

Unleash the full potential of your data.

We guide you to the summit of digital transformation

Outperform expectations

Rely on our combined strength to make your transition into the digital era hassle-free.

Fujitsu's Business-Centric Data Center concept incorporates technologies and operational models. With turnkey solutions, managed and cloud services we help you to improve the operational capabilities.

Joint cloud offering

Joint innovations for business applications like SAP

Strategic alliance established in 1998

Innovation at NetApp is guided by the vision of a data fabric that helps you to seamlessly connect different management environments and clouds.

Doubled power, one common goal:
Building solid foundations for innovation

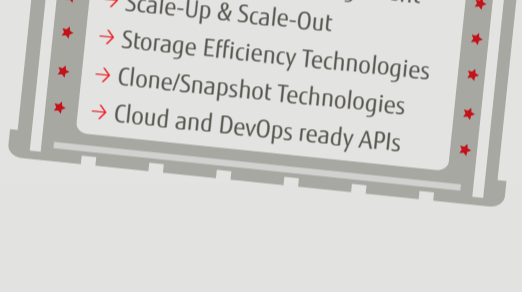

Take the direct route

Our proven technologies ensure rapid success because you can launch innovations much faster, offer more features and reduce CAPEX and OPEX at the same time.

ONTAP is the No.1 storage operating system worldwide*

- Simplified Data Management
- Scale-Up & Scale-Out
- Storage Efficiency Technologies
- Clone/Snapshot Technologies
- Cloud and DevOps ready APIs

Enjoy the very best connections

Our close and trusted partnership will help get you to the top in a secure and efficient way.
