

Fast track to your VMware hyper-converged IT

PRIMEFLEX for VMware vSAN

Hyper-converged infrastructures (HCI) are transforming the economics of IT. Unlike traditional infrastructures, HCI is software-defined, creating a next-generation data center foundation that's even more cost-efficient, resilient and adaptable to changing business scenarios.

Fujitsu Integrated System PRIMEFLEX for VMware vSAN is an integrated system that includes all the hardware and software to simplify deployment of a VMware-based hyper-converged IT infrastructure. It leverages high performance, energy-efficient Fujitsu PRIMERGY standard x86 servers and the market-leading VMware HCI software stack (VMware vSphere and vSAN) to reduce complexity and TCO in data center infrastructure.

Your advantages

- Get enterprise-class storage services
- Reduce TCO by up to 50%
- Get fast time to production and one-stop support
- Simplify path to hybrid cloud

shaping tomorrow with you

Transform with confidence to VMware HCI

If your organization wants to make the move to a VMware hyper-converged infrastructure, PRIMEFLEX for VMware vSAN will make it a success.

Get enterprise-class storage services

Benefit from VMware's leading hyper-converged architecture providing enterprise-class storage services for even the most mission-critical workload environments like SAP HANA.

Reduce storage costs

Reduce TCO by up to 50% versus traditional storage approaches through use of local storage of standard x86-servers.

Enjoy high application performance

Set up a high performance, responsive virtual IT infrastructure that provides consistent IOPS with sub-millisecond response times.

Save floor space, power and cooling

Benefit from the convergence of compute and storage resources in an industry-standard server to reduce your infrastructure footprint, save floor space, power and cooling expenses.

Grow as you go

Dynamically adapt the resources to business needs with non-disruptive linear scalability of compute and storage resources up to 64 server nodes.

Simplify path to hybrid cloud

Dramatically simplify the path to hybrid cloud by delivering a common platform for private and public clouds, enabling a consistent operational experience.

Protect your business

Safeguard your business against data loss from a wide variety of failures – from a single drive to an entire site.

Get fast time to production

Mitigate deployment risk with an integrated system fully certified by VMware and pre-integrated by Fujitsu.

Simplify management

Use familiar VMware management tools to unify management of server and storage resources.

Enjoy one-stop support

Get 24/7 infrastructure support with a single point of contact for the complete hardware and software stack dramatically improving the time to incident resolution.

PRIMEFLEX for VMware vSAN is powered by FUJITSU Server PRIMERGY. Enjoying longest-standing leadership in most of the VMware VMark benchmark categories, PRIMERGY servers provide maximum performance for VMware environments.
