

Protect your data – and unlock its value

FUJITSU ETERNUS CS8000 with Commvault® Software

Is your data working for you? Your information is an asset to your business success. Don't let data management & protection be a liability.

ETERNUS & COMMVAULT

LOCATION  
STRUCTURE  
MANAGEMENT

EFFICIENT DATA MANAGEMENT

Maximize the value of your data. Ask yourself these questions:

Where is my data located?

What kind of data do I have?

How do I manage my data?

10 – 20 data silos is normal  
100+ potential data copies

- Do I differentiate between business-critical, cold and unused data?
- How do I merge data from numerous apps & workloads

How do I leverage the value of millions of items of information?

How can I turn my unstructured data into a business asset?

## Move from complex siloed environments to a flexible unified approach

WITH COMMVAULT SOFTWARE AND ETERNUS CS8000 STORAGE PLATFORM

**COMMVAULT**

Manage backup and archive data with a single product

- Unified software stack for core backup functions
- Deep integration of multiple hypervisors
- Safeguards all data – backups, snaps, archives, etc. – in one virtual storage pool

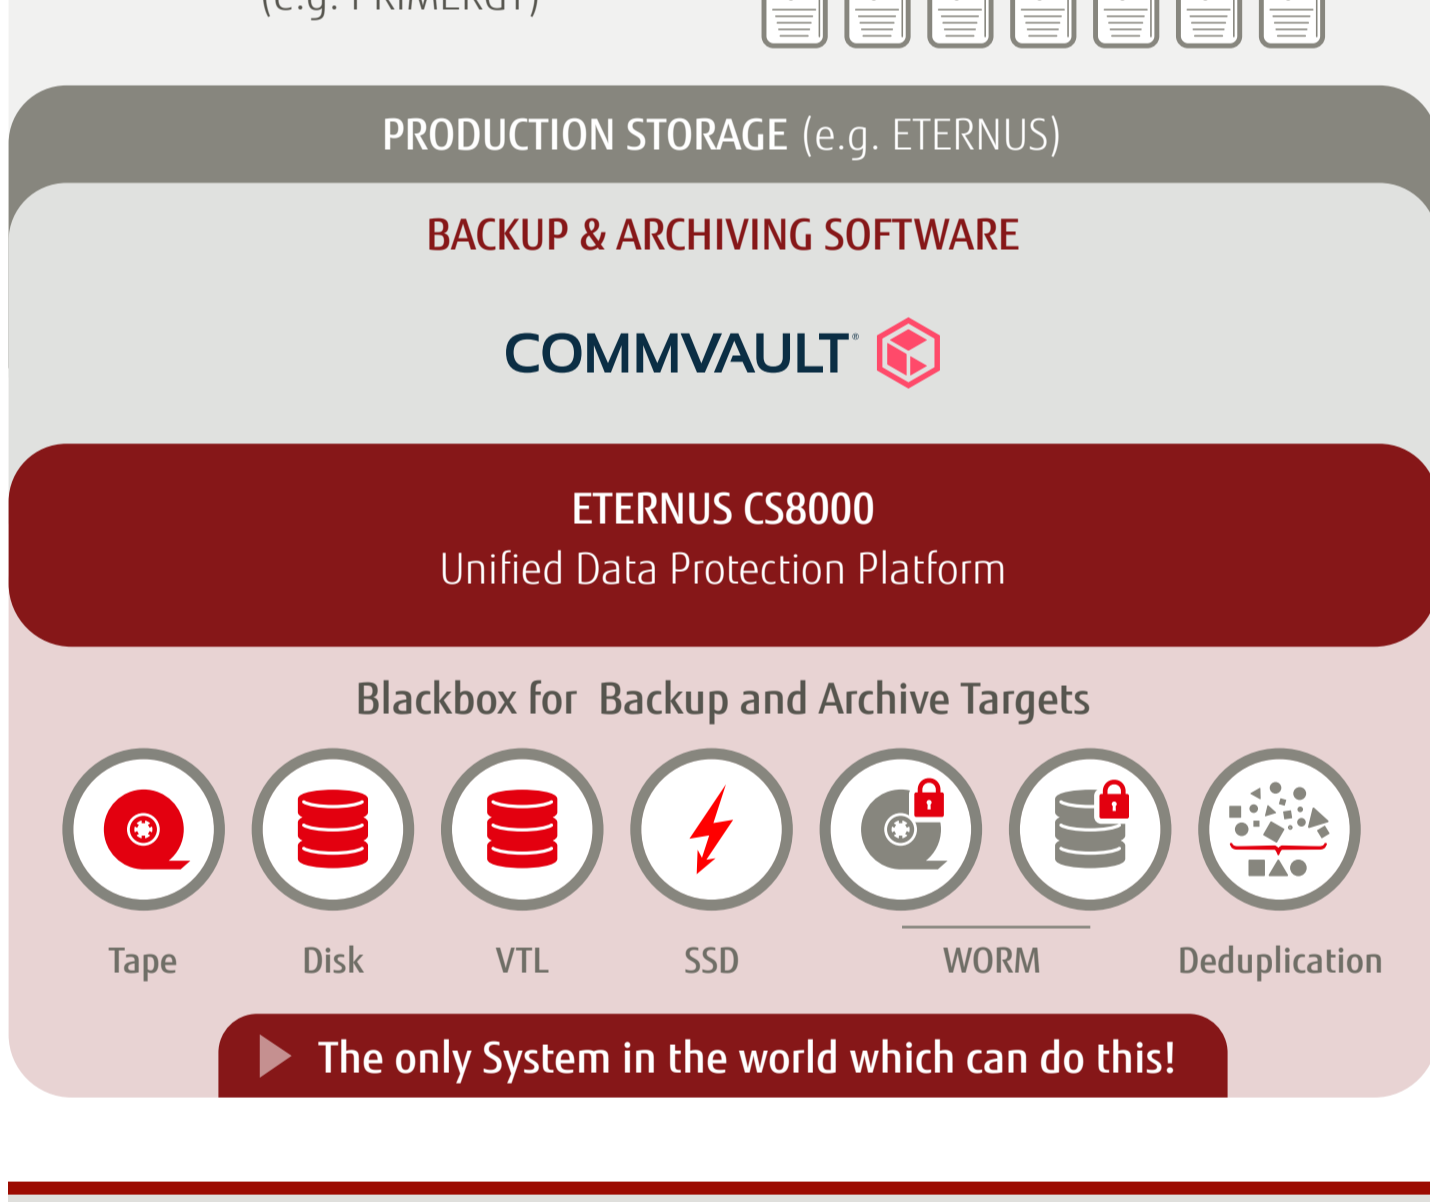

**ETERNUS CS8000**

The only storage solution to consolidate backup, archive, second-tier and object data

- Automates processes across different media (SSD, disk, dedup disk, tape, WORM) and locations
- Scales flexible (SLA, performance, capacity)
- Ensures highest levels of data availability with zero downtime

You create your data. Commvault and ETERNUS CS8000 take care of the rest.

The only System in the world which can do this!

### Efficiency gains

No need to expend resources managing complex IT infrastructure.

