to deliver at the speed required by the business, particularly when the data center is hardware-defined and limited to an on-premises silo. IT infrastructures based on a multi-cloud, Software-Defined Data Center architecture (SDDC) deliver greater responsiveness and agility into IT, creating a next generation data center foundation that's more cost-efficient, resilient, and adaptable to changing business scenarios.

To avoid disparate IT infrastructure that increases in complexity as businesses grow, data center customers increasingly see multi-cloud, software-defined systems as the go-to-alternative. PRIMEFLEX for Nutanix is a turnkey integrated system supporting all popular hypervisors that includes all the hardware and software to simplify deployment across a range of choices from private, public and edge cloud infrastructure. It combines high performance, energy efficient PRIMERGY standard x86 servers and the Nutanix Cloud Platform that delivers enterprise-ready services for compute, storage, networking, virtualization and security. In combination with a standardized implementation and infrastructure support service, PRIMEFLEX for Nutanix dramatically simplifies the complete life cycle of a Nutanix-based hyper-converged IT infrastructure – from deployment, to operation, and maintenance.

Your advantages:

- Enjoy high application performance
- Grow as you go
- Simplify life cycle management
- Protect your business
- Reduce storage costs, save floor space, power and cooling
- Get fast time to production and one-stop support
- Simplify path to Hybrid IT

Transform confidently using PRIMEFLEX for Nutanix

If your organization is making the move to a multiple cloud deployment potentially spanning private cloud, public cloud and edge cloud, PRIMEFLEX for Nutanix will make it a success.

Get fast time to value

Mitigate risk with turnkey factory-integrated delivery and automated start up and benefit from 61% time savings to deploy, manage, and support.

Enjoy high application performance

Leverage high-performance PRIMERGY x86 servers to set up a responsive virtual IT infrastructure providing consistent IOPS with sub-millisecond response times.

Unify infrastructure management

Get a centralized view of both the physical and logical infrastructure across multiple nodes, clusters and clouds – from hardware device level to network topology to virtual machines.

Protect your business

Ensure your data is secure with a system that meets the most demanding government and commercial security standards. Achieve peace of mind with built-in automated security monitoring and self-healing.

Reduce infrastructure costs

Profit from hyper-converged infrastructure using local storage with multi-hypervisor support and reduce costs for maintaining a complex external SAN infrastructure.

Eliminate unplanned downtime

Built-in resiliency handles compute, storage, or network component failures – delivering 97% fewer unplanned outages.

Increase network security

Get fully integrated physical and virtual networking and higher levels of security by leveraging micro-segmentation.

Grow as you go

Get non-disruptive linear scalability for an endless number of systems, and an unlimited amount of raw storage.

World-class support

Get 24/7 support for the complete hardware and software stack with a single point of contact.

More time for value-added activity

Remove focus on maintaining infrastructure and move valuable staff resources to activities that create business value.
