Discover the connecting element of the data jungle

Fujitsu Software Infrastructure Manager

FUJITSU

Lianas and Fujitsu ISM

What do they have in common?
They build bridges and enable smooth interaction in the data jungle!

Fast and furious

LIANA
- Grows fast and high
- Connects animals and jungle residents

Fujitsu ISM
- 23 times faster in troubleshoots
- Centralizes all operations and monitors the entire IT infrastructure environment

The dynamic hidden champion

LIANA
- Forms bridges amidst the forest canopy, providing animals with paths across the forest

Fujitsu ISM
- Dynamizes the IT simple, sophisticated and efficient
- Integrates the IT seamlessly and manages it uniformly

Solid reliance

LIANA
- Used by animals and jungle residents – a solid guide

Fujitsu ISM
- Ensures 90% cost and time reduction with uniform management
- Reduces it power consumption by 50%

Build bridges in the data jungle

Fujitsu ISM provides a converged data center management tool enabling organizations to centralize all operations and monitoring for servers, storage, networking, facilities as well as power and cooling using a single user interface. Moreover ISM also enables the management of distributed data centers, including third-party devices.

- Deploy the IT fast, easy and reliable
- Control the IT centralized, easy and efficient
- Maintain the IT in any state and any place
- Integrate the IT seamless and manages it uniformly
- Dynamize the IT simple, sophisticated and efficient