- Commvault Software offers a simplified architecture with complete, scalable backup & recovery and modern data management for progressive enterprises
- ETERNUS CS8000 provides a virtualization layer for all data protection targets with automation of processes

## Business Values approved by Customers

COMMVAULT	ETERNUS CS8000
Commvault is the recognized leader in data backup and recovery	20-year record of success in demanding data protection environments
57-392% improvement in data coverage for protection, analytics, encryption and reporting*	60% max. TCO reduction
49% faster recovery*	3x faster backup 2x faster restore
62% less annual unplanned downtime*	Most reliable, disaster-proven backup and archive storage

## Great for Archiving also

**Combine ETERNUS CS8000 with ETERNUS LT**

The most reliable long-term storage for backup and archiving

- Cost-efficient for years to come
- Highly reliable, scalable and flexible
- Offline backup mitigates risk of ransomware

**Archive:** Copy of primary version of data – no regular editing.

Pre-defined automation: Commvault moves files to ETERNUS CS8000. The solution meets your compliance obligations.

- Fast retrieval if required
- Manages media mix for your SLA:
  - Tape for low-cost and long-term retention
  - Disk & flash for fast, frequent retrieval

## Commvault and FUJITSU Alliance

Best choice to protect, manage and access your data

Keeping backup, recovery and archiving speed, capacity and cost in the balance	Addressing the information management and security needs of digital business	Consolidating backup and archiving infrastructures rigorously	Implementing data protection that meets different SLA requirements
