

The top 3 reasons to make the move to VMware HCI

Transition from your existing VMware Converged Infrastructure to a **VMware Hyper-Converged Infrastructure**. Here is why¹:

45%

Reduce your total cost of ownership by more than **45%** with capital and operational savings

62%

Reduce CapEx by **62%** through server-based storage and software-provided data services

Reduce OpEx with rapid application deployment and easy ongoing management

What's new in PRIMEFLEX for VMware vSAN?

Fujitsu PRIMERGY M7 Servers

Best-in-class performance and energy efficiency for VMware workloads on industry-standard CPU technology

VMware vSphere 8

The enterprise workload platform for traditional and next generation apps

VMware vSAN 8

The enterprise-class storage virtualization software that provides the simplest path to hyper-converged infrastructure (HCI)

Boost performance

PRIMERGY RX2540 M7 with best VMware VMmark result for servers powered by Intel Xeon CPUs²; delivers 3x better performance than RX2540 M5 and 2x better than RX2540 M6³.

Leverage **VMware vSAN 8** Express Storage Architecture architecture optimized for high-performance storage devices and boost performance by up to 4x, without compromising space efficiency.

VMware vSAN 8 delivers software-based deduplication and compression providing as much as 7x data reduction with minimal CPU and memory overhead.

² Source: VMmark 3x Performance; only results: 2 hosts, 4 total sockets

³ Source: SpecPower results – RX2570 M7, RX2540 M6, RX2540 M5

Reduce costs

PRIMERGY RX2540 M7:
Get 3:1 consolidation ratio compared to RX2540 M5 and 2:1 to RX2540 M6

PRIMERGY RX2540 M7:
Gain 15% power savings compared to RX2540 M6⁴

VMware vSAN 8 lowers storage TCO by up to 40% with enhanced data compression and adaptive storage efficiencies.

⁴ Assumption: M6:M7 consolidation ratio 2:1; 30% CPU load

Enable cloud connectivity

VMware vSAN 8 seamlessly integrates with cloud services from AWS, Azure or GCP delivering a common platform for on-premises and off-premises deployments.

VMware vSAN 8 allows to run legacy enterprise apps and modern cloud-native apps from a single platform.

VMware vSAN 8 accelerates cloud native app development with cloud native storage supporting all key storage API objects within Kubernetes.
