

# Accelerate Data Center Modernization

PRIMEFLEX for VMware vSAN

Intel® Xeon® Platinum processor

Hyper-converged infrastructures (HCI) are transforming the economics of IT, creating a next-generation data center foundation that's agile, cost-efficient, resilient and dramatically simplifies the path to Hybrid IT.

FUJITSU Integrated System PRIMEFLEX for VMware vSAN is a fully integrated, pre-configured and tested VMware HCI appliance, providing IT organizations with the easiest way to deploy a hyper-converged infrastructure based on VMware vSAN. In combination with tightly integrated VMware and Fujitsu management software and a single point of contact for support, PRIMEFLEX for VMware vSAN dramatically simplifies the complete life cycle of a VMware-based hyper-converged IT infrastructure – from deployment, to operation, to scalability and maintenance.

## Your advantages

- Get enterprise-class storage services
- Enjoy high application performance
- Grow as you go
- Simplify life cycle management
- Protect your business
- Reduce storage costs, save floor space, power and cooling
- Get fast time to production and one-stop support
- Simplify path to Hybrid IT

# Transform with confidence to VMware HCI

Intel® Xeon® Platinum processor

If your organization wants to make the move to a VMware hyper-converged infrastructure, PRIMEFLEX for VMware vSAN will make it a success.

## Get enterprise-class storage services

Benefit from VMware's leading hyper-converged architecture, which provides enterprise-class storage services for even the most mission-critical workload environments like SAP HANA.

## Reduce storage costs

PRIMEFLEX for VMware vSAN uses local storage of standard x86-servers, eliminating the need for an external storage infrastructure including storage arrays, SAN switches and management software.

## Enjoy high application performance

Set up a high-performance, responsive virtual IT infrastructure that provides consistent IOPS with sub-millisecond response times.

## Save floor space, power and cooling

Benefit from the convergence of compute and storage resources in an industry-standard server to reduce your infrastructure footprint, save floor space, power and cooling expenses.

## Grow as you go

Dynamically adapt your infrastructure to business needs with non-disruptive linear scalability of compute and storage resources up to 64 server nodes.

## Simplify path to hybrid IT

Dramatically simplify the path to hybrid IT by delivering a common platform for on-premises and off-premises deployments, enabling a consistent operational experience.

## Simplify life cycle management

Leverage tightly integrated VMware and Fujitsu life cycle management software covering the complete software and hardware stack, even down to the firmware level.

## Get fast time to production

Mitigate deployment risk with an expert integrated system fully certified by VMware and pre-integrated by Fujitsu.

## Protect your business

Safeguard your business against data loss from a wide variety of failures – from a single drive to an entire site.

## Enjoy one-stop support

Get 24/7 infrastructure support with a single point of contact for the complete hardware and software stack, dramatically improving the time to incident resolution.

PRIMEFLEX for VMware vSAN is powered by FUJITSU Server PRIMERGY. With the longest leadership positions in most of the VMware VMmark benchmark categories, it provides maximum performance for VMware environments.
