# Invest in IT with a perfect fit – every time!

**NetApp** **FUJITSU**

Just imagine you could cut the time you need for the construction of virtualization and cloud infrastructures by 40 percent and your costs by 30 percent, without the risks involved in a typical do-it-yourself project. PRIMEFLEX vShape offers simplicity and savings because all the required functionality is consolidated in one infrastructure stack.

PRIMEFLEX vShape's reference architectures frees you from the worries associated with a configuration of your own, and guarantees a tested, perfectly synchronized combination of reliable components. **It's like having a suit that is custom-tailored for every situation.**

**The powerful server/storage combination**
Fujitsu and NetApp can look back on more than 20 years of intensive cooperation in development and thousands of customer projects. And that pays off – for you! The outstanding performance of the server/storage combination from Fujitsu and NetApp in practice is also reflected in the benchmarking conducted by VMware*: **PRIMEFLEX vShape is the ideal solution for virtual environments – and a perfect fit from day one!**

*PRIMEFLEX vShape finishes in the top of the ranking in the VMware VMARK benchmarks "Performance only", "Performance with Server Power" and "Performance with Server and Storage Power".

## Slip into an IT solution that grows with your requirements and is easy on your budget

**NetApp**  **FUJITSU**

If your tasks as a CIO are becoming ever more complex: What path will you take to deliver greater performance without spending more money and needing more space? Our suggestion: Take advantage of a complete solution that lets you cope with rapidly increasing data volumes without capacity or performance problems – and can be integrated in a matter of hours: PRIMEFELX vShape!

**COME IN WE'RE OPEN**

100%
- quality
- durable
- life-long guarantee

**READY TO START RIGHT AWAY**

Rapid, riskfree implementation of all the necessary components.

**ADAPTABLE AT ANY TIME**

You define the balance between capacity, memory, VMs and performance.

**ALWAYS FAST**

Maximum reliability and extremely short response times thanks to flash technology.

**LONG-TERM INVESTMENT SECURITY**

A convergent implementation based on highly scalable and modular reference architectures.

**BEST SERVER/ STORAGE COMBINATION**

Fujitsu PRIMERGY server – based on industry standards – together with NetApp's cloud-ready data management solutionyou obtain an ideal IT combination that has proven itself in thousands of projects.

*PRIMEFLEX vShape finishes in the top of the ranking in the VMware VMARK benchmarks "Performance only", "Performance with Server Power" and "Performance with Server and Storage Power".
