FUJITSU Software BS2000 Service Pack 19.1 Innovations

General information about BS2000 Service Packs

As of 2019, new functions and corrections for BS2000 and openSEAS software products will be released bundled on two dates a year as part of Service Packs:

- Correction versions are delivered with the Service Packs
- New product versions can be obtained with the release of the Service Pack

This document provides information about the innovations in the current Service Pack. It is also available on the BS2000 web pages (Link: [FUJITSU Software BS2000](#)).

Detailed information on the new features of the individual products can be found in the corresponding release note. The entire content of the Service Pack is described as usual in the delivery letter.
