

# Designed for ultimate business agility

## Fujitsu PRIMEFLEX for VMware vSphere

## VMware vSphere 7 introduces a cloud operating model that gives you ultimate freedom and control

### Native Kubernetes support accelerates innovation

- Dev teams can work independently from IT platform teams

### Easy app portability between on-premise and cloud

- Radically simplified testing and rollout of apps

### Flexibility to run any app on any cloud

- Increase agility as needed and keep full control

### What do you plan to do?

By 2025, more than 85% of global organizations will be running containerized applications in production, which is a significant increase from fewer than 35% in 2019.

Gartner, CTO's Guide to Containers and Kubernetes — Answering the Top 10 FAQs, July 2020

## The new vSphere on PRIMEFLEX brings even more new features to the market

### Simplified lifecycle management

- New tools save a lot of time with upgrades, patches and configuration

### Intrinsic security and control

- Deliver seamless enterprise and multi-factor authentication

### Application and hardware acceleration

- Run artificial intelligence (AI) and machine learning (ML) workloads in real time

### And much more ...

## And here's how to start right away: PRIMEFLEX for VMware vSphere

Fujitsu Integrated System PRIMEFLEX for VMware Sphere is the pre-tested and qualified converged infrastructure solution for the traditional and containerized business applications that you want to scale flexibly in order to market new services quickly.

### Design

Factory-designed and integrated infrastructure solution that can be adapted to specific needs quickly and easily

### Installation/Deployment

Quick and failsafe setup assures faster deployment

### Operation

Productivity gains through best performance, reliability and resource utilization

### Adaptation/Extension

Respond to changing needs quickly by scaling and disaggregated expansion on demand

## PRIMEFLEX for VMware vSphere redefines business agility with new vSphere 7

### Drive data center consolidation forward

Simplify data center operations and management at scale, increase business efficiency, and decrease CapEx and OpEx through virtualization

### Provide user-specific experience

Run both traditional and containerized applications for micro services side by side on the same infrastructure, without the need for additional tooling or training

### Enhance digital workplace experience

Economically provide mobile and homeoffice users with secure access to data and applications on the company network – from any device – anytime, anywhere

### Accelerate capacity-intensive workloads

Focus on end customers, balance workloads and prioritize resources. Manage capacity-intensive workloads and use cases, such as ML and AI

## Make your IT operations more agile, efficient and reliable

### Deliver value faster

- Faster deployment with standardized implementation services
- Integrated and easy VM cluster management with FUJITSU Software Infrastructure Manager (ISM)
- Start small and scale granularly on component level for up to 2,800 VMs

### Significantly lower TCO

- Simplified IT operations and optimized resource management
- Support of latest technologies (GPGPU, DDR4, all-flash storage ...) to accelerate performance
- Cost savings in terms of energy and space

### Absolute reliability

- Built-in high-availability for efficient 24x7 operation
- Support of the complete infrastructure with a single point of contact
- Pre-tested and optimized upgrade options
