Service Pack 20.1
Innovations

General information about BS2000 Service Packs

This document gives you an overview of the innovations included in Service Pack 20.1.

Starting with the release of SP 20.1, the current service pack with the extended products and revised documentation will also be displayed on the BS2000 manual server, including a release notice for the service pack.
Please note the new tab "Service Packs" on the entry page of the BS2000 manual server:

| BS2000 Documentation | Services | Products | Solutions | Support | About Fujitsu

BS2000 Documentation

On this site you will find the documentation concerning all product areas of BS2000.
Choose the product link to get to the specified product documentation or use the "search for product" field to find a specific product
