

Fast track to Hybrid Multicloud

PRIMEFLEX for Nutanix

Digital transformation, driven by the proliferation of AI and cloud-native applications, has triggered a data explosion across distributed hybrid environments, dramatically increasing IT complexity. Traditional, siloed operating models and tools struggle to keep pace with the accelerating demand for innovative products and services and their rapid time-to-market.

To overcome these challenges, enterprises require a unified platform that simplifies application execution and data management across datacenters, edge locations, and public and managed clouds.

PRIMEFLEX for Nutanix, a joint solution by Fsas Technologies and Nutanix, provides a streamlined approach to deploying a modern hybrid multicloud platform that allows organizations to seamlessly manage and secure datacenters, clouds, and edge locations as one.

This solution integrates high-performance, energy-efficient PRIMERGY servers from Fsas Technologies with the Nutanix Cloud Platform, giving businesses a powerful hyper-converged infrastructure foundation that significantly simplifies the transition to private, hybrid or multi cloud environments.

With comprehensive implementation services and a single point of contact for support, PRIMEFLEX for Nutanix optimizes the entire lifecycle of a Nutanix environment—from deployment to ongoing operation and maintenance.

Outcomes

- Accelerate time to value and increase ROI
- Improve resiliency, productivity, and quality
- Deploy a modern infrastructure for AI and Cloud Native applications
- Reduce IT risk, costs and waste

NUTANIX

“We chose PRIMEFLEX for Nutanix for its reliability and scalability. It’s crucial for supporting critical infrastructure operations.”

Adam Eklund Eriksson, IT Manager,
Stockholm Skavsta Airport

Streamline operations

Quickly and non-disruptively set up and manage your infrastructure with built-in AI and adaptive machine learning, while delivering your critical applications, data, and services across private and hybrid clouds.

Protect your business

Ensure your systems and data are secure leveraging a resilient and secure always-on architecture that keeps your organization running without heavy intervention.

Get fast time to production

Mitigate deployment risks and benefit from up to 80% reduced implementation time with a standardized implementation service from Fsas Technologies.

Enjoy high application performance

Set up a responsive virtual IT infrastructure certified to run even the most demanding enterprise applications based on PRIMERGY x86 servers providing consistent IOPS with sub-millisecond response times.

Reduce IT risk, costs and waste

Start with what you need and scale as you grow. Create a sustainable infrastructure design reducing your hardware footprint and associated power and cooling requirements.

Enjoy world-class support

Get a single point of contact for support for the complete hardware and software stack, dramatically improving the time to incident resolution.

PRIMEFLEX for Nutanix is powered by PRIMERGY x86 servers from Fsas Technologies, designed to deliver high-quality, performance and reliability while reducing power consumption and costs.
